Educational Administration Paula F. Silver, 1983 Educational Administration Wayne K. Hoy, Cecil G. Miskel, 1996 This text provides a synthesis of theory and research in organizational behaviour as it applies to the practice of educational administration Organizational theory can be taught at either the introductory or advanced levels in educational administration curriculums *Educational Administration: Theory, Research, and Practice* Wayne Hoy, Cecil Miskel, 2012-03-22 *Greenfield on Educational Administration* Thomas Greenfield, Peter Ribbins, 2005-08-08 This collection is a representative set of ten of the key papers which Thomas Greenfield arguably the doyen of contemporary theories of educational administration has published over the last twenty years His writings as they appear are eagerly sought after and studied by scholars students and practitioners in Britain and across the English speaking world but are not always readily available individually The collection charts the development of Greenfield's views of social reality as human invention and explores strands of argument on the nature of knowledge on administrative theory and research on values on the limits of science and the importance of human subjectivity truth and reality The volume is concluded by a discussion between Greenfield and Peter Ribbins which reflects on Greenfield's career and elaborates on the range of his complex and often controversial ideas **THE POSTMODERN CHALLENGE TO THE THEORY AND PRACTICE OF EDUCATIONAL ADMINISTRATION** 2003-01-01, 2003-01-01 Based on nearly a decade of scholarship this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration Current ideas of practice are deconstructed from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory practice gap Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad based dissent from a century of thought in the field including a penetrating examination of whether the concept of a field itself is viable Part Two of the book explores the many ramifications of postmodernism to practice beginning with ideas concerning educational research These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards ISLLC and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders Other chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo Finally the book tackles the issue of the theory practice gap and indicates that new and progressive theories which anticipate problems of practice are what is required to deal with this persistent issue The book contains many helpful exhibits in understanding the issues concerning theory and practice as well as a glossary of terms most commonly found in postmodern discourse This book is designed for college and university programs engaged in the preparation of educational leaders for elementary secondary schools and college administrative positions *EDUCATIONAL ADMINISTRATION Theory and Practice* Edgar Leroy

major changes in recent years There is now more theoretical diversity in the field than at any other time with influences from traditional and post positivist science subjectivism ethics critical theory and cultural studies Similarly social political and economic factors have brought about new approaches to practice Schools administration in particular is increasingly being dominated by decentralization and pressures for accountability on curriculum and educational outcomes Educational Administration is the first Australian text to offer a comprehensive survey of theory context and practice It includes chapters from leading Australian scholars such as Richard Bates Hedley Beare Brian Caldwell Gabriele Lakowski and Fazal Rizvi

The Art of Educational Leadership Fenwick W. English, 2007-08-14 English successfully challenges the established educational community to rethink the current state of research on school leadership in the social sciences The inclusion of theory discourse and stories of recognized leaders followed by chapter learning extensions that include key concepts movie recommendations and prompted reflective journaling makes this book a most valuable resource for the educational leadership community H J Bultinck CHOICE The Art of Educational Leadership provides one of the most complete examinations of leadership that I have encountered I admire the way it urges students to think and reflect The format allows individual learners to focus on those materials that best fit their learning style while the numerous presentations of a single topic through the different modalities strengthens the learning This text is a fresh new look at leadership Louise L MacKay East Tennessee State University Fenwick W English returns to themes of leadership he explored in more than 20 earlier books and dozens of presentation to educator audiences He favors re centering educational leadership in the humanities rather than acting on the recommendation of the business literature and he emphasizes the use of films as a way to humanize leadership concepts THE SCHOOL ADMINISTRATOR Excellent cogent analysis of key concepts of leadership are presented in a reader friendly style Saul B Grossman Temple University Moves beyond established notions of leadership to recognize that effective leading is about drama and performance artistry The Art of Educational Leadership Balancing Performance and Accountability stresses the human side of leadership No other text on this topic demonstrates so ably the importance of artistry in leadership in a field that has been lopsidedly dominated by concepts informed by science Presenting the idea that leadership is an art this book Exemplifies a balance between the science and the art of educational leadership The real improvement of practice is rooted in the art of application which is about context and represents the key to leadership practice Connects content material to self discovery Exercises at the end of each chapter include creating a personal reflective journal to engage the reader in and reflect upon theories and practices presented in the book Films are suggested for viewing to illustrate the interaction between context culture decisions and outcomes Portrays multicultural leadership in action Biography boxes throughout the book share how multicultural educational and political leaders who have been recognized as expert practitioners learned the art of leadership in the public arena This is the first book in educational leadership to sketch out a balance between the science and the art of the field The text illustrates how performance and

practice represent the art while the delineation of the skills and conceptual models represent the science Educational Administration Frederick C.
