Genetic Turning Points The Ethics Of Human Genetic Intervention:

Genetic Turning Points James C. Peterson, 2001-04-09 This timely volume clearly lays out the central ethical questions raised by today's rapid advances in biotechnology James Peterson sorts through the maze of clinical decisions occasioned by human genetic intervention organizing the range of moral considerations that now face us and exploring their practical impact on individuals families and communities The ethical questions are covered in the order of how soon the particular technologies that raise them are becoming available This unique format allows readers to go directly to issues of particular interest Peterson assumes no prior knowledge of genetics or ethics making his work one of the most accessible discussions of bioethics available today *Genetic Turning Points* James C. Peterson, 2001 Genetic Turning Points is an outstanding study of the problem of genetic engineering and related ethical issues It addresses difficult and sometimes technical matters in a style that is both clear and scholarly and it provides valuable insights into issues that are being thrust to the fore by scientific progress Genes store the directions for all life on earth If you want to know where we might be going read this book It is a road map that can save you from many ill fated journeys William R Shea *The Sacredness of Human Life* David P. Gushee, 2013-01-14 A comprehensive examination of the sacredness of human life encompassing biblical roots theological elaborations historical cases and contemporary ethical perspectives Gushee argues that viewing human life as sacred is one of the most precious legacies of biblical faith albeit one that the church has too often failed to uphold **Principles and Practice of Fertility Preservation** Jacques Donnez, S. Samuel Kim, 2011-02-03 The specialty of fertility preservation offers patients with cancer who are rendered infertile by chemo and radiotherapy the opportunity to realize their reproductive potential This gold standard publication defines the specialty The full range of techniques and scientific concepts is covered in detail and the author team includes many of the world's leading experts in the field The book opens with introductions to fertility preservation in both cancer and non cancer patients followed by cancer biology epidemiology and treatment and reproductive biology and cryobiology Subsequent sections cover fertility preservation strategies in males and females including medical surgical procedures ART cryopreservation and transplantation of both ovarian tissue and the whole ovary and in vitro follicle growth and maturation Concluding chapters address future technologies as well as ethical legal and religious issues Richly illustrated throughout this is a key resource for all clinicians specializing in reproductive medicine gynecology oncology hematology endocrinology and infertility What Does the Lord Require? Walter C. Kaiser Jr., Walter Christian Kaiser (Jr.), 2009-05 A trusted Bible teacher explores 18 key teaching passages that address relevant ethical questions of our day helping preachers and teachers train congregants to think biblically and ethically **Human Technological Enhancement and Theological Anthropology** Victoria Lorrimar, 2022-05-05 In this book Victoria Lorrimar explores anthropologies of co creation as a theological response to the questions posed by technologically enhanced humans a prospect that is disturbing to some but compelling for many The centrality the imagination for moral reasoning attested in

recent scholarship on the imagination offers a fruitful starting point for a theological engagement with these envisioned technological futures Lorrimar approaches the topic under the purview of a doctrine of creation that affirms a relationship between human and divine creativity Traditionally theological treatments of creativity have been almost exclusively applied to artistic endeavours Here Lorrimar breaks new ground by extending such theological accounts to include technology and uniting them with the strengths of scientific accounts of co creation She draws on metaphor studies cognitive sciences as well as literary studies to develop an account of human creativity in relation to divine creativity which is then applied to various enhancement scenarios

Fertility Preservation Jacques Donnez,S. Samuel Kim,2021-04-08 This new edition provides a much needed reference book to accommodate emerging and expanding knowledge in fertility preservation the rapidly growing field of reproductive medicine associated with advances in oncology Written by a team of world leading experts in the field and comprehensive in its scope the book covers the full range of techniques and scientific concepts in detail It opens with an introduction to fertility preservation in both cancer and non cancer patients followed by fertility preservation strategies in males and females including medical surgical procedures ART cryopreservation and transplantation of ovarian tissue and in vitro follicle culture Concluding chapters address new technologies as well as ethical legal and religious issues The book has been thoroughly updated includes additional contributors and now provides greater focus on practical and clinically relevant issues Richly illustrated throughout this is a key resource for clinicians specializing in reproductive medicine gynecology oncology hematology endocrinology and infertility

