Geological And Cosmogonic Cycles As Reflected By The New Law Of Universal Cyclicity:

Geological and Cosmogonic Cycles Ferenc Benkő, 1985 *Catastrophism* Richard J. Huggett, 1997 One of the most dramatic intellectual events of the last decade has been the stunning re emergence of the catastrophist paradigm in the biological and earth sciences From killer asteroids to emergent viruses it has become evident that the history of life on earth has been shaped far more than previous orthodoxies would allow by extreme events and non linear processes The old uniformitarian dogma of steady rate evolution has been decisively challenged by the research of contemporary neo catastrophists like Stephen Jay Gould David Raup Stuart Ross Taylor Ursula Marvin and Kenneth Hsu Whether debating the origin of the moon or the current human impact on the biosphere they urge us to recognize the radically event or chance driven structure of natural history Surveying these various theories of uniformitarian and neo catastrophist thought in a clear and accessible fashion and seeking a path towards a new and workable synthesis Richard Huggett provides a superb introduction to the ideas which have defined the way we look at the world *Sustainable water management in the tropics and subtropics - and case studies in Brazil. VI. 3* , **Environmental Change** Richard Huggett, 2003-09-02 Environmental Change explores the nature causes rates and directions of environmental change throughout earth history Huggett introduces the interdependent parts of the natural environment cosmic ecological geological and the dynamic nature of the environmental system Integrating a wealth of examples and illustrations from around the world the book examines evidence and causes of change in life climate air and water soils sediments and landforms and the impacts of human environment interaction **Global Tectonics and Metallogeny** , 1985 *Current Geographical Publications* University of Wisconsin--Milwaukee.
