Freireian Pedagogy, Praxis, and Possibilities Stanley S. Steiner, H. Mark Krank, Robert E. Bahruth, Peter McLaren, 2004-11-23 Scholar activist and educator Paulo Freire was one of the first thinkers to fully appreciate the relationships between education politics imperialism and liberation This volume is a testament to the works of Paulo Freire in the field of Education as well as the life of the man a story of courage hardship perseverance and unyielding belief in the power of love In this comprehensive collection prominent intellectuals including Noam Chomsky and Donald Macedo reflect on Freire's politics of liberation and add important new dimensions to the revolutionary innovative ideas that Freire bequeathed to a generation much in need Conceptions of Culture Thomas E. Wren, 2012-07-16 The concept of culture stands clearly but unsteadily at the heart of multicultural education This book provides a systematic in depth understanding of the role that culture plays in the massive literature of multicultural education as multiple and antithetical definitions of culture exist The book also shows multicultural educators how to discern the definition used in any particular book or article Thomas Wren deploys methods and concepts from philosophy and the social sciences to provide an analytic framework within which the history and current state of culture theory can be understood both for its own sake and for its educational significance Although the book is full of theory it is not a theoretical book in the usual sense It is a road map accompanied by the related theoretical information and tools that graduate students and faculty need to 1 navigate the complex terrain of multicultural education literature 2 apply the book's analytical framework to that literature and to their own future practice and 3 anticipate the social changes and accompanying conceptual changes in our notions of culture that are now occurring as part of the cultural hybridity of today's students **Inside Stories** Kathleen Bennett DeMarrais, 1998 Although articles reporting research studies are helpful in acquainting students with methodological approaches they often make the process look so straightforward clean and effortless It is rare to find an article that tells the real story behind the finished product By having real researchers tell their own stories of mucking around with methodological and ethical issues in qualitative research we get a more realistic human story of the process This is a collection of such stories Authors were asked to describe their own experiences with methodological and ethical struggles as they engaged in their work Each of the essays offers insight into the research approach used as well as particular issues which became apparent during the research

process Key issues raised by the authors include early learnings gaining entry overlapping conflicting roles and the boundaries of these roles differential power relationships who tells the story and whose story is told ethical concerns related to confidentiality and the influence of a researcher s particular philosophy or theoretical framework on his or her research Throughout the book we see scholars whose personal stories or autobiographies intersect closely with their research projects deMarrais introduces a unique framework to help students gain an overview of qualitative research methods and the underpinnings and processes in these approaches This framework is centered on the ways we understand phenomena using qualitative research approaches that engage archival knowledge narrative knowledge or observational knowledge *An Introduction to the Collected Works of C. G. Jung* Clifford Mayes, 2016-03-24 An Introduction to the Collected Works of C G Jung Psyche as Spirit offers a concise and engaging overview of Jung s work and contributions to the field of psychology Mayes first examines Jung s philosophical influences as well as his work and eventual break with Sigmund Freud providing insights into how these experiences shaped Jung s theory Mayes brings into focus the major concepts and themes explored in Carl Gustav Jung s Collected Works including the ego Self Axis archetypes personality types and the Collective Unconscious presenting a thorough introduction and a valuable resource for both Jungian students as well as Jungian scholars

Democracy and Multicultural Education Farideh Salili, Rumjahn Hoosain, 2010-04-01 Democratic political systems and the democratic way of life is aspired by most people around the world Democracy is considered to be morally superior to other forms of political systems as it aspires to secure civil liberties human rights social justice and equality before the law for everyone regardless of their gender culture religion and national origin Enshrined in democracy is separation of religion and state fair and competitive elections of leaders according to a country s constitution which in turn is based on democratic ideals Democracy aspires for people of different backgrounds to live together with their differences intact but all contributing towards a better life for all In today s increasingly pluralistic societies many people of different cultural and national backgrounds are brought together Many have migrated from countries with autocratic political systems Some with religions that require them to behave in different way others with cultures teaching them values of harmony collectivism and conformity as opposed to the culture of their host country emphasizing individualism and cherishing differences Hence in multicultural societies development of pluralistic democracy a democracy which includes respect for diversity is essential A truly multicultural education which is based on the assumption that different cultures will be equally represented in education goes a long way towards education for democratic citizenship Such an education would make students aware of issues of human rights and justice and encourage them to define their own values and ways in which they could contribute to

a better world The aim of this volume is to provide a forum for discussion of how multiple social perspectives and personal values can be brought together on common grounds around matters related to democracy Contributions from research and scholarly theoretical work as well as presentation of existing creative models of democracy education will be included Authors from the major democracies will comment on the models and practice of multicultural education in their respective countries to facilitate discussion and learning from each others experiences