The Routledge Companion to Religion and Science James W. Haag, Gregory R. Peterson, Michael L. Spezio, 2012-03-12 The field of religion and science is one of the most exciting and dynamic areas of research today This Companion brings together an outstanding team of scholars to explore the ways in which science intersects with the major religions of the world and religious naturalism The collection provides an overview of the field and also indicates ways in which it is developing Its multicultural breadth and scientific rigor on topics that are and will be compelling issues in the first part of the twenty first century and beyond will be welcomed by students and scholars alike

Reflections on Bioethics Jose Antonio Morales-Gonzalez, Eugenia Aguilar Nájera, 2018-06-27 The book *Reflections on Bioethics* is an effort that brings together works grouped into five sections Bioethics and Health Bioethics and Education Bioethics and Technology Bioethics in the Use of Experimental Animals and Selected Topics of Bioethics In each of these sections the fundamental concepts of bioethics and their relationship with each of these branches of knowledge are covered The purpose is to give the reader a specific document of topics it is not intended to be a treaty because the study of any of the five sections is very broad However this is an effort that manages to combine in interdisciplinary subjects that are fundamental for professionals of all fields of knowledge

Whose View of Life? Jane Maienschein, 2009-07-01 Saving lives versus taking lives These are the stark terms in which the public regards human embryo research a battleground of extremes a war between science and ethics Such a simplistic dichotomy encouraged by vociferous opponents of abortion and proponents of medical research is precisely what Maienschein seeks to counter with this book

Christian Ethics in a Technological Age Brian Brock, 2010-06-28 Through close analysis of the historical and conceptual roots of modern science and technology Brian Brock here develops a theological ethic addressing a wide range of contemporary perplexities about the moral challenges raised by new technology

World Christianity Tan, Jonathan Y., Tran, Anh Q., 2016-04-13

At the Margins D. Gareth Jones, 2022-09-21 As a Christian who has functioned at the interface of biomedical science and faith for the whole of his professional life Gareth Jones is aware of the tensions and misunderstandings that frequently arise both inside and outside the church In this book he argues that Christians should not underestimate the importance of scientific contributions to an understanding of God's world He works this out by reference to his own experiences in approaching a number of contentious topics These include the use of embryos in reproductive technology research the place of vaccines in combatting viral pandemics like COVID 19 and understanding the gender debate Other examples he uses are the treatment of a genetic condition like cystic fibrosis and the importance of using only donated bodies for teaching and research in anatomy In working at these borderlands he recognizes that the best of biomedical science brings glory to God and enhances human existence All these areas are transformed by applying Christian values such as the dignity and equality of human beings Over the years he has learned how to be comfortable working in these borderlands even as they raise questions that trouble many

within both society and the churches **God and the Embryo** Brent Waters, Ronald Cole-Turner, 2003-07-22 Discussions and debates over the medical use of stem cells and cloning have always had a religious component But there are many different religious voices This anthology on how religious perspectives can inform the difficult issues of stem cell research and human cloning is essential to the discussion Contributors reflect the spectrum of Christian responses from liberal Protestant to evangelical to Roman Catholic The noted moral philosopher Laurie Zoloth offers a Jewish approach to cloning and Sondra Wheeler contributes her perspective on both Jewish and Christian understandings of embryonic stem cell research In addition to the discussions found here God and the Embryo includes a series of official statements on stem cell research and cloning from religious bodies including the Roman Catholic Church the Orthodox Church in America the United Methodist Church the Southern Baptist Convention the United Church of Christ the Presbyterian Church USA and the Union of Orthodox Jewish Congregations of America and the Rabbinical Council of America Human Cloning and Human Dignity An Ethical Inquiry from the statement of the President's Council on Bioethics concludes the book The debates and the discussions will continue but for anyone interested in the nuances of religious perspectives that make their important contributions to these ethically challenging and important dialectics God and the Embryo is an invaluable resource

