Imperatore,1978 Regional Development: Theory and Practice Baleshwar Thakur,H.S. Sharma,Suresh Misra,S. Chattopadhyay,Surendra Singh,2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular

These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints

Area Studies at the Crossroads Katja Mielke, Anna-Katharina Hornidge, 2017-02-28 In this pioneering volume leading scholars from a diversity of backgrounds in the humanities social sciences and different area studies argue for a more differentiated and self reflected role of area based science in global knowledge production Considering that the mobility of people goods and ideas make the world more complex and geographically fixed categories increasingly obsolete the authors call for a reflection of this new dynamism in research teaching and theorizing The book thus moves beyond the constructed divide between area studies and systematic disciplines and instead proposes methodological and conceptual ways for encouraging the integration of marginalized and often overseen epistemologies Essays on the ontological theoretical and pedagogical dimension of area studies highlight how people s everyday practices of mobility challenge scholars students and practitioners of inter and transdisciplinary area studies to transcend the cognitive boundaries that scholarly minds currently operate in
