Toward an Imperfect

Education Sharon Todd, 2015-11-17 The theory of cosmopolitanism is built on a paradoxical commitment to a universal idea of humanity and to a respect for human pluralism *Toward an Imperfect Education* critiques the assumed goodness of humans that underwrites the idea of humanity and explores how antagonistic human interactions such as conflict violence and suffering are a fundamental aspect of life in a pluralistic world This book proposes that the inescapable difference between humans compels our ethical and political observations in education Todd persuasively argues that facing humanity in all its complexity and imperfection ought to be a central element of the cosmopolitan project to create a more just and humane education Informed primarily by poststructural philosophy and feminist theory she focuses on how sexual cultural and religious difference intersect with universal claims made in the name of humanity Individual chapters develop a novel framework for dealing with antagonism in relation to human rights democracy citizenship and cross cultural understanding

Globalisation, Human Rights Education and Reforms Joseph Zajda, Sev Ozdowski, 2016-09-23 This book the seventeenth instalment in the 24 volume series *Globalisation Comparative Education and Policy Research* explores the interrelationship between ideology the state and human rights education reforms setting it in a global context The book examines major human rights education reforms and policy issues in a global culture It focuses on the ambivalent and problematic relationship between the state globalisation and human rights education discourses Using a number of diverse paradigms ranging from critical theory to historical comparative research the authors examine the reasons for and the outcomes of human rights education reforms and policy The authors discuss discourses surrounding the major dimensions affecting the human rights education namely national identity democracy and ideology These dimensions are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation building identity politics and human rights education globally With this as its focus the chapters represent hand picked scholarly research on major discourses in the field of human rights education reforms The book draws upon recent studies in the areas of globalisation equality and the role of the state in human rights education reforms Furthermore the perception of globalisation as dynamic and multi faceted processes clearly necessitates a multiple perspective approach in the study of human rights education This book provides that perspective commendably It also critiques current human rights education practices and policy reforms It illustrates the way shifts in the relationship between the state and human rights education policy In the book the authors who come from diverse backgrounds and regions attempt insightfully to provide a worldview of current developments in research concerning human rights education and citizenship education globally The book contributes in a very scholarly way to a more holistic understanding of the nexus between nation state human rights education both locally and globally Globalization of Education Joel Spring, 2014-08-01 Continuing Joel Spring's reportage and analysis of the intersection of global forces and education this text offers a comprehensive overview and synthesis of current research theories and models related to the topic Written in his signature clear narrative style Spring introduces the processes institutions and forces by which schooling

has been globalized and examines the impact of these forces on schooling in local contexts Significant conceptual frameworks are added to this Second Edition specifically the economization of education corporatization of education and the audit state These concepts are embedded in the global educational plans of major organizations such as the World Bank the Organization for Economic Development and Cooperation OECD World Economic Forum and multinational corporations Globalization of Education Second Edition features new and updated information on The World Bank OECD and the United Nations The World Trade Organization and the Global Culture of Higher Education Corporatization of Global Education Religious and Indigenous Education Models The Global Workforce Migration and the Talent Auction Globalization and Complex Thought Human Rights, Education & Global Responsibilities James Lynch, Celia Modgil, Sohan Modgil, 2014-07-10 First published in 1992 This is Volume 4 of a series of four on Cultural Diversity and the Schools and focusses on Human Rights Education and Global Responsibilities One of the major problems facing societies in almost all parts of the world is the inadequate accommodation of social equity with cultural diversity The crisis emanating from neglect of this issue can be seen in societies as different and wide apart as the Soviet Union India Pakistan the United States and the United Kingdom This series seeks to contribute through joint publication and the stimulation of greater discourse to identify the pathways to a less selfish and parochial response to the continuing dilemma of equity and diversity not solely within the nation state but also internationally **Social Justice, Peace, and Environmental Education** Julie Andrzejewski, Marta Baltodano, Linda Symcox, 2009-04-01 The concept of standards seems antithetical to the ways critical educators are dedicated to teaching but what would standards look like if they were generated from social justice perspectives and through collaborative and inclusive processes Such is the central question posed by the contributors of this groundbreaking collection on the interconnectivity of social justice peace and environmental preservation Challenging education that promotes consumerism careerism and corporate profiteering they boldly offer examples of a new paradigm for practicing a transformative critical pedagogy Rather than just talking about coalition building within and across educational communities they demonstrate how we might communicate from different vantage points and disciplinary boundaries to create a broader picture of social and eco justice Social Justice Peace and Environmental Education will be required reading for educators and students who want to envision and practice living acting and teaching for a better world *Nonviolence* Senthil Ram, Ralph Summy, 2008 The so called war on terror has gone badly for the West playing directly into the strategy of al Qa ida and the rest of the terrorist network Why did this happen Were there other approaches that might have been implemented with better prospects of success This edited collection of perspectives on the non violent counter to terrorism opens the topic to serious consideration The development of a non violent paradigm brings into sharp focus the deficiencies of present thinking and paves the way for comprehending how non violence might overcome those deficiencies and introduce viable alternatives Since there is a general ignorance about the history theory and operational dynamics of non violence these aspects are

featured throughout the book and related to the special case of terrorism To understand empathetically the background and mind set of the opponent without condoning his actions to study his culture to avoid the strategic trap he has set to examine the different gender reactions of a Muslim Society to differentiate between non violent Islam and Islamic Terrorism to jettison the misinformed baggage we carry about violence to appreciate the positive role education and aesthetics can play and to investigate ways in which a non violent counter to terrorism might be staged including a Gandhian response These are just some of the tasks that the contributors have collectively pursued Their ideas excitingly open up a whole new set of possibilities for a more peaceful world
