Genocide An Anthropological Reader:

Genocide Alexander Hinton, 2002 Drawing on interdisciplinary sources the text looks back over the genocide of the 20th century to imagine ways of preventing or minimising future atrocities **Genocide** Alexander Laban Hinton, 2002

Annihilating Difference Alexander Laban Hinton, 2002-08-15 Genocide is one of the most pressing issues that confronts us today Its death toll is staggering over one hundred million dead Because of their intimate experience in the communities where genocide takes place anthropologists are uniquely positioned to explain how and why this mass annihilation occurs and the types of devastation genocide causes This ground breaking book the first collection of original essays on genocide to be published in anthropology explores a wide range of cases including Nazi Germany Cambodia Guatemala Rwanda and Bosnia **The Oxford Handbook of Genocide Studies** Donald Bloxham, A. Dirk Moses, 2010-04-15 Genocide has scarred

human societies since Antiquity In the modern era genocide has been a global phenomenon from massacres in colonial America Africa and Australia to the Holocaust of European Jewry and mass death in Maoist China In recent years the discipline of genocide studies has developed to offer analysis and comprehension The Oxford Handbook of Genocide Studies is the first book to subject both genocide and the young discipline it has spawned to systematic in depth investigation Thirty four renowned experts study genocide through the ages by taking regional thematic and disciplinary specific approaches Chapters examine secessionist and political genocides in modern Asia Others treat the violent dynamics of European colonialism in Africa the complex ethnic geography of the Great Lakes region and the structural instability of the continent s northern horn South and North America receive detailed coverage as do the Ottoman Empire Nazi occupied Europe and post communist Eastern Europe Sustained attention is paid to themes like gender memory the state culture ethnic cleansing military intervention the United Nations and prosecutions The work is multi disciplinary featuring the work of historians anthropologists lawyers political scientists sociologists and philosophers Uniquely combining empirical reconstruction and conceptual analysis this Handbook presents and analyses regions of genocide and the entire field of genocide studies in one substantial volume Genocide Adam Jones, 2006-09-27 An invaluable introduction to the subject of genocide explaining its history from pre modern times to the present day with a wide variety of case studies Recent events in the former Yugoslavia Rwanda East Timor and Iraq have demonstrated with appalling clarity that the threat of genocide is still a major issue within world politics The book examines the differing interpretations of genocide from psychology sociology anthropology and political science and analyzes the influence of race ethnicity nationalism and gender on genocides In the final section the author examines how we punish those responsible for waging genocide and how the international community can prevent further bloodshed *The Pharmaceutical Studies Reader* Sergio Sismondo, Jeremy A. Greene, 2015-05-11 The

Pharmaceutical Studies Reader is an engaging survey of the field that brings together provocative multi disciplinary scholarship examining the interplay of medical science clinical practice consumerism and the healthcare marketplace Draws

on anthropological historical and sociological approaches to explore the social life of pharmaceuticals with special emphasis on their production circulation and consumption Covers topics such as the role of drugs in shaping taxonomies of disease the evolution of prescribing habits ethical dimensions of pharmaceuticals clinical trials and drug research and marketing in the age of globalization Offers a compelling contextually rich treatment of the topic that exposes readers to a variety of approaches ideas and frameworks Provides an accessible introduction for readers with no previous background in this area

