Educational Psychology An Integrated Approach To Classroom Decisions:

Educational Psychology Thomas Fetsco, John McClure, 2005 I applaud the vision the authors had in synthesizing this information in a way that makes the reader more confident in their application of these theories and principles to their own classrooms The authors have wonderfully succeeded in their attempt to integrate this material in a manner quite different from other texts I've read or reviewed Jim Persinger Emporia State University Any textbook that overemphasizes theory neglects the real world any textbook that overemphasizes practice neglects the underlying foundation of theory This book strikes a careful balance between theory and practice by explicitly linking the two Gregory Cutler Bay de Noc Community College By far this is the best educational psychology text I have read because it integrates and applies major learning theories to many of the daily issues future teachers will face Krista Robertson Rhode Island College I see this textbook as well written informative clearly and logically organized and a very useful component for a course in Educational Psychology I like it Raymond E Webster East Carolina University The authors have done an excellent job in producing an easy to follow format and style Paula Holmes Miller Crichton College The authors writing style and presentation level are clear and easy to read along with tables figures concept maps and other visual aids Yuliang Liu Ph D Southern Illinois University The text is well written and some very difficult topics such as Attribution Theory and Constructivism to name just two are easy to understand when compared to similar books I think this is some of the clearest writing I have read in a long time Michael P Verdi California State University San Bernardino I really enjoyed reading this text and I found its comprehensive nature to be a strength Linda W Morse Mississippi State University The authors writing style is clear simple and direct It speaks directly to the reader the examples are concrete and related to education John Isch Martin Luther College

Educational Psychology Thomas A. Teaching on Assessment Sharon L. Nichols, Divya Varier, 2021-03-01 In an age where the quality of teacher education programs has been called into question it is more important than ever that teachers have a fundamental understanding of the principles of human learning motivation and development Theory to Practice Educational Psychology

for Teachers and Teaching is a series for those who teach educational psychology in teacher education programs. At a time when educational psychology is at risk of becoming marginalized, it is imperative that we as educators walk our talk in serving as models of what effective instruction looks like. Each volume in the series draws upon the latest research to help instructors model fundamental principles of learning, motivation, and development to best prepare their students for the diverse, multidimensional, uncertain, and socially embedded environments in which these future educators will teach. The inaugural volume, *Teaching on Assessment*, is centered on the role of assessment in teaching and learning. Each chapter translates current research on critical topics in assessment for educational psychology instructors and teacher educators to consider in their teaching of future teachers. Written for practitioners, the aim is to present contemporary issues and ideas that would help teachers engage in meaningful assessment practice. This volume is important not only because of the dwindling presence of assessment-related instructional content in teacher preparation programs but also because the policy changes in the last two decades have transformed the meaning and use of assessment in K-12 classrooms. *Praise for Teaching on Assessment*: This thought-provoking book brings together perspectives from educational psychology and teacher education to examine how assessment can best support student motivation, engagement, and learning. In the volume, editors Nichols and Varier present a set of chapters written by leaders in the field to examine critical questions about how to best prepare teachers to make instructional decisions, understand assessment within the context of learning and motivation theory, and draw on assessment in ways which can meet the needs of diverse learners. Written in a highly accessible language and style, each chapter contains clear takeaway messages designed for educational psychologists, teacher educators, teachers, and pre-service teachers. This book is essential reading for anyone involved in teaching or developing our future teaching professionals. Lois R. Harris, Australian Catholic University. This impressive book provides a wealth of contemporary and engaging resources, ideas, and perspectives that educational psychology instructors will find relevant for helping students understand the complexity of assessment decision making as an essential component of instruction. Traditional assessment principles are integrated with contemporary educational psychology research that will enhance prospective teachers' decision making about classroom assessments that promote all students' learning and motivation. It is unique in showing how to best leverage both formative and summative assessment to boost student engagement and achievement, enabling students to understand how to integrate practical classroom constraints and realities with current knowledge about self-regulation, intrinsic motivation, and other psychological constructs that assessment needs to consider. The chapters are written by established experts who are able to effectively balance presentation of research and theory with practical applications. Notably, the volume includes very important topics rarely emphasized in other assessment texts, including assessment literacy, frameworks, diversity, equity, assessment strategies for students with special needs, and data-driven decision making. The book will be an excellent supplement for educational psychology classes or for assessment courses introducing students to current

thinking about how to effectively integrate assessment with instruction James McMillan Virginia Commonwealth University
