Employment Growth And Basic Needs A Oneworld Problem Report Of The:

Overview of trends, consequences, perspectives, and issues United States. Congress. House. Select Committee on Population,1978 **Poverty in Developing Countries** World Employment Programme,1992 Topics include agricultural development basic needs development strategy and planning economic development and policy employment food production housing needs income distribution and industrialization Indexes are divided by references authors corporate authors subject and geographical aspects *The International Labour Organization* Daniel Maul,2019-11-05 This book is the first comprehensive account of the International Labour Organization s 100 year history At its heart is the concept of global social policy which encompasses not only social policy in its national and international dimensions but also development policy world trade international migration and human rights The book focuses on the ILO s roles as a key player in debates on poverty social justice wealth distribution and social mobility subjects and as a global forum for addressing these issues The study puts in perspective the manifold ways in which the ILO has helped structure these debates and has made through its standard setting technical cooperation and myriad other activities practical contributions to the world of work and to global social policy **A Basic Needs Policy Model** A. Kouwenaar,2013-10-22 Using recent research on Ecuador this book discusses a social accounting matrix SAM based model for simulating the effects of basic needs policies on various socio economic groups Specific parameter choice and specification of relationships allow the general equilibrium model to capture rigidities and occurrences of non perfect commodity and factor markets Basic needs satisfaction is described as an output resulting from income formation and expenditure and dynamically linked to the structural processes of household and socio economic group formation formation of the labour force and wealth and labour productivity Simulations concentrate on the effects of various expenditure indirect tax and redistributive policies on incomes and basic needs satisfaction **Developing Countries and the Multilateral Trade Regime** Donatella Alessandrini,2010-08-10 This book explores the way in which development has functioned within the multilateral trade regime since de colonisation In particular it investigates the shift from early approaches to development under the GATT to current approaches to development under the WTO It argues that a focus on the creation and transformation of a scientific apparatus that links forms of knowledge about the so called Third World with forms of power and intervention is crucial for understanding the six decades long development enterprise of both the GATT and the WTO The book is both topical and necessary given the emphasis on the current round of negotiations of the WTO The Doha Development Round has been premised on two assumptions Firstly that the international community has undertaken an unprecedented effort to address the imbalances of the multilateral trading regime with respect to the position of its developing country members Secondly that its successful conclusion represents an historic imperative and a political necessity for developing countries Through a sustained analysis of the interaction between development thinking and trade practices the book questions both assumptions by showing how development has always occupied a central position within

the multilateral trading regime Thus rather than asking the question of what needs to be done in order to achieve development the book examines the way in which development has operated and still operates to produce important and often unacknowledged power relations Intense controversy surrounds the issue of the relationship between trade and development This book is novel in examining the emergence of the international trade regime in the context of the history of the concept of development that may be traced back at least to the time of the League of Nations This is a very welcome and original contribution to the field that should generate new discussions and understanding about the law of international trade Antony Anghie University of Utah

International Analysis Poverty Peter Townsend, 2014-06-06 First published in 1993 The scientific and political debate about poverty has been changing fast with dramatic implications for intellectual interpretation and action by governments and the intention in publishing this volume is to contribute to that debate Scientists concerned to analyse poverty have been thrust by events into greater international service But there are sinister forces at work which are seeking to divert them into petty issues to blame the victims of poverty or to cut them off from the resources or opportunities to investigate and report freely This book is born of that frustration and represents the changing debate during the late 1980s and early 1990s *A Development Economist in the United Nations* Richard Jolly, 2022-11-22 This book explores the joys and occasional frustrations of a development economist working for the United Nations From 1982 to 2000 Richard Jolly worked in senior positions in UNICEF and UNDP on assignments that were innovative for the UN the countries concerned and for development The book analyses his experiences as Deputy Director of UNICEF Principal Coordinator and co author of UNDP s widely acclaimed Human Development Report and a community development officer in Kenya as well as his involvement in the UN and country mission to Zambia and ILO employment missions to Colombia Sri Lanka and Kenya It shows what the UN can achieve when there is strong leadership at central and field levels together with decentralized approaches Jolly s experiences lead him to conclude there are in fact three UNs the formal UN of governments the second UN comprising UN staff members often the source of initiatives and action and the third UN of NGOs experts consultants and others closely following the UN or working with it and also often bringing new thinking and innovation Reflecting on the need for international action to be more effective and the UN to be more strongly supported this volume is a fascinating guide to students and scholars of global governance development and international organizations and those working for them
