excellence in the United States **Assessment for Excellence** Alexander W. Astin, Anthony Lising Antonio, 2012-07-13 The second edition of *Assessment for Excellence* arrives as higher education enters a new era of the accountability movement In the face of mandates such as results based funding and outcomes based accreditation institutions and assessment specialists are feeling increasingly pressured to demonstrate accountability to external constituencies The practice of assessment under these new accountability pressures takes on special significance for the education of students and the development of talent across the entire higher education system This book introduces a talent development approach to educational assessment as a counter to prevailing philosophies illustrating how contemporary practices are unable to provide institutions with meaningful data with which to improve educational outcomes It provides administrators policymakers researchers and analysts with a comprehensive framework for developing new assessment programs to promote talent development and for scrutinizing existing policies and practices Written for a wide audience the book enables the lay reader to quickly grasp the imperatives of a properly designed assessment program and also to gain adequate statistical understanding necessary for examining current or planned assessment policies More advanced readers will appreciate the technical appendix for assistance in conducting statistical analyses that align with a talent development approach In addition institutional researchers will benefit from sections that outline the development of appropriate student databases *Excellence and*

Excellence Gaps in Education Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in

schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from underrepresented backgrounds *A Nation at Risk* United States.
