Economy Ron Martin, 2017-11-30 Economic geographers have always argued that space is key to understanding the economy that the processes of economic growth and development do not occur uniformly across geographic space but rather differ in degree and form as between different nations regions cities and localities with major implications for the geographies of wealth and welfare This was true in the industrial phase of global capitalism and is no less true in the contemporary era of post industrial knowledge driven global capitalism Indeed the marked changes occurring in the structure and operation of the economy in the sources of wealth creation in the organisation of the firm in the nature of work in the boundaries between market and state and in the regulation of the socio economy have stimulated an unprecedented wave of theoretical conceptual and empirical enquiry by economic geographers Even economists who traditionally have viewed the economy in non spatial terms as existing on the head of the proverbial pin are increasingly recognising the importance of space place and location to understanding economic growth technological innovation competitiveness and globalisation This collection of previously published work though containing but a fraction of the huge explosion in research

and publication that has occurred over the past two decades seeks to convey a sense of this exciting phase in the intellectual development of the discipline and its importance in grasping the spatialities of contemporary economic life

*Socio-Economic Models in Geography (Routledge Revivals)* Richard Chorley, Peter Haggett, 2013-10-14 First published in 1968 this book explores the theme of geographical generalization or model building It is composed of seven of the chapters from the original *Models in Geography* published in 1967 The first chapter broadly outlines this theme and examines the nature and function of generalized statements ranging from conceptual models to scale models in a geographical context The following six chapters deal with socio economic building in geography They focus on demographic and sociological models as well as looking at special aspects of models in human geography in reference to economic development urban geography and settlement location industrial location and agricultural activity This book represents a robustly anti idiographic statement of modern work in one of the major branches of geography

**Reshaping Economic Geography in East Asia** Yukon Huang, Alessandro Magnoli Bocchi, 2008-10-15 This companion volume to the World Development Report 2009 comprises twenty papers authored by noted Asian scholars These studies highlight how throughout East Asia spatial considerations have influenced Government policies at the national regional and local levels Key themes include how countries have dealt with 1 agglomeration economies urbanization and regional disparities 2 improving connectivity with infrastructure investments and 3 eliminating barriers across and within countries to favor the movement of labor goods and services Achievements vary widely across countries while some succeeded in enhancing competitiveness and improving social outcomes others are experiencing increasing inequalities and failures to spur growth in disadvantaged areas The book highlights many examples of how the new economic geography is reshaping development objectives from initiatives to foster growth via enhanced agglomeration and improved local connectivity to the world economy to special decentralization programs that channel resources to lagging regions This volume will be of great interest to readers working in the areas of economic policy poverty reduction and urban rural development strategies and transport led infrastructure policy

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, 2016-07-15 Actors and institutions in localities and regions across the world are seeking prosperity and well being amidst tumultuous and disruptive shifts and transitions generated by an increasingly globalised knowledge intensive capitalism global financial instability volatility and crisis concerns about economic social and ecological sustainability climate change and resource shortages new multi actor and multi level systems of government and governance and a re ordering of the international political economy state austerity and retrenchment and new and reformed approaches to intervention policy and institutions for local and regional development *Local and Regional Development* provides an accessible critical and integrated examination of local and regional development theory institutions and policy in this changing context Amidst its rising importance the book addresses the fundamental issues of what kind of local and regional development and for whom its purposes principles and values

frameworks of understanding approaches and interventions and integrated approaches to local and regional development throughout the world The approach provides a theoretically informed critical analysis of contemporary local and regional development in an international and multi disciplinary context grounded in concrete empirical analysis from experiences in the global North and South It concludes by identifying what might constitute holistic inclusive progressive and sustainable local and regional development and reflecting upon its limits and political renewal
