Taylor,Les Sternberg,2012-12-06 *Exceptional Children Integrating Research and Teaching* provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of *Exceptional Children Integrating Research and Teaching* that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of *Exceptional Children Integrating Research and Teaching* that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs **The Education of People with Profound and Multiple Handicaps** Judy Sebba,1988 Designed as a basis for in service courses for staff working with people who have profound and multiple handicaps Topics covered include assessment curriculum teaching methods microelectronics problem behaviour and physiotherapy
