Geolinguistics Language Dynamics And Ethnolinguistic Geography:

Geolinguistics Roland J. L. Breton, 1991 How and why have certain language groups become more important than others Why have some languages declined or in certain cases disappeared completely The work includes an overview of the distribution of various languages throughout the world with a preliminary outline of what the geography of language might be like using census data from countries such as Canada Switzerland and the USSR Special attention is given to the languages that together are spoken as mother tongues by about 60 per cent of the population of the world

Geolinguistics Roland J. L. Breton, 2000 **Linguistic Culture and Language Policy** Harold Schiffman, 2012-11-12 By looking closely at the multilingual democracies of India France and the USA Harold F Schiffman examines how language policy is primarily a social construct based on belief systems attitudes and myths Linguistic Culture and Language Policy exposes language policy as culture specific helping us to understand why language policies evolve the way they do why they work or not and how people's lives are affected by them These issues will be of specific interest to linguists specialising in multilingual multicultural societies bilingual educationalists curriculum planners and teachers **Linguistic Minorities in Multilingual Settings** Christina Bratt Paulston, 1994-03-24 The 19th century European notion of the one people one language nation as the ideal state has been a very pervasive influence in spite of the fact that most countries in the world today are multilingual that is they contain ethnic groups in contact and not infrequently in competition Such thinking has held implications for the setting of language policies from hanging a wooden clog around the neck of a child heard speaking Occitan in Southern France to the considerable budgeting in Ireland for the promotion of Irish In this book Paulston presents an analytical framework for explaining and predicting the language behaviour of social groups as such behaviour relates to linguistic policies for minority groups She argues that a number of factors must be considered in the understanding and establishment of language policies for minority groups 1 if language planning is to be successful it must consider the social context of language problems 2 the linguistic consequences for social groups in contact will vary depending on the focus of social mobilization i.e. ethnicity or nationalism and 3 a major problem in the accurate prediction of such linguistic consequences lies in identifying the salient factors which contribute to language maintenance or shift i.e. answering the question under what conditions Part I outlines and discusses the analytical framework beginning with a general consideration of language problems and language policies and of the social factors which contribute to language maintenance and shift The author continues to discuss four distinct types of social mobilization which under certain specified social conditions result in different linguistic consequences ethnicity ethnic movements ethnic nationalism and geographic nationalism The argument is that such an understanding is vital to helpful educational policies and successful language planning in general Part II contrasts and compares a number of case studies for clarification of their diverse courses of mother tongue maintenance It particularly seeks to illustrate the type of social mobilization discussed in Part I and to

understand the social conditions which influence and alter the effects of the type of social mobilization International Encyclopedia of Geography, 15 Volume Set Noel Castree, Michael F. Goodchild, Audrey Kobayashi, Weidong Liu, Richard A. Murphy, Harm J. De Blij, 2015 *Languages in a Globalising World* Jacques Maurais, Michael A. Morris, 2003-04-10 Throughout human history the fate of languages has been closely linked to political power relationships Political shifts in the international system continue to affect linguistic patterns which today are still in a state of flux following the end of the Cold War This book considers the effects of present day trends in global politics on the relative status of languages and the directions in which the linguistic hierarchy might develop in the future It will appeal to researchers and students of sociolinguistics and language planning as well as of international relations A Grammar of the Thangmi Language Mark Turin, 2011-12 This monograph is a grammar of Thangmi an endangered Tibeto Burman language spoken in the districts of Dolakha and Sindhupalchok in central eastern Nepal The language is spoken by upwards of 30 000 people belonging to an ethnic group of the same name The Thangmi are one of Nepal's least documented communities These two volumes include a grammatical description of the Dolakha dialect of Thangmi a collection of glossed oral texts and a comprehensive lexicon with relevant examples In addition the reader will find an extensive ethnolinguistic introduction to the speakers and their culture For students and scholars of anthropology and linguistics this study is a compelling illustration of the interweaving of these disciplines in the context of Himalayan studies With financial support of the International Institute for Asian Studies www.iias.nl **Sociolinguistics and Language History** Terttu Nevalainen, Helena Raumolin-Brunberg, 2023-11-27 What role has social status played in shaping

the English language across the centuries Have women also been the agents of language standardization in the past Can apparent time patterns be used to predict the course of long term language change These questions and many others will be addressed in this volume which combines sociolinguistic methodology and social history to account for diachronic language change in Renaissance English The approach has been made possible by the new machine readable Corpus of Early English Correspondence CEEC specifically compiled for this purpose The 2 4 million word corpus covers the period from 1420 to 1680 and contains over 700 writers The volume introduces the premises of the study discussing both modern sociolinguistics and English society in the late medieval and early modern periods A detailed description is given of the Corpus of Early English Correspondence its encoding and the separate database which records the letter writers social backgrounds The pilot studies based on the CEEC suggest that social rank and gender should both be considered in diachronic language change but that apparent time patterns may not always be a reliable cue to what will happen in the long run The volume also argues that historical sociolinguistics offers fascinating perspectives on the study of such new areas as pragmatization and changing politeness cultures across time This extension of sociolinguistic methodology to the past is a breakthrough in the field of corpus linguistics It will be of major interest not only to historical linguists but to modern sociolinguists and social historians

Modern Schools of Linguistic Thought Zeki Hamawand, 2020-05-21 This textbook provides a clear and concise overview of the main schools of linguistic thought and scholarship from the late 18th century to the present day examining the key tenets and leading figures of each approach and assessing their impact on the field Combining theory with practice the author aims to familiarise students with the mechanisms used in analysing language structures to acquaint them with the history of the discipline and to demonstrate how different sometimes competing approaches can be combined to understand language and linguistics today Written in an engaging and accessible manner this textbook is an ideal primer for new students of linguistics at any level as well as more experienced researchers seeking to understand the history of their field or the arguments and theories of other sub disciplines