ThirdWay, 2001-09 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture Voices in Disability and Spirituality from the Land Down Under Christopher Newell, 2014-06-11 An excellent source of information and ideas on the relationship between disability and spirituality and how to improve it This one of a kind collection explores the relationship between spirituality and disability from a variety of Australian religious and spiritual viewpoints Authors from a wide range of backgrounds some with disabilities some without draw remarkable insights from Christian Jewish Buddhist and even non religious spirituality These uniquely Australian perspectives provide practical and spiritual lessons that can be applied in any part of the world Voices in Disability and Spirituality from the Land Down Under presents an unflinching look at the shortcomings of many established church ministries when it comes to serving people with disabilities There's also an extraordinary interview with a severely disabled nonreligious woman in the final stage of her life and her caretaker which presents a very revealing look at the essence of human spirituality as it exists even in the absence of religious dogma In addition you'll find a revealing case study focusing on the Uniting Church in Australia UCA which looks at the gap between its official theology and its actual policy and practice and outlines a project designed to move the Church forward to more inclusive practices Additionally Voices in Disability and Spirituality from the Land Down Under Outback to Outfront examines why platitudes that are intended to give comfort like God has chosen this for you It's a test of your faith or We all have our crosses to carry are at best problematic and at worst damaging with suggestions for pastoral responses that offer alternatives to God is on your side click's the spiritual meaning and importance of community for people with disabilities and the impact of community on their vitality and resiliency the Buddhist teaching called sunyata or

emptiness and its potential to positively impact the lives of people with intellectual disabilities and those who know them wisdom contained in the ancient Jewish system of laws called Halacha and its potential for empowering people with disabilities today how a pastoral care program that is flexible accommodating and relevant for disabled people was created at a small metropolitan school in New South Wales and the effect of the program on the community the work of the Personal Advocacy Service which recruits volunteers to be companions to people with intellectual disabilities the role of religion and philanthropy in the creation of educational programs for blind or vision impaired students and more **Future Perfect?**

Celia Deane-Drummond, Peter Manley Scott, 2010-02-02 *Brave New World?* Celia Deane-Drummond, 2003-11-01 One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms The possibility of manipulating human genetics raises many theological ethical and socio political issues These include specific decisions about whether the technology will be developed how it will be applied and more general questions about the technical manipulation of natural processes From a theological perspective the human genome project not only challenges particular doctrines such as that of creation eschatology and anthropology but also raises particular issues of social justice and medical ethics The purpose of this book is to bring together the collective expertise of theologians scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project It is hoped that the results presented in this book offer a sophisticated theological and ethical response *The Interruption That We Are* Michael J. Hyde, 2018-09-10

In a world of ever increasing medical technology a study of the need for wisdom truth and public moral argument In this provocative and interdisciplinary work Michael J Hyde develops a philosophy of communication ethics in which the practice of rhetoric plays a fundamental role in promoting and maintaining the health of our personal and communal existence He examines how the force of interruption the universal human capacity to challenge our complacent understanding of existence is a catalyst for moral reflection and moral behavior Hyde begins by reviewing the role of interruption in the history of the West from the Big Bang to biblical figures to classical Greek and contemporary philosophers and rhetoricians to three modern thinkers Søren Kierkegaard Martin Heidegger and Emmanuel Levinas These thinkers demonstrate in various ways that interruption is not simply a heuristic tool but constitutive of being human After developing a critical assessment of these thinkers Hyde offers four case studies in public moral argument that illustrate the applicability of his findings regarding our interruptive nature These studies feature a patient suffering from heart disease a disability rights activist defending her personhood a young woman dying from brain cancer who must justify her decision against staunch opposition to opt for medical aid in dying and the benefits and burdens of what is termed our posthuman future with its accelerating achievements in medical science and technology These improvements are changing the nature of the interruption that we are yet the wisdom of such progress has yet to be determined Much more public moral argument is required Hyde's philosophy of communication ethics not only calls for the cultivation of wisdom but also promotes the fight for truth which is essential to

the livelihood of democracy
