This book deals with the results of theoretical and experimental studies of the emotions which my colleagues and I carried out over the last two decades An interest in the psychology of emotions prompted us to undertake an analysis of the creative legacy of K S Stanislavsky A result of this analysis was the book *The Method of K s StanisZavsky and the PhysioZogy of Emotions* written in 1955 1956 and published by the Academy of Sciences of the USSR in 1962 I am grateful to the first reader and critic of the manuscript Leon Abgarovich Orbeli In 1960 having transferred to the Institute of Higher Nervous Activ ity and Neurophysiology of the Academy of Sciences of the USSR I had the opportunity to conduct experiments on problems that had interested me for a long time In close scientific association with Peter Mikhailovich Ershov director and teacher of theater I began a systematic study of the involuntary and electrophysiological shifts in actors during voluntary production of various emotional states Here comparatively quickly we became convinced that the fruitfulness of such studies rests on an absence of any kind of developed systematic and sound general theory of the emotions of man and the higher mammals We will illustrate our difficulties if only with one example We had frequently read of the so called emotional memory      *Hypertension*, 1982      *Scientific and Technical Aerospace Reports*, 1976      **Cumulated Index Medicus**, 1994      **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70
