**Precarity and Vocational Education and Training** Maria-Carmen Pantea, 2018-12-19 This book explores how the changing nature of work intersects with and influences young people s views on their future As an increasingly precarious service sector overtakes traditional industrial work vocational education and training VET is held up as a panacea for poverty alleviation youth unemployment and economic growth However the views of young people in VET themselves concerning their own work and aspirations have largely been ignored Based on interviews and focus groups conducted with over 250 young people in VET in Romania this

book examines the types of subjectivities that are generated in the processes by which they try to make sense of future and the meanings of work In doing so the author identifies three ideological layers that frame their views arguing that while the young people interviewed hold conventional aspirations for stability and predictability they were visibly influenced by neoliberal beliefs in agency experimentation and short termism Ultimately a layer of low expectations crystallises unvoiced concerns over a troubling future In highlighting young people s voices this pioneering book calls for a recalibration of the emphasis on VET in Romania It will appeal to students and scholars of youth studies the sociology of work vocational education and training and European studies

### **Education, Skills and Social Justice in a Polarising World** Bill

Practice Theory Perspectives on Pedagogy and Education Peter Grootenboer, Christine Edwards-Groves, Sarojni Choy, 2017-01-16 This book examines the way in which the practice turn in education and pedagogy offers unique perspectives on the nature of educational work Through a plurality of practice theories deeper understandings emerge about a range of education and concepts providing useful tools for advancing and developing practice theory in education and pedagogy The book discusses the related and dual perspectives of pedagogy as both a teaching and an upbringing practice It also explores education in a range of contexts and sectors beyond school including VET tertiary and non formal settings Education is seen as serving a dual purpose the development of individuals and the betterment of societies and community and this conceptualisation of education underpins the book It acknowledges that there are diverse understandings and perspectives of practice theory pedagogy and education each of which is contestable and ripe for further development and this is examined throughout the book This book was developed alongside an invited symposium held in June 2015 in Brisbane Australia where the authors and interested others gathered to discuss practice theory perspectives on pedagogy and education The title Practice Theory Perspectives on Pedagogy and Education captures the central overarching focus that underpins the book      *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004      Francophone Perspectives of Learning Through Work Laurent Filliettaz, Stephen Billett, 2015-07-09 This book generates a comprehensive account of ways in which practice based learning has been conceptualized in the Francophone context Learning for occupations and the educational and practice based experiences supporting it are the subject of increased interest and attention globally

Governments professional bodies workplaces and workers are now looking for experiences that support the initial and ongoing development of occupational capacities Consequently more attention is being given to workplaces as sites for this learning This focus on learning through work has long been emphasised in the Francophone world which has developed distinct traditions and conceptions of associations between work and learning These include ergonomics and professional didactics Yet whilst being accepted and of long standing in the Francophone world these conceptions and traditions and the practices supporting them are little known about or understood in the Anglophone world which is the dominant medium for scientific and educational discussion This book addresses this problem through drawing on accounts from France Switzerland and Canada that make accessible and elaborate these traditions conceptions and practices through examples of their applications to occupationally related learning These accounts offer variations and culturally specific developments of these traditions but collectively emphasize a preoccupation with how both work and learning need to be understood through situated considerations of persons enacting their work practice In this way they offer noteworthy and worthwhile contributions to contemporary global considerations of learning through work