Genocide, 2020-12-15 In 1948 the United Nations established the Genocide Convention to legally define genocide as actions intended to destroy a particular group of people based on race religion ethnicity and other defining characteristics The goal was to prevent and punish future acts of genocide but a number of mass killings have followed since its establishment and in some situations whether these executions qualify as genocides is surprisingly unclear The viewpoints in this volume explore what genocide is and isn't and provide historical and contemporary examples of genocide Readers will examine potential political and social solutions to prevent future genocides **The Responsibility to Prevent** Serena K. Sharma, Jennifer M. Welsh, 2015-08-20 Among the constitutive elements of the responsibility to protect R2P prevention has been deemed by many as the most important Drawing on contributions from an international group of academics and practitioners this book seeks to improve our knowledge of how to operationalize the responsibility to prevent genocide crimes against humanity war crimes and ethnic cleansing The central argument is that the responsibility to prevent should be conceptualized as crimes prevention The first part of the volume develops a strategic framework which includes identifying the appropriate scope and substance of R2Ps preventive dimension and distinguishing between systemic and targeted approaches The second section examines some of the tools that can be used and have been used to prevent the escalation of dynamics towards the commission of atrocity crimes tools such as sanctions mediation international criminal justice and the use of military means as well as the operational challenges that tend to obstruct global efforts to prevent such crimes The third and final section draws lessons from actual cases of preventive action both historical and recent about the relative success of particular tools and approaches As the first edited collection of its kind devoted exclusively to the preventive dimension of R2P **The Responsibility to Prevent** intends to inform and shape the growing debate on how to approach atrocity crime prevention and how to build the capacities needed to implement the imperatives at the heart of R2P **Ideology and Mass Killing** Jonathan Leader Maynard, 2022-05-26 In research on mass killings such as genocides and campaigns of state terror the role of ideology is hotly debated For some scholars ideologies are crucial in providing the extremist goals and hatreds that motivate ideologically committed people to kill But many other scholars are sceptical contending that perpetrators of mass killing rarely seem ideologically committed and that rational self interest or powerful forms of social pressure are more important drivers of violence than ideology In **Ideology and Mass Killing** Jonathan Leader Maynard challenges both these prevailing views advancing an alternative neo ideological perspective which systematically retheorises

the key ideological foundations of large scale violence against civilians Integrating cutting edge research from multiple disciplines including political science political psychology history and sociology Ideology and Mass Killing demonstrates that ideological justifications vitally shape such violence in ways that go beyond deep ideological commitment Most disturbingly of all the key ideological foundations of mass killings are found to lie not in extraordinary political goals or hatreds but in radicalised versions of those conventional widely accepted ideas that underpin the politics of security in ordinary societies across the world This study then substantiates this account by a detailed examination of four contrasting cases of mass killing Stalinist Repression in the Soviet Union between 1930 and 1938 the Allied Bombing Campaign against Germany and Japan in World War II from 1940 to 1945 mass atrocities in the Guatemalan Civil War between 1978 and 1983 and the Rwandan Genocide in 1994 This represents the first volume to offer a dedicated comparative theory of ideology s role in mass killing while also developing a powerful new account of how ideology affects violence and politics more generally

A Companion to Psychological Anthropology Conerly Casey, Robert B. Edgerton, 2008-04-15 This Companion provides the first definitive overview of psychocultural anthropology a subject that focuses on cultural psychological and social interrelations across cultures Brings together original essays by leading scholars in the field Offers an in depth exploration of the concepts and topics that have emerged through contemporary ethnographic work and the processes of global change Key issues range from studies of consciousness and time emotion cognition dreaming and memory to the lingering effects of racism and ethnocentrism violence identity and subjectivity

Atrocity Labelling Markus P. Beham, 2022-11-03 Atrocity Genocide War crime Crime Against Humanity Such atrocity labels have been popularized among international lawmakers but with little insight offered into how and when these terms are applied and to what effect What constitutes an event to be termed a genocide or war crime and what role does this play in the application of legal proceedings Markus P Beham through an interdisciplinary and comparative approach unpicks these terms to uncover their historical genesis and their implications for international criminal law initiatives concerned with atrocity The book uniquely compares four specific case studies Belgian colonial exploitation of the Congo atrocities committed against the Herero and Nama in German South West Africa the Armenian genocide and the man made Ukrainian famine of the 1930s Encompassing international law legal history and discourse analysis the concept of atrocity labelling is used to capture the meaning underlying the work of international lawyers and prosecutors historians and sociologists agenda setters and policy makers

