

A group of children are gathered around a large sheet of paper, drawing various educational sketches. The sketches include a microscope, a lightbulb, a computer monitor, a pair of scissors, a number line with numbers 1 through 9, a person, a stack of books, and a person with a lightbulb above their head. The children are using colored markers to draw these sketches. A large purple cloud-like shape is overlaid on the center of the image, containing the text "EMPOWER YOUR LEARNING BEYOND THE CLASSROOM".

**Educating for the Future** David Hicks,1994      **Lessons for the Future** Dr David Hicks,David Hicks,2003-08-27  
Drawing on the latest research in futures studies this book provides new insights into ways of helping both students and teachers think more critically and creatively about their own future and that of wider society It acknowledges the crucial role of education in helping young people understand the nature of local and global change and the social and environmental impacts such change will have on their future Setting out a clear educational rationale for promoting global and futures perspective in education it provides helpful and stimulating examples of futures orientated classroom activities It also includes fascinating research into children s views of the future      *Futures Education* David Hicks,Richard Slaughter,1998  
First Published in 1998 Routledge is an imprint of Taylor Francis an informa company      *World Yearbook of Education 1998*  
David Hicks,Richard Slaughter,2012-09-10 One of the central roles of education is to prepare students for the future and yet its study is often a neglected issue This work focuses on the futures field as an educational resource using case studies from around the world and on the nature of education for sustainability      **Educating Beyond Violent Futures** Francis Hutchinson,2005-06-27 As we enter the Twenty First Century it is easy to assume that worsening trends in violence will be a feature of our lives whether in our schools our societies or as a species Educating Beyond Violent Futures challenges assumptions that trends in violence are destiny and raises crucial questions about choice and engagement Drawing upon new research this book is essential reading for those who want to prepare our children for living constructively in the next century      *Futures Beyond Dystopia* Richard Slaughter,2004 How can dystopian futures help provide the motivation to change the ways we operate day to day This book raises and tackles a number of important questions about the future and the lessons we can learn for the present      **Learning to Teach Geography in the Secondary School** Mary Biddulph,David Lambert,David Balderstone,2015-05-20 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what s involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development

Intended as a core textbook and written with university and school based initial teacher education in mind *Learning to Teach Geography in the Secondary school* is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of *Learning to Teach Geography in the Secondary School* This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework *The Times Educational Supplement* This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses *Educational Review* Youth Futures Jennifer Gidley, Sohail Inayatullah, 2002-08-30 How do young people see the future Are they optimistic or pessimistic Do their views vary from culture to culture Are young people actively engaged in creating their desired futures or are they passively receiving the future What effect has globalization on youth culture How is the future taught in schools These and many other questions are dealt with in this volume of comparative empirical research from around the world on how youth see the future Generally youth are considered immature irresponsible toward the future cliquish impressionistic and dangerous toward self and others They are considered as a mass market two billion strong the passive recipients of globalization Most recently in OECD nations youth have become fodder for political speeches they are the problem that reflects both the failure of the welfare state dependence on the state the failure of globalization unemployment and postmodernism loss of meaning and the crisis of the spirit In the Third World youth are seen not only as the problem but equally as the force that can topple a regime as in Yugoslavia However youth can also be seen as carriers of a new worldview a new ideology These and other views concerning youth are examined in this volume of comparative empirical research Studies from around the world provide intriguing answers to questions about how youth see the future and their future roles This book will be of particular interest to scholars students researchers and policymakers involved with youth issues and future studies Reflective Teaching of Geography 11-18 Graham Butt, 2002-10-11 THIS IS THE SERIES BLURB LIST ALL BOOKS TOGETHER *Continuum Studies in Reflective Practice and Research* is a new series of textbooks aimed at teaching students As with Andrew Pollard's books they use the idiom of reflective teaching In other words they avoid the two extreme views about learning to teach namely that it is best done simply through acquiring practical tricks of the trade without any theory or that it is best done applying systematized objective theory The distinctive feature of reflective teaching is that it encourages practitioners to develop by continually inter relating theory and research findings to their own practice situation and style These comprehensive textbooks provide an accessible guide to all those who are new to teaching in secondary schools Covering all aspects of job from planning through to teaching and assessment the authors provide constructive accessible and above all practical advice to help subject teachers become more effective in their work Developing the Global Teacher Miriam Steiner, 1996 The outcome of a collaboration between teacher educators and development agencies

this book draws on a wide range of experience and perspectives from individuals and organizations working for justice in national and international contexts

