Forensic Genetics in the Governance of Crime Helena Machado, Rafaela Granja, 2020-01-28 This open access book uses a critical sociological perspective to explore contemporary ways of reformulating the governance of crime through genetics Through the lens of scientific knowledge and genetic technology Machado and Granja offer a unique perspective on current trends in crime governance They explore the place and role of genetics in criminal justice systems and show how classical and contemporary social theory can help address challenges posed by social processes and interactions generated by the uses meanings and expectations attributed to genetics in the governance of crime Cutting edge methods and research techniques are also integrated to address crucial aspects of this social reality Finally the authors examine new challenges emerging from recent paradigm shifts within forensic genetics moving away from the construction of evidence as presented in court to the production of intelligence guiding criminal investigations

Law and the Human Body Rohan Hardcastle, 2007-09-18 Do you own your body Advances in science and the development of genetic databases have added an aura of modern controversy to this long standing and as yet unresolved problem In particular English law governing separated human tissue including

organs DNA and cell lines is unsatisfactory Despite the enactment of the Human Tissue Act 2004 UK it remains uncertain what property rights living persons can claim over tissue separated from their bodies The development of clear legal principles is necessary to protect the rights of individuals while also enabling the efficient use of such materials in medical research Part I of Law and the Human Body traces the evolution of English Australian United States and Canadian law in relation to human tissue separated from living persons and dead bodies This includes a comprehensive examination of the Human Tissue Act 2004 UK as well as prominent judicial decisions including Re Organ Retention Group Litigation 2005 QB 506 Colavito v New York Organ Donor Network Inc 8 NY 3d 43 NY CA 2006 and Washington University v Catalona 490 F 3d 667 8th Cir 2007 Analysis demonstrates that although property rights and non proprietary interests in separated human tissue are recognised in limited circumstances no principled basis has been accepted either at common law or by statute for the recognition of these rights and interests Part II of this book develops and defends a principled basis in English law for the creation and legal recognition of property rights and non proprietary interests in separated human tissue Significantly the analysis and principles presented in Law and the Human Body have application across common law and civil law jurisdictions worldwide Trames ,2004 **Trames** ,2007 **Trames** ,2004 **Populations and Genetics** Bartha Maria Knoppers,2003-01-01 Thirty five papers from the third International DNA Sampling Conference held in Montreal in September 2002 provide a critical discussion of the socio ethical and legal issues surrounding DNA sampling in communities and populations around the globe Contributors address topics related to biobanks and databases community engagement confidentialit **Trames** ,2007
