Art Making and Education Maurice Brown, Diana Korzenik, 1993 Since the early 1980s the Getty Center for Education in the Arts an operating entity of the J Paul Getty Trust has been committed to improving the quality of aesthetic learning in our nation s schools and museums According to the organizing idea of the center s educational policy teaching about the visual arts can be rendered more effective through the incorporation of concepts and activities from a number of interrelated disciplines namely artistic creation art history art criticism and aesthetics The resultant discipline based approach to art education does not however mandate that these four disciplines be taught separately rather the disciplines are to provide justifications subject matter and methods as well as exemplify attitudes that are relevant to the cultivation of percipience in matters of art They offer different analytical contexts to aid our understanding and aesthetic enjoyment contexts such as the making of unique objects of visual interest artistic creation the apprehension of art under the aspects of time tradition and style art history the reasoned judgment of artistic merit art criticism and the critical analysis of basic aesthetic concepts and puzzling issues aesthetics Discipline based art education thus assumes that our ability to engage works of art intelligently requires not only our having attempted to produce artworks and gained some awareness of the mysteries and difficulties of artistic creation in the process but also our having acquired familiarity with art s history its principles of judgment and its conundrums **Art in Education** Howard Conant, Arne Randall, 1959 *Art in Education* D.
