## **Geometric Analysis Of Pde And Several Complex Variables Dedicated To Franois Treves:**

**Geometric Analysis of PDE and Several Complex Variables** Francois Treves, 2005 This volume is dedicated to Francois Treves who made substantial contributions to the geometric side of the theory of partial differential equations PDEs and several complex variables One of his best known contributions reflected in many of the articles here is the study of hypo analytic structures An international group of well known mathematicians contributed to the volume Articles generally reflect the interaction of geometry and analysis that is typical of Treves s work such as the study of the special types of partial differential equations that arise in conjunction with CR manifolds symplectic geometry or special families of vector fields There are many topics in analysis and PDEs covered here unified by their connections to geometry The material is suitable for graduate students and research mathematicians interested in geometric analysis of PDEs and several complex variables

**Geometric Analysis of PDEs and Several Complex Variables** Shiferaw Berhanu, Nordine Mir, Gustavo Hoepfner, 2024-10-26 This volume convenes selected peer reviewed papers presented at the international workshop dedicated to Dr Jorge Hounie on the occasion of his 75th birthday held in Serra Negra Brazil from July 31 to August 4 2023 The papers in this volume cover areas that include several complex variables Cauchy Riemann geometry and partial differential equations An Emeritus at the Federal University of S o Carlos UFScar Brazil Dr Hounie has made significant contributions to partial differential equations complex variables harmonic analysis and involutive structures He has also been a kind and great mentor to numerous graduate students and postdocs who have gone on to pursue successful academic careers Born in Bahia Blanca Argentina he completed his PhD studies at Rutgers University in 1974 and joined UFScar as a Full Professor in 1995 He is a Full Member of the Brazilian Academy of Sciences Within this book readers will encounter a collection of cutting edge research papers reflecting Dr Hounie s research interests valuable for both experienced researchers and graduate students alike *Multidimensional Complex Analysis and Partial Differential Equations* Francois Treves, Paulo D. Cordaro, Howard Jacobowitz, 1997 This collection of papers by outstanding contributors in analysis partial differential equations and several complex variables is dedicated to Professor Treves in honour of his 65th birthday There are five excellent survey articles covering analytic singularities holomorphically nondegenerate algebraic hypersurfaces analyticity of CR mappings removable singularities of vector fields and local solvability for systems of vector fields The other papers are original research contributions on topics such as Klein Gordon and Dirac equations Toeplitz operators elliptic structures complexification of Lie groups and pseudo differential operators *Complex Geometric Analysis in Pohang* Kang-Tae Kim, Steven George Krantz, 1999 This volume comprises the proceedings of a conference on the geometric analysis of several complex variables held at POSTECH in June 1997 The conference was attended by scientists and students from around the globe Each of the five plenary speakers at the conference gave a short course on a topic of current interest in the field The lecture write ups contain cogent and accessible information intended for a broad audience The volume also includes

a tutorial in several complex variables given by Kim and Krantz at the conference This tutorial is geared toward helping the novice to understand the rest of the material in the book The bibliographies of the papers give students and young mathematicians a valuable resource for future learning on the topic This book provides a substantial overview on areas of current activity Required background for understanding the text is a solid undergraduate education in mathematics and familiarity with first year graduate studies in real and complex analysis Some exposure to geometry would be helpful The book is also suitable for use as a supplemental course text
