Kossler, Sonya Prestridge, 2011-08-17 This is a book about leading dispersed teams teams that are made up of people who don't work in the same geographical area Such teams don't often meet face to face Usually their members are separated by time and distance and they often bring different cultural views to bear on their work Solving potential communication problems and devising processes for making decisions and managing conflict are challenges for leaders of dispersed teams But before they can address those challenges they need to analyze the support such a team will get from the organization as a whole Dispersed teams are a necessary strategic work unit in a world that continues to grow more interconnected every day Guiding them to their full potential is a difficult

How to Launch a Team Center for Creative Leadership (CCL), Kim Kanaga, Sonya Prestridge, 2011-09-07 When an organization sponsors a team, it's usually to address a challenge deemed essential to organizational success. Meeting that challenge might mean implementing new ways of working, entering new markets or developing a new product. Teams can produce innovative solutions, but leading them toward that goal can be difficult. Getting the team off on the right foot is critical to its success. To launch a team in a way that increases its chance of success, managers and team leaders should pay attention to four critical points: setting purpose and direction, defining roles and responsibilities, designing procedures and practices, and building cooperation and relationships. Understanding and implementing these elements is key to a successful launch and, in the end, essential to a team's achieving the organization's goals. *Leader Development for Transforming Organizations* David V. Day, Stephen J. Zaccaro, Stanley M. Halpin, 2004-04-12 This book examines numerous topic areas that are considered to be especially relevant for making a strategic leader development investment. The topics covered are areas that have theoretical and empirical connections to important aspects of growth, change, adult development, and underlying abilities, skills, and competencies needed to lead effectively in times of great complexity. In addition, these are investment areas identified by the U.S. Army, a world-class organization faced with the need for radical transformation as particularly relevant for success and survival. This book identifies key concerns in developing leaders and leadership and in transforming organizations to better meet the challenges of a complex world. There are two aspects of this book that distinguish it from the numerous existing volumes on leadership in the scholarly and popular press literatures. Most important, the overarching focus of the present book is on development. There are many offerings on the topic of leadership, but relatively few that focus on leader development, especially from a scholarly/academic perspective. Also, this volume offers a unique perspective in examining those underlying psychological competencies and processes that are viewed as especially relevant for leader development. The chapters that are collected in this edited volume were originally commissioned by the U.S. Army Research Institute as white papers to better help Army officers and researchers understand important issues in leader development. The present organization of the papers is around four central themes: a) Accelerating Leader Development, b) Cognitive Skills

Selecting International Executives Manuel London, Valerie I. Sessa, 1999. Organizations looking to establish and maintain a proactive global presence have executive selection requirements that go beyond traditional leadership skills. These requirements also include cross cultural experience in negotiating, developing and maintaining partnerships with other businesses worldwide. Because the globalization of organizations is relatively new, little is known about how to identify and select executives who have the skills to operate effectively in a global environment. This book for practitioners and human resources professionals summarizes the most current information about the skills needed to successfully lead a global organization and defines a framework for identifying executives who possess those skills.
