Emotional Expression In Infancy A Biobehavioral Study:

Emotional Expression in Infancy Robert N. Emde, Robert John Harmon, Theodore J. Gaensbauer, 1976 On infant development **Emotional Expression in Infancy** David Shakow, Joseph De Rivera, Paul E. Stepansky, Robert N. Emde, Robert John Harmon, Theodore J. Gaensbauer, 1976 **The Psychobiology of Affective Development (PLE: Emotion)** Nathan A. Fox, Richard Davidson, 2014-11-20 Originally published in 1984 this was the first volume on this topic to appear in an emerging area of study at the time The editors were selective in choosing their contributions to the volume to ensure that both the developmental and neuropsychological domains were well represented One of the major goals was to foster greater contact and cross fertilization between subdisciplines that they firmly believed should be more intimately connected The result is this title which can now be enjoyed in its historical context **Measuring Emotions in Infants and Children** Carroll Ellis Izard, Peter B. Read, 1982 Volume 1 brings together a strong group of researchers who have pioneered a wide variety of empirical approaches to the difficult problems of conceptualising and assessing emotion in infants and children The volume will be an invaluable resource for all those who study infants and children Volume 2 complements the first volume which gave new impetus to research on social and affective development adapted from vendor website The Course of Life: Infancy and early childhood , 1980 Measuring Emotions in Infants and Children: Volume 2 Carroll Ellis Izard, Peter B. Read, 1982 This complements the first volume which gave new impetus to research on social and affective development Evolutionary Perspectives on Human Development Robert G. Burgess, Kevin MacDonald, 2005 This new edition of Evolutionary Perspectives on Human Development is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It s clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field

David P Barash University of Washington Evolutionary Perspectives on Human Development Second Edition considers the role of evolutionary theory in the field of developmental psychology to examine key topics of individual human development This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues The book emphasizes both domain general evolved psychological mechanisms and domain specific processes The text also integrates behavior genetic research with evolutionary and developmental principles In this contributed volume editors Robert L Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments Evolutionary Perspectives on Human Development applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view Key Features Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology

Rage, Power, and Aggression Robert A. Glick, Steven P. Roose, Steven T. Roose, 1993-01-01 Rage aggression and the will to power are significant human characteristics that have been relatively neglected in psychoanalytic literature In the past rage has been viewed as a response to threat or frustration aggression as an instinctual drive and the will to power as causing destructive and maladaptive behavior In this volume the authors probe these dimensions of human experience to show how they serve adaptive needs assuage anxiety protect against threat and foster maturation

Crying as a Sign, a Symptom, and a Signal Ronald G. Barr, Brian Hopkins, James A. Green, 2000-01-10 Originally viewed as a sign of disease crying is now understood as a symptom of problematic functioning in early development We now know a great deal about normative developmental patterns of infant crying and how they are manifested in various clinical settings emergency room complaint painful procedures colic temper tantrums and nonverbal and mentally challenged infants Crying as a Sign a Symptom and a Signal brings the reader up to date on this new evidence concerning infant crying in the first few months and years of life In this authoritative clinical text an international team of experts explore this new conceptualization of the significance of early infant crying They bring both historical and methodological perspectives to a multidisciplinary synopsis of the new understanding of this important infant behavior
