American Education, Democracy, and the Second World War C. Dorn, 2015-12-25 American Education Democracy and the Second World War examines how U S educational institutions during World War II responded to the dilemma of whether to serve as weapons in the nation s arsenal of democracy or citadels in safeguarding the American way of life By studying the lives of wartime Americans as well as nursery schools elementary and secondary schools and universities Charles Dorn makes the case that although wartime pressures affected educational institutions to varying degrees these institutions resisted efforts to be placed solely in service of the nation s war machine Instead Dorn argues American education maintained a sturdy commitment to fostering civic mindedness in a society characterized by rapid technological advance and the perception of an ever increasing threat to national security

Wartime Schooling and Education Policy in the Second World War Sarah Van Ruyskensvelde, 2016-08-18 This book deals with the development of private secondary schooling during the Second World War in Belgium It focuses on how the German occupier used education to gain acceptance of the regime and discusses the attitudes of Belgian education authorities schools teachers and pupils towards the German occupation Suggesting that the occupation forced Belgian education authorities such as the Roman Catholic Church to take certain positions the book explores the wartime experiences and memories of pupils and teachers It explains that the German Culture Department was relatively weak in establishing total control over education and that Catholic schools were able to maintain their education project during the war However the book also reveals that in some cases the German occupation did not need total control over education in order to find support for some authoritarian ideas As such Van Ruyskensvelde s analysis presents a nuanced view of the image of the Catholic Church schools teachers and pupils as mere victims of war

Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1 7 billion people or three quarters of the world s population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identify and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present
