**Employability and Local Labour Markets** Ronald W. McQuaid, Anne E. Green, Mike Danson, 2013-10-18 The concept of employability has provided a foundation for much current labour market policy It has also provided a useful framework for analyzing national and urban labour markets and related policies in a variety of different circumstances both for those in and out of work The papers in this book help progress the concept of employability demonstrating the importance of the geographic and spatial context and showing its flexibility and usefulness as a basis for theory analysis and policy The papers are divided into two main sections understanding the concept of employability lessons for labour market policy in changing

labour markets The chapters also provide general insights into many current labour market policy debates As employability continues to be the foundation of many labour market policies this volume considers the economic and geographical dimensions of employability in local labour market analysis and policy This book was previously published as a special issue of the journal Urban Studies

**Planning Sustainable Transport** Barry Hutton, 2013-06-19 Transport choices must be transformed if we are to cope with sustainability and climate change but this can only be done if we understand how complex transport systems work Straightforward choices are never made between one transport mode and another door to door movements of both people and freight use combinations of different modes of transport This book offers a cross disciplinary overview of transport systems and the ways in which they interact with urban and regional planning decisions and environmental issues It offers a thoughtful critique of existing methodology and policy raising issues providing facts explaining linkages and particularly stimulating debate The book methodically explores the definitions trends problems objectives and policies of transport planning In particular the author looks at land use as a major determinant of the nature and extent of the demand for transport concluding that the management of land use has to be a key element of any sustainable transport policy Planning Sustainable Transport will be essential reading for today's transport specialists planners and property developers It will also be useful to postgraduate students in planning and related disciplines

*Geographies of Agriculture* Guy Robinson, 2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development
