Geological Observations On The Nw Fronti:

Fauna of Baluchistan and N. W. Frontier of India Fritz Noetling, 1895 *Geology and Politics in Frontier Texas, 1845-1909* Walter Keene Ferguson, 2014-11-07 Conservation and development of natural resources are issues of critical importance throughout the world These issues have been matters of public concern in Texas since legislators first adopted the state sponsored geological survey as a means of extending government funds to private citizens who would help develop and advertise the mineral and agricultural wealth of Texas Walter Keene Ferguson examines the relation of politics to geological exploration during a critical period in Texas history the first half century of statehood Although Texas shared its frontier experience with many other areas it could not rely on federal aid in the form of land grants because the state government controlled the destiny of the public domain at all times Acrimonious debate between farmers and urbanites of East Texas and pioneer ranchers of arid West Texas rendered the disposition of public lands even more difficult As tools for developing and advertising resources the geological and agricultural surveys of 1858 and 1867 fulfilled the demands of expectant capitalism made by politicians speculators and railroad entrepreneurs Reconnaissance geologists publicized the wealth of Texas Drought in 1886 and popular agitation against squandering of state land caused the emergence of a new concept of the geological survey as an instrument of land reform and public assistance Lobbying by reformers and scientific organizations led to the formation of the Dumble Survey in 1888 and the University of Texas Mineral Survey in 1901 Stratigraphic analysis of the individualities of Texas geology helped the state realize its full economic potential and led to legislation to protect public mineral land from exploitation The youthful oil industry finally removed geological exploration from the political arena As part of the University a permanent Bureau of Economic Geology was established in 1909 to extend the benefits of scientific research to private citizens and state organizations on a nonpartisan basis Ferguson s analysis of geological surveys in Texas contributes to an understanding not only of the geology and history of the state but of the urgent problem of evaluating the natural resources of underdeveloped regions *The Pre-Cambrian in North Africa* H. M. E. Schürmann, 2023-08-14 **Memoirs of the Geological Survey of India** Geological Survey of India, 1899 **Frontier Naturalist** Russell M. Lawson, 2012-11-01 This is a true story of discovery and discoverers in what was the northern frontier region of Mexico in the years before the Mexican War In 1826 when the story begins the region was claimed by both Mexico and the United States Neither country knew much about the lands crossed by such rivers as the Guadalupe Brazos Nueces Trinity and Rio Grande Jean Louis Berlandier a French naturalist was part of a team sent out by the Mexican Boundary Commission to explore the area His role was to collect specimens of flora and fauna and to record detailed observations of the landscapes and peoples through which the exploring party traveled His observations including sketches and paintings of plants landmarks and American Indians were the first compendium of scientific observations of the region to be collected and eventually published Here historian Russell Lawson tells the story of this multinational expedition using Berlandier s copious

records as a way of conveying his view of the natural environment Lawson's narrative allows us to peer over Berlandier's shoulder as he traveled and recorded his experiences Berlandier and Lawson show us an America that no longer exists

Memoirs of the Geological Survey of India, 1895 Geomorphology in Deserts Ronald U. Cooke, Andrew Warren, 2023-11-15 This book examines the landforms soils and geomorphological processes of deserts which cover over 20% of Earth's land surface Despite their vastness and the significant body of literature on the topic deserts remain underrepresented in comprehensive geomorphological surveys with notable exceptions like Walther's *Das Gesetz der Wiistenbildung* 1924 Cotton's *Climatic Accidents in Landscape Making* 1942 and Tricart and Cailleux's *Le Model des R gions S ches* 1961 Our study builds on these works incorporating our field experiences in deserts across North America South America North Africa and Pakistan while primarily drawing on English language research and emphasizing contemporary geomorphological systems at different scales By focusing on present processes shaping landforms and soils we have given less attention to regional chronologies of landform development a consequence of our selective approach The field of desert geomorphology still grapples with speculative theories such as parallel slope retreat and pervasive wind erosion which often overshadow empirical evidence We aim to provide grounded generalizations clarify contested ideas and pose meaningful questions to establish a baseline for future research hoping to contribute to a deeper understanding of the dynamic processes shaping desert landscapes This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973 The Oceans: a Challenging New Frontier United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Organizations and Movements, 1968

Records of the Geological Survey of India Geological Survey of India, 1912 Includes the Annual report of the Geological Survey of India 1867 *Geological Survey Professional Paper* Geological Survey (U.S.), 1957 **The Results of Research on Representative and Experimental Basins**, 1970 Geological Survey Professional Paper, 1972 *U.S. Geological Survey Professional Paper*, 1957 *The Geology and Ore Deposits of the Tavoy District* John Coggin Brown, Alexander Macmillan Heron, 1923 Contributions to Economic Geology, 1906, 1907 **"The" Geology of Rice County** Lyman Beecher Sperry, 1878 *Geology of the Green River Desert-cataract Canyon Region* Arthur Alan Baker, Emma Mertins Thom, 1946 Journal of Hydrology, New Zealand, 1970 **Fabric of the Frontier** Rob Collins, Ian Kille, Kathleen O'Donnell, 2023-07-06 What is Hadrian's Wall made of where did this material come from and how has it been reused in other buildings in the communities that emerged in the centuries after the Roman Empire By studying the fabric of Hadrian's Wall using a geological approach combined with archaeological methods is it possible to refine our answers to these questions This study describes how the relationship between the geology of the Wall's landscape and its fabric may be used to further

understand the Wall and presents a significant set of new geological and archaeological data on the Wall's stones from across the length of the Wall. This data set has been collected in two complementary ways. First as a citizen science project where volunteers from local communities were trained to visually characterize sandstones and resulting in data collecting on large numbers of the Wall's stones along the length of the Wall. Secondly analytical research was used to gather in scientific data for a selected sets of rocks and stones. Geochemical data was captured using an X-ray fluorescence spectrometer and petrographic observations made using a petrographic microscope and thin sections. The combined methods provide a framework for geological analysis of the Wall supported by robust data. It builds on earlier work on Roman quarrying and stone preparation highlighting not only stone sources but the criteria for choosing stone, stone preparation methods and the implied routes to the Wall. At the heart of this study lies the ability to uniquely identify different sandstone types. Geological methods used to achieve this are explored as are the ways in which the sandstones form. This highlights both the possibilities and limits of this approach.

The Texas Panhandle Frontier Frederick W. Rathjen, 1998. The Texas Panhandle its eastern edge descending sharply from the plains into the canyons of Palo Duro, Tule, Quitaque, Casa Blanca and Yellow House is as rich in history as it is in natural beauty. Long considered a crossroads of ancient civilizations the twenty-six northernmost Texas counties lie on the southern reaches of the Great Plains with