Genocide Studies Jeffrey S. Bachman, 2024-10-11 In recent years the world has been shaken by numerous events that have caused and continue to cause massive human suffering from the COVID 19 pandemic to intrastate

and interstate armed conflicts Moreover climate change continues to plow ahead contributing to growing tensions population movements and resource scarcity Meanwhile the methods by which groups and group life are threatened and the means by which violence is incited and perpetrated continue to evolve Such divergent crises even when they overlap or intersect confound definition and label This book seeks not to answer the question What is genocide but rather What is genocide studies When Raphael Lemkin coined the term genocide in 1944 he could not have foreseen what the world would look like today Now is the time to think about current manifestations of genocide and those likely to emerge in the future **Living Legacies of Social Injustice** Chris Beasley,Pam Papadelos,2023-08-14 Through a wide range of international and interdisciplinary case studies this book develops the notion of legacy and in particular living legacy that is it explores power relations in the context of time as a means to considering and challenging social injustice Legacies of social injustice are very frequently erased denied or declared redundant Framed by the concept of legacy this book does not conceive legacy as simply referring to relics of the past or to cultural heritage practices and artifacts Instead the book focuses upon living legacies understood as ongoing actively engaged in the re constitution of power relations and influential in the development of alternative political imaginaries Through a variety of studies from many different contexts including Indigenous trauma in Australia displacement in Beirut women travellers in Scotland and heteronormativity in Hollywood the book draws not only upon historiographic sociological legal political cultural and other disciplinary approaches but also specifically makes use of feminist and postcolonial perspectives Foregrounding the legacies of inequality and marginalisation it contributes to a re thinking of power and social change in ways that together suggest potential means for unsettling and reimagining such legacies This book will appeal to an interdisciplinary range of readers with interests and concerns in the broad area of social justice but especially to those working in sociolegal studies sociology gender studies indigenous studies and politics

Critical Criminology in Canada Aaron Doyle,Dawn Moore,2011-01-01 Canada s criminal justice landscape has been shaped by contrary trends in recent years As the crime rate declines policy makers continue to push for tough on crime legislation and university criminology programs continue to expand Given these trends what does the future hold for criminology and criminal justice This book presents the work of a new generation of critical criminologists who explore the geographical institutional and political context of the discipline in Canada Breaking away from mainstream criminology and popular law and order discourses the authors present a spectrum of theoretical approaches to criminal justice from governmentality to feminist criminology from critical realism to anarchism and they propose novel approaches to topics such as genocide white collar crime and the effect of prison sentences on families By posing crucial questions and attempting to define what criminology should be this book will shape debates about crime policing and punishment for years to come

Histories of the Holocaust Dan Stone,2010-06-17 The Holocaust is one of the most intensively studied phenomena in modern history The volume of writing that fuels the numerous debates about it is overwhelming in quantity and diversity Even those who have dedicated their professional lives to understanding the Holocaust cannot assimilate it all There is then an urgent need to synthesize and evaluate the complex historiography on the Holocaust exploring the major themes and debates relating to it and drawing widely on the findings of a great deal of research Concentrating on the work of the last two decades Histories of the Holocaust examines the Final Solution as a European project the decision making process perpetrator research plunder and collaboration regional studies ghettos camps race science antisemitic ideology and recent debates concerning modernity organization theory colonialism genocide studies and cultural history Research on victims is discussed but Stone focuses more closely on perpetrators reflecting trends within the historiography as well as his own view that in order to understand Nazi genocide the emphasis must be on the culture of the perpetrators The book is not a history of the history of the Holocaust offering simply a description of developments in historiography Stone critically analyses the literature discerning major themes and trends and assessing the achievements and shortcomings of the various approaches He demonstrates that there never can or should be a single history of the Holocaust and facilitates an understanding of the genocide of the Jews from a multiplicity of angles An understanding of how the Holocaust could have happened can only be achieved by recourse to histories of the Holocaust detailed day by day accounts of high level decision making long term narratives of the Holocaust s relationship to European histories of colonialism and warfare micro historical studies of Jewish life before during and after Nazi occupation and cultural analyses of Nazi fantasies and fears Encyclopedia of Geography Barney Warf,2010-09-21 Simply stated geography studies the locations of things and the explanations that underlie spatial distributions Profound forces at work throughout the world have made geographical knowledge increasingly important for
