Miller,Kelli Nigh,2017-03-01 Learning often begins with an experience in the body Our body can tighten or feel expansive depending on different learning contexts This experience of learning in the body is crucial to holistic education This book explores embodied learning from several perspectives This first section explores how psychology can inform us about embodied learning for example the work of Carl Jung and Wilhelm Reich devoted much of their thinking to how energy manifests itself in the body Meditation and movement are also examined as ways of embodied learning for example Dalcroze a form of movement education is presented within the context of whole person education The book also presents schools where embodied learning is nurtured Waldorf education is discussed as well as a public school in Toronto where the body is central to holistic education The book also presents visions of embodied learning John Miller presents a holistic vision of teacher education and Tobin Hart who has written extensively in this field writes about the embodied mind Embodied learning is an emerging area of inquiry in holistic education and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners

**The Social Movement of Spiritually Engaged Alternative Education in Thailand Against the Background of Reform and Globalization** Michael Ernest Jones, 2010-10-13 The establishment of alternative education private foundations and networks linked to socio political and spiritual advocacies distinguishes the Thai social movement in this research This research is a qualitative study that has made use of historical accounts to associate with data gathered from extensive interviews and case studies in order to inquire as to whether alternative education represents an historical spiritual tradition of opposition to reform hegemony and whether it has had an impact on state reform efforts Also investigated was whether there are some historical patterns associated with the manner in which the state of Thailand has dealt with the forces of globalization and whether the collective action by informal movements of Thai people also has the same predictable pattern of response to the global Analysis and comparison of these issues contribute in determining the values associated with people in the alternative education movement and the motives and intentions associated with state initiated reforms A further related aspect explored is the degree of Thai-ness and the embedded historical pattern of both the alternative education movement and education reform These inquiries were answered through the collection of data from three different trips to Thailand over a four year period the last trip a one year stay that permitted case studies and observations at three alternative schools and the interview of a host of participants from home school parents and students to Ministry of Education staff and officers In examining the data a clearer notion of what lies underneath the idea of Buddhist education and spirituality became clearer and how educational reform based on Western ideals and notions has not taken into account Buddhism and

culture as education This illumination brings new insight and also raises a new question as to the difference between social movements in a Buddhist nation such as Thailand and social movements in the West *Conference proceedings. New perspectives in science education* Pixel,2014

**International Handbook of the Religious, Moral and Spiritual Dimensions in Education** Marian de Souza,Gloria Durka,Kathleen Engebretson,Robert Jackson,Andrew

McGrady,2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world **Gateway to the Dao-field**

Avraham Cohen,2009 This book evolved from Avraham Cohen's doctoral dissertation for which he received the 2006 2007 Ted Aoki Prize for the Outstanding Dissertation in Curriculum Studies from the University of British Columbia Cohen who has an extensive background as a humanistic existential therapist and as a mindfulness meditator believes that these two fields have much to offer in the field of education His work in this book supplies a rich resource and shows that indeed the practice and philosophy of mindfulness and humanistic existential practices is a gold mine waiting to be fully mined and applied in education These ideas and practices come alive in his writings This collection of provocative and evocative essays written for both educational theorists and classroom practitioners addresses very directly the much neglected human dimension and community development potential within classrooms His groundbreaking work describes what most of us know intuitively to be important in classrooms and which is rarely adequately addressed how to be authentically and fully human and how this pedagogy of being human is central to becoming a great educator He points towards the practical implementation of pedagogic practices that integrate the personal inner work of the educator classroom practice and curriculum learning

**International Handbook of Inter-religious Education** Kath Engebretson,Marian de Souza,Gloria Durka,Liam Gearon,2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about

spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being. It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893. This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity. **International Handbook of Holistic Education** John P. Miller, Kelli Nigh, Marni J.

Binder, Bruce Novak, Sam Crowell, 2018-09-14 Providing a comprehensive overview of holistic education's history, conceptions, practices, and research, this Handbook presents an up-to-date global picture of the field. Organized in five sections, the Handbook lays out the field's theoretical and historical foundations, offers examples of holistic education in practice with regard to schools, programs, and pedagogies at all levels, presents research methods used in holistic education, outlines the growing effort among holistic educators to connect holistic teaching and learning with research practice, and examines present trends and future areas of interest in program development, inquiry, and research. This volume is a must-have resource for researchers and practitioners and serves as an essential foundational text for courses in the field. **Nurturing Child and Adolescent Spirituality** Karen-Marie Yust, 2006 *Nurturing Child and Adolescent Spirituality: Perspectives from the World's Religious Traditions* provides a forum for prominent religious scholars to examine the state of religious knowledge and theological reflection on spiritual development in childhood and adolescence. Featuring essays from thinkers representing the world's major religious traditions, the book introduces new voices, challenges assumptions, raises new questions, and broadens the base of knowledge and investment in this important domain of life. It specifically and intentionally focuses on theological and philosophical perspectives from within religious traditions, creating space for the religious traditions to find their voices. *Nurturing Child and Adolescent Spirituality* is firmly grounded in the language and priorities of religious studies and helps stimulate explorations of whether and how religious communities are tapping their own wisdom and strengths in nurturing today's young people in a complex and changing world. *Nurturing Child and Adolescent Spirituality* will set the stage for new waves of scholarship and dialogue within and across traditions, disciplines, and cultures that will enrich understanding and strengthen how the world's religious traditions and others understand and cultivate the spiritual lives of children and adolescents around the globe. *Global Perspectives on Spirituality and Education* Jacqueline Watson, Marian de Souza, Ann Trousedale, 2013-12-04 In recent decades and around the world, much attention has been given to the role of spirituality in the education of children and young people. While educationalists share many common goals and values in nurturing the spiritual lives of children and young people, national and regional cultures, religions, and politics have

impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education
