Education In Rwanda Rebalancing Resources To Accelerate Post Conflict Development And Poverty Reduction:

Education in Rwanda, 2004 **Education in Rwanda**, 2004 Ten years after the 1994 genocide in which an estimated 10 percent of the country's population perished Rwanda's devastated education system is now back on its feet Classrooms have been repaired and new ones built teachers who fled the mayhem have been reintegrated into the teaching force arrears in teacher pay have been cleared up a Genocide Fund has been created specifically to assist orphans and in higher education the system has been diversified and new arrangements for student finance have been introduced This success notwithstanding the task of transforming the rapid recovery into sustained progress over time has only just begun A priority will be to ensure that all Rwandan children can complete a full course of primary schooling of reasonable quality and that expansion at the post primary levels occurs at a pace commensurate with the labor market's capacity to absorb highly educated job seekers Achieving this will present tough tradeoffs in financing and service delivery including combining increased funding for primary education with greater reliance on private financing at other levels sharper targeting of public subsidies for education and tighter management of classroom processes to improve student flow and student learning throughout the system Education in Rwanda explores the challenges of sustaining educational progress in a fiscally viable fashion as the country makes the transition from post conflict recovery to long term development *Education in Rwanda* World Bank, 2004 Key economic aspects that are particularly relevant in the Poverty Reduction Strategy Paper PRSP context cost finance service delivery and education outcomes *Education in Rwanda* Weltbank, 2013 Rwanda's recent history was marred by genocide in 1994 in which at least ten percent of the population lost their lives and rebuilding the stock of human capital is an important part of that process where the government has made efforts to broaden access to education and enhance the quality of services On the international stage the education sector has also come into the limelight specifically under the 2000 United Nations Millennium Declaration and the foregoing context presents clear challenges for education managers The purpose of this report is to provide a factual basis for discussion Noteworthy are the efforts to reduce grade repetition in primary education and similarly reforms in higher education finance have been launched to reduce the cost of government sponsored overseas studies The report is addressed to Rwanda's policymakers in the education sector as well as to education practitioners and should also be of interest to policymakers in other parts of the government particularly those charged with managing the country's development strategy and aligning public spending accordingly The breadth of its coverage is limited to key economic aspects that are particularly relevant in the Poverty Reduction Strategy Paper PRSP context cost finance service delivery and education outcomes Most impressive is the rapid pace of enrollment increase in the aftermath of the genocide and as the system expanded it has done so in ways that has moved it toward a good balance between the public and private sectors while also compares favorably with that of other low income countries in Africa in terms of the socioeconomic disparities in educational access Challenges ahead focus on managing student flow and graduate

output mobilizing and making effective use of resources for education ensuring that public resources for education reach the front lines balancing the accessibility of schools against considerations of scale economies managing classroom conditions and processes to enhance student learning and minimizing the barriers to education for orphans and other vulnerable groups Nevertheless the task ahead remains daunting as the recovery phase gives way to the implementing the sector's long term development Concerns about efficiency equity and fiscal sustainability will be inevitably relevant as the country seeks to advance educational progress in a resource constrained environment

feedback namely administrative feedback correctional feedback and instructional feedback emerged Further analysis showed that student teachers in Rwanda experience different forms of feedback They have divergent understandings of feedback Delayed feedback leads to increased uncertainty among students communication of feedback creates different forms of relationships between student teachers and teacher educators In addition student teachers learn implicitly from teacher educators how to provide feedback and there are no common standards regarding internships The analysis of the results of this study with regard to the discourse on teacher education feedback and educational quality indicates that feedback in teacher education has a multidimensional effect
