Educating the Tudors Amy McElroy, 2023-02-16 Education during the Tudor era was a privilege and took many forms including schools colleges and apprenticeships Those responsible for delivering education came from a variety of backgrounds from the humble parish priest to the most famed poet laureates of the day Curriculums varied according to wealth gender and geography The wealthy could afford the very best of tutors and could study as much or as little as they chose while the poorer members of society could only grasp at opportunities in the hopes of providing themselves with a better future The Tudors were educated during a time when the Renaissance was sweeping across Europe and Henry VIII became known as a Renaissance Prince but what did his education consist of Who were his tutors How did his education differ to that of his elder brother Prince Arthur and how did Henry's education change upon the death of his brother There is no doubt Henry was provided with an excellent education particularly in comparison to his sisters Margaret and Mary Henry's own education would go on to influence his decisions of tutors for his own children Who had the privilege of teaching Henry's children and did they dare to use corporal punishment Educating the Tudors seeks to answer all of these questions delving into the education of all classes the subjects they studied educational establishment and those who taught them

The Rise of Character Education in Britain Lee Jerome, Ben Kisby, 2019-08-20 What is character education Why has it risen up the political agenda in the UK in recent years And what does it mean in pedagogical practice This book addresses these questions challenging the individualistic and moralistic ideas underlying the clamour amongst politicians educators and authors to promote grit resilience and character in schools Closely examining a range of teaching resources the book shows that the development of character is wrongly presented as the solution to a wide variety of social problems with individual citizens expected to accommodate themselves to the realities of the contemporary economic context rather than enhancing their capacities to engage in civic and political activities to bring about changes they wish to see The book argues that there is a tried and tested alternative to character education which is far more likely to strengthen British democracy namely citizenship education

The Education of Blacks in the South, 1860-1935 James D. Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression By placing black schooling within a political cultural and economic context he offers fresh insights into black commitment to education the peculiar significance of Tuskegee Institute and the conflicting goals of various philanthropic groups among other matters Initially ex slaves attempted to create an educational system that would support and extend their emancipation but their children were pushed into a system of industrial education that presupposed black political and economic subordination This conception of education and social order supported by northern industrial

philanthropists some black educators and most southern school officials conflicted with the aspirations of ex slaves and their descendants resulting at the turn of the century in a bitter national debate over the purposes of black education Because blacks lacked economic and political power white elites were able to control the structure and content of black elementary secondary normal and college education during the first third of the twentieth century Nonetheless blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires *Directory of Public Elementary and Secondary Education Agencies* ,1986 **The New Education** ,1896 **Education** ,1910 **Charges Against the Federal Board for Vocational Education** United States. The Routledge International Handbook of Life and Values Education in Asia John Chi-Kin Lee,Kerry J Kennedy,2024-06-28 This Handbook provides a comprehensive look at the educational scope of life and values that characterize 21st century Asia as well as those values shared across cultures Some values are deeply resonant with the region s past while others reflect modernity and the new contexts in which Asian societies find themselves Exploring these values of different types and the way they are constructed in Eastern and Western contexts the contributors delve into the diversity of religious moral and social education to promote greater understanding across cultures While a range of values is identified here there is no single set of values that can be applied to all people in all contexts The time has long gone even for single societies when values can be imposed Yet this Handbook emphasizes both the extent and importance of values to individuals and their societies how they respond to these values may provide the key to better and more caring societies and to better lives for all Academics and teachers will find this Handbook resourceful because it raises important theoretical issues related to social values and their formation in distinctive contexts and provides novel insights into the diverse educational landscape in Asia Policymakers and educators will also find this text helpful in learning to think about new ways to improve the quality of people s lives

other words the best laid plans about the technical aspects of pedagogy are bound to fail unless the growth of the whole person social emotional moral spiritual and intellectual is the pedagogical target Teachers and educationalists will find that this handbook provides evidence culled from both research and practice of the beneficial effects of such a values and wellbeing pedagogy