**Education Transformation in Muslim Societies** Ilham Nasser, 2022-09-06 Hope is a complex concept one academics use to accept the unknown while also expressing optimism However it can also be an action oriented framework with measurable outcomes In Education Transformation in Muslim Societies scholars from around the world offer a wealth of perspectives for incorporating hope in the education of students from kindergarten through university to stimulate change dialogue and transformation in their communities For instance though progress has been made in Muslim societies on early education and girls enrollment it is not well documented By examining effective educational initiatives and analyzing how they work educators policymakers and government officials can create a catalyst for positive educational reform and transformation Adopting strength based educational discourse contributors to Education Transformation in Muslim Societies reveal how critical the whole person approach is for enriching the brain and the spirit and instilling hope back into the teaching and learning spaces of many Muslim societies and communities Education Transformation in Muslim Societies is a copub with the International Institute of Islamic Thought

**Peace Education in a Postmodern World** Ian M. Harris, 2013-12-16 This special issue of the Peabody Journal of Education provides a comprehensive overview of the latest developments in peace education reform School reforms based upon principles of peace education have in common a belief in the power of peace to create a positive learning climate in schools and to address the problems of violence in the broader culture A peace education strategy for improving school productivity rests upon three main assumptions 1 Violence contributes to the poor performance of many students 2 Adults in school settings need to address problems created by violence in order for schools to improve 3 Anxieties that make it hard for students to master traditional subject matter can best be addressed by a comprehensive peace education strategy that makes school a safe place to learn and provides students with knowledge about alternative nonviolent ways to resolve conflicts Peace building reforms go beyond responding to immediate forms of violence that may be overwhelming students and teachers to promoting positive images of peace through the study of nonviolence Written by established experts in the field of peace education from six different countries this collection of articles not only represents a wide variety of peace education practices from different corners of the globe but it also represents varying academic perspectives Educators can play a key role in helping human societies progress toward more sustainable ways of living by implementing peacemaking peacekeeping and peace building strategies in school programs Peace education reforms point to a new way of thinking about schools as vehicles for promoting a peace culture through insights offered by nonviolent theory

Education for Sustainability Stephen Sterling, John Huckle, 2014-08-07 Now with new Introduction and additional new chapter At a time when polls suggest that a majority of young British people believe that the future will offer a worse quality of life than the present it is becoming imperative that children are introduced to principles of sustainability through the educational system from an early age and

that these principles are regularly reinforced and built upon The government's own Panel on Sustainable Development has called for a comprehensive strategy for environmental and training and NGOs frequently point to education as a key policy instrument in the transition to sustainable development This is the first book published in Britain to provide an overview of the theory and practice of these issues It brings together contributions from environmental educators working in the formal and informal sectors and in continuing education and provides perspectives on the philosophy politics and pedagogy of education for sustainability as well as case studies and pointers towards good practice Part I establishes some initial perspectives on sustainability education and the role of NGOs the potential for education for sustainability in the formal and informal sectors is assessed in Parts II and III Part IV discusses its development as part of the greening of business and local government and Part V looks at the way forward

