Tomie dePaola is one of the best known and most beloved creators of books for children. His art and his stories, which are filled with imagination, humor, grace, and curiosity, represent a love of life that is reflected in everything he does. Barbara Elleman's exploration of Tomie dePaola's career takes a fascinating look at the many worlds dePaola has brought to life through his work, from autobiographical memories to folktales, religious stories, nursery rhymes, and more, including of course the inventive world of his most famous character, Strega Nona. Originally published in 1999 and filled with evocative artwork, captivating photographs, and heartwarming anecdotes, this comprehensive book has been updated to cover two new decades of dePaola's creativity. Elleman's thoughtful narrative brings a fresh appreciation to the work of a unique author/illustrator, one who is a true legend of children's literature and a source of lasting joy for generations of readers, young and old. **'Scott's code'. This seminal work stands out for its clear, systematic exposition, characterized by an elegant prose style that balances scientific rigor with accessibility. Macquer's text is enriched by illustrations and practical experiments, positioning it within a broader Enlightenment context where empirical inquiry began to supplant tradition and dogma in the natural sciences. Pierre Joseph Macquer, a prominent figure in the French Enlightenment, was deeply influenced by the scientific revolution that unfolded in Europe. His extensive background in teaching and experimentation, along with his involvement in the burgeoning field of chemistry, led him to compile this groundbreaking compendium. Inspired by figures like Antoine Lavoisier, Macquer aimed to democratize the knowledge of chemistry, making it accessible to both novices and practitioners. For scholars, students, or enthusiasts of the history of science, Macquer's *Elements of the Theory and Practice of Chymistry* is an invaluable resource that not only illuminates the foundations of chemistry but also serves as a window into the evolving scientific
