Ickis, Jacob Levitsky, 1989 Managers in both the private and public sectors are increasingly recognized as critical in the use of scarce resources for national development There is no unanimity of opinion however regarding the models or approaches to management education that are most appropriate in different environmental settings This report encompasses management education for each of the following groups the managers and future managers of large scale enterprises entrepreneurs and small businessmen and public administrators It reviews worldwide trends and developments in management education for lessons in such areas as curriculum design research and teaching methodology and institutional policies and administration Experience is drawn from recognized universities educational organizations civil service institutes and corporations in several major countries and regions of the world *Educating Managers for Business and Government* Samuel Paul, John C. Ickis, Jacob

Levitsky, 1989-01-01 Managers in both the private and public sectors are increasingly recognized as critical in the use of scarce resources for national development There is no unanimity of opinion however regarding the models or approaches to management education that are most appropriate in different environmental settings Traditionally management education has been dominated by the need to train executives for large scale enterprises But the 1980s has seen a global trend toward the deconcentration of business The future development of the indigenous business sector in the developing world depends heavily on the emergence of small and medium scale entrepreneurs The roles of public administrators with respect to regulatory and developmental activities enterprise are also changing This trend is evident not only in market oriented countries but also in socialist countries and many developing countries This volume encompasses management education for each of these groups the managers and future managers of large scale enterprises entrepreneurs and small business people and public administrators Its purpose is to review worldwide trends and developments in management education for information about curriculum design research and teaching methodology and institutional policies and administration Experience is drawn from recognized universities educational organizations civil service institutes and corporations in several major countries and regions of the world A number of tables and figure appear in this volume along with references A seminar participants list also is included Author DB *Management Training and Development in China* Malcolm Warner, Keith Goodall, 2009-12-04 This book with contributions by internationally known scholars from a wide range of countries examines the Chinese response to the challenges of management training and development It summarizes the current trends in management training and development and outlines the likely course of future developments

**Management Education and Humanities** Barbara Czarniawska-Joerges, 2006 Academics and managers who strive for a humanistic management education usually care for people but they are challenged by sophisticated intellectual subjects and practical problems The authors experience competence and commitment enables them to present an extensive coverage

of important views and an in depth study of these issues Eduard Bonet ESADE Spain This volume is a timely initiative It resonates with important questions on globalization and its consequences on the unrelenting quest for efficiency and productivity on recent corporate scandals and on the responsibilities of managers and management education This book is a manifesto for an intellectual revolution In a complex and open world managers often bump into the limits of the decontextualized tools associated with mainstream management knowledge and practice Managers have to navigate in a world that is not only economic but also political cultural shaped by history and ethical traditions and preoccupations not only as a mark of social capital but really as a way to enhance their managerial skills and efficiency The role of management education should be to prepare them for that odyssey and this volume tells us that humanities could be a powerful tool in that sense This project is served by a highly legitimate international panel of contributors who collectively point towards an alternative for management thinking and management education Marie Laure Djelic ESSEC Business School France Management Education and Humanities argues that management teachers and researchers seem to be increasingly dissatisfied with the way managers are usually educated in western countries It claims that educational practices and methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices and debates the role that humanism and humanities might play in the formation of new managerial lites The book examines three themes that have emerged as central to the contemporary debate on management education the profession of management humanism as a philosophy and worldview and the humanities as an academic field where management schools could find new inspirations for curricula All three themes are scrutinized in a frame of reference extended between two different points of view the traditional view with its tendency to idealize and even sometimes romanticize humanism the humanities and management as a social function and the past modern view which is inclined to skepticism and to the deconstruction of social and cultural phenomena Providing a lively account of this ongoing debate and exploring new trends and experiences in management education this book will be invaluable reading for teachers students and researchers of management management strategy and organizational behaviour
