The Development of Chinese Education in Malaysia Tan Yao Sua, 2022-12-06 Chinese education in Malaysia has come a long way since the nineteenth century The Chinese had brought their traditional mode of education to Malaya which was modernised following new political developments in China The postcolonial period saw the restructuring of education which resulted in the acceptance of Chinese primary schools into the national educational system and the conversion of Chinese secondary schools to national medium schools Despite this the development of these schools especially the Chinese primary schools has not been fully supported by the government and there are also measures that could lead to a change in their character Meanwhile the development of Independent Chinese Secondary Schools has been lacklustre and it was only in the early 2000s that they began to show impressive growth But the strong emergence of international schools beginning in the mid 1990s might pose a threat to this impressive growth As for the aspirations of the Chinese educationists to establish a Chinese institution of higher learning since the second half of the 1960s their efforts were blocked by the government until the 1990s when they managed to establish a private college to create a complete system of Chinese education in Malaysia This book is essential reading for anyone hoping to study the development of the Malaysian Chinese education system in greater detail

The Politics of Bangsa Malaysia: Nation-Building in a Multiethnic Society (UUM Press) Mohamed Mustafa Ishak, 2014-01-01 The politics of nation building has always been a central issue in Malaysia. Whilst the country has been able to sustain a relatively stable politics since the 1969 tragedy and hence generate a rapid economic development at least until the 1997 Asian economic crisis and later in the post 2008 General Election, the project of nation building remains a basic national agenda yet to be fully resolved. The book explores the delicate process of nation building in Malaysia in the post 1970s especially in the context of the vision constructing the Bangsa Malaysia or a united Malaysian nation enshrined in Mahathir's Vision 2020 project which was introduced in 1991. It discusses the underlying socio-political parameters that shape and influence the politics of nation building in the country and the construction of Bangsa Malaysia. As such, the book provides an alternative perspective in the analysis of ethnic relations and nation building in Malaysia, thus broadens the understanding of Malaysian politics and society.

Indian Communities in Southeast Asia (First Reprint 2006) K S Sandhu, A Mani, 2006 In *Indian Communities in Southeast Asia*, thirty-one scholars provide an analytical commentary on the contemporary position of ethnic Indians in Southeast Asia. The book is the outcome of a ten-year project undertaken by the editors at the Institute of Southeast Asian Studies, Singapore. It is multi-disciplinary in focus and multi-faceted in approach, providing a comprehensive account of the way people originating from the Indian subcontinent have integrated themselves in the various Southeast Asian countries. The study provides insights into understanding how Indians, an intra-ethnically diverse immigrant group, have intermingled in Southeast Asia, a region that itself is ethnically diverse.

The Education of Diverse Student Populations Guofang Wan, 2008-06-19 This book takes up the challenge of examining the thorniest educational issue from a global perspective. It contributes to the evidence-based conversation among policy makers, educators, and researchers around the world about what works to improve the education outcomes and what can make a bigger difference for the education of diverse students. The eleven countries included—the United Kingdom, Austria, Canada, the United States, South Africa, Ghana, China, Singapore, Malaysia, Australia, and New Zealand—are unique and yet overlap in the sense that they all face similar challenges of teaching diverse students. The authors, being education and cultural insiders, discuss country-specific policies, efforts, and best practices in the education of diverse students, share stories of success and failure, and explore current best practices from global, social, political, and economic perspectives. Built on previous theories and research, it describes diverse students' experiences in the global and information age and searches for effective policies and practices that help these students to perform better in school and in life. Readers are forced to step outside of their own experiences and commonly held beliefs about education. Conscious recognition that there are other ways of doing things may result in new approaches that we have not explored before. We hope the insights, lessons, and conclusions drawn from examining this pressing education issue from a global perspective will help nations to better understand and deal with it in their own educational system.

Educational Issues in Multiethnic Malaysia Tan Yao Sua, R. Santhiram, Education in multiethnic societies is a subject of considerable debates in almost all parts of the world These debates have invoked strongly felt positions between competing ethnic groups over a host of issues that have a profound impact on the nation building process Apart from deep seated issues arising from contrasting internal demands over educational rights and equality emerging issues arising from external influences such as the global spread of English as a result of globalisation have also impacted the nation building process of multiethnic societies It is against this context that educational issues in multiethnic societies merit our attention In the case of Malaysia discourses over these issues are particularly intense and hotly contested by the different ethnic groups This is primarily because of the extreme difficulties in

mediating these complicated issues which are impinged by competing socio cultural economic and political interests This book explores the contested terrains of education in multiethnic Malaysia It comprises seven chapters that cover three crucial areas of educational provisions and delivery namely education of ethnic minorities education and national integration and educational language policy These three crucial areas are often the prime concerns of policy makers in multiethnic societies who have to tread a thin line in resolving these issues which are underpinned by intense coterminous interests and inter ethnic competition and having the potential to generate conflicts contestation and power struggle As far as the Malaysian policy makers are concerned their efforts in resolving these issues have not been overly successful It is most unfortunate that their policy decisions are at times influenced by competing political and ethnic interests rather than guided by sound theoretical underpinnings that could put the educational development of the country on a stronger platform and a clearer trajectory
