Genetically Modified Language The Discourse Of The Gm Debate:

Genetically Modified Language Guy Cook, 2004-11-04 The GM debate is as much a war of words as of facts Food and farming are being changed forever yet whether for good or bad is the subject of an increasingly bitter argument Those promoting GM have mounted an intense campaign characterising their opponents as terrorists and Luddites governed by ignorance irrationality and hysteria Yet public opinion remains unconvinced and antagonistic As the argument intensifies and the voices on all sides get louder *Genetically Modified Language* cuts through the confusion and controversy to the issues and ideology at the heart of the disagreement Guy Cook subjects the language of the case for GM to a careful and detailed examination He looks in turn at the persuasive strategies used by politicians scientists the media biotechnology corporations and supermarkets showing how their arguments mix together scientific commercial ethical and political criteria and are seldom as factual and straightforward as they claim Through analyses of recurrent words and phrases and of the constant comparisons made with other international issues he shows how the GM debate has become inseparable from the wider political conflicts of our time In a final chapter he turns to public reactions to all of the arguments Throughout this analysis the campaign for GM is seen as exemplifying disturbing trends in the contemporary use of language for public information Language which purports to seek clarity and neutrality and to be a vehicle for informed democratic debate is in fact achieving the opposite effects obscuring the issues and manipulating opinion Written in a clear accessible style and drawing on illustrative examples *Genetically Modified Language* is an insightful look at how language shapes our opinions

Genetically Modified Language Guy Cook, 2004-03 Examining the particular discourses of the key players in the arena Guy Cook presents a critical analysis of the language of the GM debate and how it influences policy and opinion *The GM Debate* Tom Horlick-Jones, 2007 This book tells the story of an unprecedented experiment in public participation the government sponsored debate on the possible commercialization of GM crops in the UK Giving a unique and systematic account of the debate process this revealing volume sets it within its political and intellectual contexts and examines the practical implications for future public engagement initiatives The authors an experienced team of researchers produce a conceptually informed and empirically based evaluation of the debate drawing upon detailed observation of both public and behind the scenes aspects of the process the views of participants in debate events a major MORI administered survey of public views and details of media coverage With innovative methodological work on the evaluation of public engagement and deliberative processes the authors analyze the design implementation and effectiveness of the debate process and provide a critique of its official findings The book will undoubtedly be of interest to a wide readership and will be an invaluable resource for researchers policy makers and students concerned with cross disciplinary aspects of risk decision making public engagement and governance of technology **NGO Discourses in the Debate on Genetically Modified Crops** Ksenia Gerasimova, 2017-07-20 The development and use of genetically modified organisms GMOs has been a contentious topic for

the last three decades While there have been a number of social science analyses of the issues this is the first book to assess the role of Non Governmental Organizations NGOs in the debate at such a wide geographic scale The various positions for and against GMOs particularly with regard to transgenic crops articulated by NGOs in the debate are dissected classified and juxtaposed to corresponding campaigns These are discussed in the context of key conceptual paradigms including nature fundamentalism and the organic movement post colonialism food sovereignty anti globalisation sustainability and feminism The book also analyses how NGOs interpret the debate and the persuasive communication tactics they use This provides greater understanding of the complexity of negotiations in the debate and explains its specific features such as its global scope and difficulty in finding compromises The author assesses the long term interests of various participants and changes in perceptions of science and in public communication as a result Examples of major NGOs such as Greenpeace Oxfam and WWF are included but the author also provides new research into the role of NGOs in Russia

Ethics and Practice in Science Communication Susanna Priest, Jean Goodwin, Michael F. Dahlstrom, 2018-03-07 From climate to vaccination stem cell research to evolution scientific work is often the subject of public controversies in which scientists and science communicators find themselves enmeshed Especially with such hot button topics science communication plays vital roles Gathering together the work of a multidisciplinary international collection of scholars the editors of *Ethics and Practice in Science Communication* present an enlightening dialogue involving these communities one that articulates the often differing objectives and ethical responsibilities communicators face in bringing a range of scientific knowledge to the wider world In three sections how ethics matters professional practice and case studies contributors to this volume explore the many complex questions surrounding the communication of scientific results to nonscientists Has the science been shared clearly and accurately Have questions of risk uncertainty and appropriate representation been adequately addressed And most fundamentally what is the purpose of communicating science to the public Is it to inform and empower Or to persuade to influence behavior and policy By inspiring scientists and science communicators alike to think more deeply about their work this book reaffirms that the integrity of the communication of science is vital to a healthy relationship between science and society today

Genetically Modified Foods Salah E. O. Mahgoub, 2016-04-19 An increasingly hot button issue genetically modified GM food is considered by some as the best way to feed the world's growing population and by others as an experiment gone wrong on the unsuspecting public *Genetically Modified Foods Basics Applications and Controversy* details the basics of biotechnology and its applications in the laborat

Governmentality Paul McIlvenny,Julia Zhukova Klausen,Laura Bang Lindegaard,2016-06-29 This volume brings together analyses of governmentality from different angles in order to explore the multiple forms practices modes programmes and rationalities of the conduct of conduct today Following the publication of Foucault s annual lecture series at the Coll ge de France scholars have attempted to critically rethink Foucault s ideas This is the first volume that attempts to revisit and expand studies of governmentality by connecting it to the theories and methods of discourse analysis The volume draws on different theoretical stances and methodological approaches including critical discourse analysis conversation analysis dialogic analysis multimodal discourse analysis the discourse historical approach corpus analysis and French discourse analysis The volume is relevant to students and scholars in the fields of critical discourse studies conversation analysis international studies environmental studies political science public policy and organisation studies **Cognitive Models in**
Language and Thought René Dirven,Roslyn Frank,Martin Pütz,2012-05-02 The volume offers a number of representative papers on cognitive models that are invoked when people deal with questions of social identity political and economic manipulation and more general issues such as the genomic discourse In line with the well known volume *Cultural Models in Language and Thought* by Holland and Quinn 1987 the volume shows that Cognitive Linguistics has further explored the idea that we think about social reality in terms of models cognitive cultural models or folk theories As in cultural models the present volume demonstrates that the technical apparatus of Cognitive Linguistics can be used to analyze the various ways our conception of social reality is shaped by underlying cognitive and or cultural models or patterns of thought and also looks into how this is done The new inroad the volume wants to pursue is the deliberate and explicit orientation towards a cognitive sociolinguistics or more generally a cognitive semiotics **Corpus-Assisted Ecolinguistics** Robert

Poole,2022-05-05 Corpus Assisted Ecolinguistics introduces and integrates key research concepts principles and techniques in ecolinguistics and corpus assisted discourse study answering foundational questions for researchers new to the discipline and asserting the urgent need to expand its scope Breaking new ground the book analyzes under explored environmental discourses that have a tangible impact on ecological wellbeing and sustainability by perpetuating harmful attitudes practices and ideologies Chapters present in depth case studies including an analysis of the evolving representations of wilderness an

eco stylistic analysis of a popular novel and an investigation of the use of humor in reports on animal escapes from slaughterhouses The studies employ a range of corpus analysis techniques to show how ecological degradation and crisis have become normalized and even trivialized in popular discourse but also spaces where positive discourse practices are present By applying tools from corpus linguistics to a diverse range of environmental discourses this book makes a significant contribution to advancing the field of ecolinguistics

Between Scientists & Citizens Jean Goodwin,2012 This volume brings together selected papers from an interdisciplinary conference focused on effective and appropriate communication of science in the often heated controversies characteristic of contemporary democracies The forty essays represent cutting edge work from rhetorical and communication theorists studying the practices and norms of public discourse and science communication philosophers interested in the informal logic of everyday reasoning and in the theory of deliberative democracy and science studies scholars examining the intersections between the social worlds of scientists and citizens Topics include the theory and practice of public participation exercises involving experts and lay publics communication techniques for conveying uncertainty complexity and scale pseudocontroversy and manufactured doubt about science and the maintenance of trust between scientists and citizens