*The Future in Learning Science: What's in it for the Learner?* Deborah Corrigan, Cathy Bunting, Justin Dillon, Alister Jones, Richard Gunstone, 2015-09-01 This volume considers the future of science learning what is being learned and how it is being learned in formal and informal contexts for science education To do this the book explores major contemporary shifts in the forms of science that could or should be learned in the next 20 years what forms of learning of that science should occur and how that learning happens including from the perspective of learners In particular this volume addresses shifts in the forms of science that are researched and taught post school emerging sciences new sciences that are new integrations futures science and increases in the complexity and multidisciplinary of science including a multidisciplinary that embraces ways of knowing beyond science A central aspect of this in terms of the future of learning science is the urgent need to engage students including their non cognitive affective dimensions both for an educated citizenry and for a productive response to the ubiquitous concerns about future demand for science based professionals Another central issue is the actual impact of ICT on science learning and teaching including shifts in how students use mobile technology to learn science

**Learning to Teach Geography in the Secondary School** David Lambert, David Balderstone, 2012-08-21 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps them acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and creative lessons This fully revised and updated second edition takes account of new legislation and important developments in geography education including literacy numeracy citizenship and GIS Brand new chapters in this edition provide essential guidance on fieldwork and using ICT in the context of geography teaching and learning Chapters on teaching strategies learning styles and assessment place the learner at the centre stage and direct advice and activities encourage successful practice Designed for use as a core textbook Learning to Teach Geography in the Secondary School is essential reading for all student teachers of geography who aspire to become effective reflective teachers Praise for the first edition of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as

being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales Educational Review *Politics, Education and Citizenship* Mal Leicester, Sohan Modgil, 2005-08-10

Volume VI is concerned with political education and citizenship Papers from several countries lend an international perspective to currently significant concerns and developments including democracy and democratic education human rights national identity and education for citizenship Teaching the Global Dimension David Hicks, Cathie Holden, 2007-04-19

Teaching the Global Dimension specifically responds to concerns such as inequality justice environment and conflict in chapters written by leading educationalists in the field It explores both the theory and practice of global education today and provides a framework for understanding global issues a model identifying the key elements of good practice insight into young people's concerns for the world and the future tried and tested strategies for handling controversial global issues more confidently in the classroom key concepts for planning appropriate learning experiences a range of case studies which demonstrate the different ways in which a global dimension can be developed Inspiring thought provoking and highly practical this book shows how teachers at any stage in their career can effectively and successfully bring a global dimension to the taught curriculum

**Key Issues in Secondary Education** John Beck, Mary C. Earl, 2003-09-11 Praise for First Edition Key Issues in Secondary Education addresses crucial cross curricular issues which are central to secondary schooling in the new millennium We are confident that this book will make a major contribution to the understanding of new teachers as they grapple with issues that go beyond subject boundaries and as they explore the fundamental issues which affect schools and young people today Donald McIntyre and Mike Younger This eagerly awaited second edition has been fully updated and revised with new chapters on the nature and measurement of intelligence and issues of race and racism in school and society Other chapters addressing the rapidly changing world of educational policy and innovation have been substantially rewritten to take account of recent developments and current debates All contributors write clearly and accessibly without over simplifying the complexity of the issues or the value they pose

**Thinking Skills and Early Childhood Education** Patrick J. M. Costello, 2013-11-26 This text offers a rationale for the popular idea among teachers and researchers that young children should be taught critical thinking and argument in the early years of their education

**Encyclopedia of Peace Education** Monisha Bajaj, 2008-05-01 The rise of peace education both in scholarship and in practice has yielded numerous documents websites and publications with often divergent perspectives on what the field is does and means The Encyclopedia of Peace Education provides a comprehensive overview of the scholarly developments in the field to date so as to provide a common denominator for the various actors involved in advancing peace education

internationally Thus this edited volume serves as an essential reference guide that traces the history and emergence of the field highlights foundational concepts contextualizes peace education practice across international and disciplinary borders and suggests new directions for peace educators From core conceptual perspectives to the moral and spiritual foundations of the field to the role of the United Nations the Encyclopedia grounds peace education in a solid theoretical and practical framework through the writings of the field s most renowned scholars This volume will target undergraduate and graduate students as well as scholars and practitioners working in international and non governmental organizations in the field of peace education
