Geneticist Who Played Hoops With My Dna:

The Geneticist Who Played Hoops with My DNA David Ewing Duncan, 2005-05-10 While the future of human existence is literally being forged by today's genetic scientists and biotechnology leaders the media policymakers ethicists and fellow scientists alike have not been adequately communicating this tremendous potential With the public only vaguely aware of what is happening a new coterie of geniuses tinkers tycoons and genetic soothsayers are for better or worse about to alter life on earth forever Now journalist David Ewing Duncan has written a narrative about science and personality delving into stem cell research cloning bioengineering extending life span and genetics by telling the stories of the characters at the fulcrum of the science Calling to mind age old stories and myths Prometheus Faustus Eve and Frankenstein Duncan asks the question Can we trust these scientists From publisher description

The Geneticist Who Played Hoops with My DNA David Ewing Duncan, 2005 Combining myth biography and wit this is a highly original depiction of cutting edge science and its profound implications told through the scientists who are rewriting life on earth *A Life Decoded* J. Craig Venter, 2007-10-18 The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century perhaps none can match the deciphering of the human genetic code both for its technical brilliance and for its implications for our future In *A Life Decoded* J. Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today Here Venter relates the unparalleled drama of the quest to decode the human genome a goal he predicted he could achieve years earlier and more cheaply than the government sponsored Human Genome Project and one that he fulfilled in 2001 A thrilling story of detection *A Life Decoded* is also a revealing and often troubling look at how science is practiced today

Masterminds David Ewing Duncan, 2009-10-06 James Watson J. Craig Venter Francis Collins Cynthia Kenyon you may not know them but you should They are the masterminds of genetics and biotechnology who want you to live to be 150 years old to regenerate your heart and brain to create synthetic life For better or worse they are about to alter life on earth forever Award winning journalist David Ewing Duncan tells the remarkable stories of cutting edge bioscientists revealing their quirky uniquely fascinating sometimes vaguely unsettling personas as a means to understand their science and the astonishing implications of their work This book seamlessly combines myth biography scholarship and wit that poses the all important question Can we actually trust these masterminds

The Promethean Illusion Bob Tostevin, 2014-01-10 This book explores two contradictory realities our continuing belief that nature is subject to our willful control and nature's refusal to abide by this belief It investigates particular aspects of modern science and spotlights the impact Newtonian science had upon the Western world It then critically assesses twentieth century developments in science presenting a number of biological and ecological case studies that document the various limitations that the natural world places upon human knowledge The analysis argues against programmatic proposals to control nature via genetic engineering and planet management *Gene Jockeys* Nicolas

Rasmussen,2014-05-15 The scientific scramble to discover the first generation of drugs created through genetic engineering The biotech arena emerged in the 1970s and 1980s when molecular biology one of the fastest moving areas of basic science in the twentieth century met the business world Gene Jockeys is a detailed study of the biotech projects that led to five of the first ten recombinant DNA drugs to be approved for medical use in the United States human insulin human growth hormone alpha interferon erythropoietin and tissue plasminogen activator Drawing on corporate documents obtained from patent litigation as well as interviews with the ambitious biologists who called themselves gene jockeys historian Nicolas Rasmussen chronicles the remarkable and often secretive work of the scientists who built a new domain between academia and the drug industry in the pursuit of intellectual rewards and big payouts In contrast to some who critique the rise of biotechnology Rasmussen contends that biotech was not a swindle even if the public did pay a very high price for the development of what began as public scientific resources Within the biotech enterprise the work of corporate scientists went well beyond what biologists had already accomplished within universities and it accelerated the medical use of the new drugs by several years In his technically detailed and readable narrative Rasmussen focuses on the visible and often heavy hands that construct and maintain the markets in public goods like science He looks closely at how science follows money and vice versa as researchers respond to the pressures and potential rewards of commercially viable innovations In biotechnology many of those engaged in crafting markets for genetically engineered drugs were biologists themselves who were in fact trying to do science This book captures that heady fleeting moment when a biologist could expect to do great science through the private sector and be rewarded with both wealth and scientific acclaim Cloning Tina Kafka,2007-12-14 In nature clones occur naturally in plants but not in animals According to the National Human Genome Research Institute animals must be scientifically manipulated through different processes to create an identical copy of the genetic material known as cloning This thought provoking volume explores the history of cloning the ethical issues it raises where research may lead it in the future and cloning s role in curing diseases creating custom organs improving food and saving animals *The Art of Woo* G. Richard Shell,Mario Moussa,2007-10-18 You may need The Art of War to defeat your enemies but if you prefer to win them over read The Art of Woo G Richard Shell and Mario Moussa know what it takes to drive new ideas through complex organizations They have advised thousands of executives from companies such as Google Microsoft and General Electric to organizations like the World Bank and even the FBI s hostage rescue training program In The Art of Woo they present their systematic four step process for winning over even the toughest bosses and most skeptical colleagues Beginning with two powerful self assessments to help readers find their Woo IQ they show how relationship based persuasion works to open hearts and minds Ranging across history from Charles Lindbergh to Sam Walton the authors examine how savvy negotiators use persuasion not confrontation to achieve goals U S News World Report Beyond Technocracy Massimiano Bucchi,2009-06-02 Nuclear energy stem cell technology GMOs the more science advances the more society seems to resist

But are we really watching a death struggle between opposing forces as so many would have it Can today's complex technical policy decisions coincide with the needs of a participatory democracy Are the two sides even equipped to talk to each other Beyond Technocracy Science Politics and Citizens answers these questions with clarity and vision Drawing upon a broad range of data and events from the United States and Europe and noting the blurring of the expert lay divide in the knowledge base the book argues that these conflicts should not be dismissed as episodic or the outbursts of irrationality and ignorance but recognized as a critical opportunity to discuss the future in which we want to live Massimiano Bucchi's analysis covers the complex realities of post academic science as he Explores the widely debated theme of science and democracy across a broad range of technological controversies Overviews issues raised by the current relationship among scientists policymakers business interests and the public Dispels stereotypes of the detached scientific community versus the uninformed general public Examines the role of the media in framing scientific debate Addresses the question of how to move beyond technocracy to a more fruitful collaboration between scientists and citizens Offers a bold vision for a future in which the scientific and public spheres regard each other as partners working toward a shared purpose Beyond Technocracy Science Politics and Citizens has great value as a postgraduate text for courses in technology and society political science and science policy It will also find an interested audience among scientists policymakers managers in the technological sector and concerned lay readers *Simple Solutions for Humanity* Patrick Kenji Takahashi, 2008-02-29 Book 1 SIMPLE

SOLUTIONS for Planet Earth dealt with energy and the environment SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond Ever wonder if there could ever be a way to end crime and war forever or the prospects for immortality or a better educational system or the reality of extraterrestrial intelligence or the future of religion If all the above can be satisfactorily resolved then just in case there is no afterlife where is the best place to live on Earth today Simple solutions of course are hardly that How to end crime What about three strikes and you're dead Sure this should work but it's not morally rational The solution to war is incredibly simple Just read the book and find out how Scientists are getting very close to determining a way to disarm our aging gene When will this happen Our educational system is flawed Be prepared to be shocked by the Stanford Marshmallow Study Then find out that our terrible student scores relative to the developed world might not be worth all the anguish The USA will prevail because of our superiority in Could the solution for world peace or curing cancer be streaming in from space The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF A Golden Evolution is suggested Are you one of those who largely wasted your life looking out only for yourself family and friends Could there be a higher calling You too can make a positive difference Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity Post-Traditional Public Administration Theory David John Farmer, 2021-03-23 This book describes what is argued to be the most effective way of

doing public administration thinking Its aim is to encourage governments to govern fundamentally better in terms of policy and administration A better understanding of context and identities imaginization epistemic pluralism anti administration and the context of economics are examples of what is critical for high effectiveness The pieces included in this book have been handpicked from the vast academic collection that David Farmer has authored over the last thirty years and which were published in the Journal of Administrative Theory and Praxis and the Journal of Public Administration Education Collectively these chapters are intended to help governments use post traditional public administration theory in order to achieve better praxis

A to Z of Women in Science and Math Lisa Yount,2007 From ancient times to the present day scientifically inclined women in many cultures have had to battle against the traditional belief that men are more cognitively adept than women At times throughout history women were persecuted for their attempts to break down traditional gender barriers Today women scientists and mathematicians must continue to defend the quality of their work and demand the respect they deserve in the mathematical and scientific communities A to Z of Women in Science and Math Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles Among the profiles included are those of chemists astronomers geologists environmental scientists and a range of other professions and careers In addition new photographs have been added and the bibliography has been updated Subject indexes allow the reader to search by such professions as microbiology and paleontology Additional subject indexes organize individuals by country of birth country of major scientific activity and year of birth

Neuroscience and Social Work Practice Rosemary L. Farmer,2008-12-17 Over the past 30 years findings in the neurosciences have grown exponentially and have provided a profound understanding of the link between behavior and biology Although the Social Work community has long taken pride in using a bio psycho social spiritual BPSS framework in conceptualization and intervention the biological aspect of this BPSS framework has been sorely missing Neuroscience and Social Work Practice provides the critical missing link Introducing the latest neuroscience research it gives practitioners essential data in an easily accessible form with which to take on the challenges of increasingly complex human problems and diagnoses Key Features Takes readers on a tour of the brain and makes dense scientific material more engaging Provides a framework for how human service professionals can understand and implement neuroscience clinical data with the use of the Transactional Model Uses case vignettes to explain how neuroscience findings have been applied to specific practice situations Offers a deeper understanding of the links between neuroscience research and social work in such areas as trauma attachment psychotherapy substance abuse and the effects of psychotropic medications Intended Audience This cutting edge text is indispensable for practitioners in the human services field and is an essential supplement for upper level undergraduate or graduate students of courses in Human Behavior in the Social Environment and Social Work Direct