Eco Crime and Genetically Modified Food Reece Walters,2010-10-04 The GM debate has been ongoing for over a decade yet it has been contained in the scientific world and presented in technical terms Eco Crime and Genetically Modified Food brings the debates about GM food into the social and criminological arena This book highlights the criminal and harmful actions of state and corporate officials It concludes that corporate and political corruption uncertain science bitter public opposition growing farmer concern and bankruptcy irreversible damage to biodiversity corporate monopolies and exploitation disregard for social and cultural practices devastation of small scale and local agricultural economies imminent threats to organics weak regulation and widespread political and biotech mistrust do not provide the bases for advancing and progressing GM foods into the next decade Yet with the backing of the WTO the US and UK Governments march on but at what cost to future generations

Science and Technology Education and Communication Maarten C. A. van der Sanden,Marc J. de Vries,2016-11-25 Science technology education on the one hand and communication on the other are to a large extent still separate worlds and many opportunities for synergy and cross fertilisation are yet unused This divide is unfortunate since educators need communication skills and communicators often use aspects of education in their strategies Moreover innovation processes in both domains ask for education and communication insights and skills Therefore scholars and practitioners in both domains must seek connections and synergy by exchanging insights and ideas This book discusses the shared aims of science technology education and communication such as science literacy and engagement as well as common processes and challenges such as social learning social design and professionalisation and assessment Aims processes and challenges that inspire enhance and deepen the education and communication synergy from a theoretical and practical side If one reads the

various chapters and reflects on them from one's own perspective as a scholar or practitioner the question is no longer if cross fertilisation and synergy are needed but when are we seriously going to take up this challenge together This book aims to initiate the dialogue that the situation in the development of the topic requires at this point *The Yearbook of European Environmental Law* Thijs Etty, Han Somsen, 2008-09-04 The Yearbook of European Environmental Law is a joint venture between leading academics practitioners and Community officials Academics and students will find a wealth of information in the stimulating and clearly written articles The well structured and reliable Annual Survey is specifically designed to provide easy access to the very latest developments in environmental law at the European level Separate parts of the Yearbook are devoted to important policy documents and reviews of books *Social Research Methods* Alan Bryman, 2016 Adopting a coherent and student friendly format this book offers an encyclopaedic introduction to social research methodology and considers a broad range of qualitative and quantitative methods to help students identify and evaluate the best approach for their research needs *Transforming food systems: ethics, innovation and responsibility* Donald Bruce, Ann Bruce, 2023-08-14 Feeding the world's growing population in ways that are effective ethical and socially just and protect the natural systems on which all life depends is one of the greatest challenges facing humanity It forms the theme of this book of papers of the 2022 Edinburgh conference of the European Society for Agricultural and Food Ethics EURSAFE The dramatic increases in the cost of energy scarcities in resources and people stemming from the COVID 19 pandemic and international conflict have brought home the vulnerability of our interlinked human systems at all levels Climate change poses deeper longer term threats Global competition drives fine tuned and efficient systems but time proven local practices may show better resilience in such uncertain futures The book reflects the sheer diversity of approaches and responses to these challenges across a wide range of academic disciplines provoking us to look at the issues in new ways They reflect the varied standpoints of producers retailers regulators farmers vets communities and citizens The challenge to reach net zero carbon is addressed in papers assessing livestock systems grasslands land use and rewilding food choices meat eating and alternatives Innovations such as genome editing uses of seaweed and the use of data pose both possibilities and challenges Animal ethics is a prominent theme with a range of papers on animal human relations animal use in research and veterinary ethics **Great Debates in American Environmental History** Brian Black, 2008 **Metaphors for Environmental Sustainability** Brendon Larson, 2011-06-07 Scientists turn to metaphors to formulate and explain scientific concepts but an ill considered metaphor can lead to social misunderstandings and counterproductive policies Brendon Larson observes in this stimulating book He explores how metaphors can entangle scientific facts with social values and warns that particularly in the environmental realm incautious metaphors can reinforce prevailing values that are inconsistent with desirable sustainability outcomes *Metaphors for Environmental Sustainability* draws on four case studies two from nineteenth century evolutionary science and two from contemporary biodiversity science to reveal how metaphors may shape the possibility of

sustainability Arguing that scientists must assume greater responsibility for their metaphors and that the rest of us must become more critically aware of them the author urges more critical reflection on the social dimensions and implications of metaphors while offering practical suggestions for choosing among alternative scientific metaphors
