Leadership for Inclusive Education G. Mac Ruairc,E. Ottesen,R. Precey,2013-02-11 Inclusion is increasingly becoming one of the policy drivers shaping educational discourse and practice What constitutes the term inclusion itself and how ideas derived from the different perspectives on inclusion impact school leadership practice point to a highly contested field of enquiry Originally embedded in discourse relating to special education ideas relating to inclusion are attracting much broader appeal within system reforms in many jurisdictions This book seeks to keep the consideration of inclusion firmly in its broader context and to decouple it from the discourse relating to students with special educational additional needs This allows the authors to position their contributions more explicitly within discourses that draw on difference and diversity as unavoidable features of schools Within this collection we address the current political dogmas in many countries that take a purely rational managerial approach to leadership arguing that this is not contributing to inclusion in schools In doing this the book seeks to shape current discourses on leadership by exploring perspectives which are likely to enhance our understanding of inclusion Tolerance respect listening clarifying language being comfortable with differences and ambiguity and articulating and challenging the rationale behind the way we do things around here are key aspects of inclusive leadership and also fundamental imperatives for writing this book It will be useful to those in education who are engaged in further academic study in education or in reflective practice and to anyone taking advanced programmes in educational leadership and management The international perspectives on the issue of inclusion informing this book ensure that this book will be essential for those engaged in a comparative analysis of leadership practice in different contexts or those concerned with the complexity of ensuring inclusive models of education

Education Policy Les Bell,Howard Stevenson,2006-09-27 The study of educational leadership makes little sense unless it is in relation to who

the leaders are how they are leading what is being led and with what effect Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners the Leadership for Learning series explores the connections between educational leadership policy curriculum human resources and accountability Each book in the series approaches its subject matter through a three fold structure of process themes and impact Series Editors Clive Dimmock Mark Brundrett and Les Bell As global pressures focus increasing attention on the outcomes of education policy and on their implications for economic prosperity and social citizenship the experience of each individual learner is decisively shaped by the wider policy environment However there is often an underdeveloped understanding of how education policy is formed what drives it and how it impacts on schools and colleges This book explicitly makes these connections and links them to the wider challenges of educational leadership in a modern context Education Policy is divided into three sections which examine the development of policy at the levels of the nation state and individual institutions the forces that shape policies with emphasis on human capital theory citizenship and social justice and accountability research based case studies highlighting the application of policy in a range of situations The book provides a valuable resource for students practitioners middle managers and educational leaders in all sectors both in the UK and internationally who are engaged on masters and doctoral degrees or undertaking leadership training and preparation programmes

School Improvement Martin Thrupp, 2006-02-01 Martin Thrupp argues that there has to be a much bigger educational and social justice agenda to school improvement than the managerial approaches typically taken by government policy He critiques those school improvement texts courses and consultancies which mostly frame their analyses within the terms of current policy and therefore act to apologise for it An alternative more critical approach to school improvement is developed in the book and the author also provides examples of practical strategies to be employed within this approach

Educational Leadership and Pierre Bourdieu Pat Thomson, 2016-11-03 Pierre Bourdieu was one of the most important thinkers of the twentieth century. He argued for and practiced rigorous and reflexive scholarship interrogating the inequities and injustices of modern societies. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offered a powerful critique and method of analysis of the history of schooling and of contemporary educational policies and trends. Though frequently used in educational research, Bourdieu's work has had much less take up in Educational Leadership Management and Administration. Educational Leadership and Pierre Bourdieu argues that ELMA scholars have much to gain by engaging more thoroughly with his work. The book explains each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus, and capitals offer a way through which to understand the interaction of structure and agency and the limits on the freedom of an individual in this case an educational leader to act. Educational Leadership and Pierre Bourdieu offers an analysis of dominant trends in ELMA research, examining the kinds of questions asked, projects undertaken, and methods used. It provides alternative questions and methods based on a Bourdieusian approach, further readings, and a range of exemplars of the application of these tools. The book will be of interest to those whose primary focus is the utility of Bourdieu's social theory.

Ideologies in Educational Administration and Leadership Eugenie Samier, 2016-04-28 Ideologies in Educational Administration and Leadership explores ideological dimensions of educational administration in a number of Western and Central European contexts as they influence or shape the understanding, analysis, and practice in the field, covering a broad range of topics such as ethics, governance, diversity, and power. The first section, Philosophical and Theoretical Foundations, includes a range of sociological, political, and linguistic approaches to examining ideology in an educational context. The second section, Ideologies of Research and Teaching, includes examinations of neoliberal and technological effects on research and teaching as well as ideological shifts and challenges in the West and in Eastern Europe. The last section, Contemporary and International Issues, includes critiques of social media, neoliberal impact on schooling, managerial leadership, university ideologies in Finland, the rationalisation of universities, and the impact of administrative ideologies on school systems. The book will appeal to researchers, practitioners, policy makers, academics, as well as post graduates in educational administration theory and related courses in the ethics and politics of education, educational leadership, and organisational studies.

The Destructive Path of Neoliberalism, 2008-01-01 The Destructive Path of Neoliberalism: An International Examination, a compilation of twelve essays by leading scholars and educators, sheds light on the social, political, economic, and historical forces behind the rise of neoliberalism, the dominant ideological doctrine.

impacting developments in schools and other social contexts across the globe for over thirty years Several authors provide rich empirical data from schools across the globe to capture how neoliberal imperatives discourses and practices are impacting teachers students and communities at today s historical juncture Finally several contributors have developed pedagogical initiatives suggest policy considerations and convey theoretical insights designed to assist us in the struggle against the corporatization of schooling and social life International Studies in Educational Inequality, Theory and Policy Richard Teese,Stephen Lamb,Marie Duru-Bellat,2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization More and more populations both rich and poor depend on successful use of school and on gaining post school qualifications But access to high quality schooling success at school and chances of higher education all remain socially divided with implications for economic opportunities personal growth and civic and community development What causes these divisions in how education systems work Have decades of public investment brought about at least some improvements even if major gaps remain If not what are the barriers the social processes which have frustrated the efforts of government The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts from the wealthiest to some of the poorest nations on earth What have we learnt from the policy experience globally Do we know more today than yesterday about the origins of social inequality Are our policies better framed better designed to tackle inequality And which way forward What does the evidence suggest in terms of future approaches and emphasis This work is published in three volumes which together form a 3 volume set Questioning Leadership Gabriele Lakomski,Scott Eacott,Colin W. Evers,2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also

suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools At a time when leadership's dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations
