year old computer science professor who didn't drive and didn't fly because he could no longer sit down but still made his way across North America for the moment that would define a new age of technology The other was a thirty six year old neuroscientist and chess prodigy who laid claim to being the greatest game player of all time before vowing to build a machine that could do anything the human brain could do They took two very different paths to that lofty goal and they disagreed on how quickly it would arrive But both were soon drawn into the heart of the tech industry Their ideas drove a new kind of arms race spanning Google Microsoft Facebook and OpenAI a new lab founded by Silicon Valley kingpin Elon Musk But some believed that China would beat them all to the finish line Genius Makers dramatically presents the fierce conflict between national interests shareholder value the pursuit of scientific knowledge and the very human concerns about privacy security bias and prejudice Like a great Victorian novel this world of eccentric brilliant often unimaginably yet suddenly wealthy characters draws you into the most profound moral questions we can ask And like a great mystery it presents the story and facts that lead to a core vital question How far will we let it go Animal Knowledge Genius DK,2021-10-19 Can you spot the difference between an ostrich and an emu and a leopard and an ocelot You can Then what are you waiting for Take on this brain busting nature challenge With more than 60 topics from across the natural world there's something for everyone The pages are packed with eye popping pictures but do you know what they show To help you Test Yourself panels list what you're looking for With three levels of difficulty the challenge gets harder as you work your way from Starter to Challenger and finally the truly tricky Genius category If you need it there's a fun fact with every picture to give a helpful clue Open the pages of Animal Knowledge Genius to find out what you know and challenge yourself to learn even more *Sparks of Genius* Robert Root-Bernstein, Michèle Root-Bernstein, 2013-08-26 Discover the cognitive tools that lead to creative thinking and problem solving with this well written and easy to follow guide Library Journal Explore the thinking tools of extraordinary people from Albert Einstein and Jane Goodall to Mozart and Virginia Woolf and learn how you can practice the same imaginative skills to become your creative best With engaging narratives and examples Robert and Michèle Root Bernstein investigate cognitive tools such as observing recognizing patterns modeling playing and more Sparks of Genius is a clever detailed and demanding fitness program for the creative mind and a groundbreaking guidebook for anyone interested in imaginative thinking lifelong learning and transdisciplinary education Kirkus Reviews How different the painter at the easel and the physicist in the laboratory Yet the Root Bernsteins recognize the deep down similarity of all creative thinking whether in art or science They demonstrate this similarity by comparing the accounts that various pioneers and inventors have left of their own creative processes for Picasso just as for Einstein for Klee just as for Feynman the creative impulse always begins in vision in emotion in intuition With a lavishly illustrated chapter devoted to each tool readers quickly realize just how far the imagination can stretch Booklist A powerful book Sparks of Genius presents radically different ways of approaching problems American Scientist *The Medical Genius* Stacy Jones, 1912 **Genius Heaven**
