Zukowski, 2012-12-02 Genetics and Biotechnology of Bacilli Volume 3 covers the proceedings of the Fifth International Conference on Genetics and Biotechnology of Bacilli held on July 9-12 1989 at the Asilomar Conference Center Pacific Grove California It summarizes the remarkable progress made in the genetics and biotechnology fields of Bacilli It is organized into four parts encompassing 43 chapters which focus on gene regulation and structure enzyme structure *Bacillus thuringiensis* toxins and stationary phase gene regulation Part I covers topics related to gene regulation and structure of Bacilli such as control of gene expression mutation genetic organization DNA sequence analysis and identification of transcript units It also discusses gene replication in *Bacillus subtilis* plasmids levanase operon of *B. subtilis* and characterization of global regulon in *B. subtilis* The next part of this book focuses on the structure of various enzymes found in *B. subtilis* including alpha amylases subtilisin alkaline phosphatase and levansucrase Part III discusses the generation of functional *B. thuringiensis* toxin hybrid genes regulation of crystal protein gene promoters toxicity of *B. thuringiensis* delta endotoxin and insecticidal activity of chimeric protoxins The concluding part covers the aspects of signal transduction regulation of differential gene expression during *B. subtilis* sporulation and gene cloning and deletion for extracellular proteases of *B. subtilis* It also discusses genetic and biochemical aspects of protein phosphorylation properties of *B. subtilis* spores control of stationary phase gene expression and the novel regulatory gene *senS* of *B. subtilis* This book is a valuable source of information for microbiologists research biologists and Bacilli enthusiasts **Genetics and Biotechnology of Bacilli, Volume 2** A.T. Ganesan, 2012-12-02 Genetics and Biotechnology of Bacilli Volume 2 is a collection of papers from the Fourth International Conference on Bacilli held in California on June 21-24 1987 One paper reviews the results of cloning and characterization of genes for secreted enzyme and of genes that control the expression of secreted enzymes in relation with other prokaryotic regulatory systems Other papers tackle the regulation of gene expression during sporulation the sigma factors bacterial toxins and antibiotic resistance genes One paper reports that three genes responsible for the code for peptides found in BT cuboidal crystals have been successfully cloned The three codes have different toxic characteristics in relation to tobacco hornworm larvae or mosquito larvae Other papers examine replication Such examination pertains to the two levels of control on the chromosome involved in DNA replication or to the possible functional importance that several membranes associated DNA subcomplexes can have in *Bacillus subtilis* where one of these appear to control initiation Other papers discuss secretion and extracellular enzymes as well as the different genetic systems and methods This collection can prove beneficial for biochemists microbiologists cellular researchers and academicians involved in the study of cellular biology microchemistry or toxicology *Genetics and Biotechnology of Bacilli* ,1990 **National Library of Medicine Current Catalog** National Library of Medicine
