Genetics Of Man:

The Journey of Man Spencer Wells, 2012-10-31 Around 60 000 years ago a man genetically identical to us lived in Africa Every person alive today is descended from him How did this real life Adam wind up as the father of us all What happened to the descendants of other men who lived at the same time And why if modern humans share a single prehistoric ancestor do we come in so many sizes shapes and races Examining the hidden secrets of human evolution in our genetic code Spencer Wells reveals how developments in the revolutionary science of population genetics have made it possible to create a family tree for the whole of humanity Replete with marvelous anecdotes and remarkable information from the truth about the real Adam and Eve to the way differing racial types emerged The Journey of Man is an enthralling epic tour through the history and development of early humankind

Scientific Authentication of the Bible Franklin Nolle Williams, 2013-08-30 In August of 1994 a paper was published in the scholarly Statistical Science a journal of the Institute of Mathematical Statistics entitled Equidistant Letter Sequences in the Book of Genesis The paper was written by three internationally respected Hebrew Scholars and mathematicians Doron Witztum Eliyahu Rips and Yoav Rosenberg Their assertion is that there is a hidden underlying text in the Torah the first five books of the Bible The following is an excerpt from their abstract of the paper which can be found in the appendix of Michael Drosnins book The Bible Codes It has been noted that when the Book of Genesis is written as two dimensional arrays equidistant letter sequences spelling words with related meanings often appear in close proximity Quantitative tools for measuring this phenomenon are developed Randomization analysis shows that the effect is significant at the level of 0 00002 The arrays are rows with an equal number of letters with all the punctuation and spaces removed The sequences they are referring to are words like hammer and anvil table and chair rain and umbrella These words go together and are usually found close to one another in the arrays The tools they are referring to are the tools of mathematics involved The randomization analysis is two one hundred thousandths In other words it could only be two in one hundred thousand chances that this occurred by the accidental random sequences of letters in this text Most scientific experiments only require one in a hundred 1 100 or 01 as being within validity It was the occasion of the Bible Codes that it occurred to me that if there was an underlying code then it would be ludicrous for the surface text to be invalid Scribes had been specially trained to write the surface text verbatim without one jot or tittle changed If there was one mistake they were made to rewrite the whole page again It was written contiguous without punctuation or spacing between words It was considered heretical if anything was changed Because of this I began to study the surface text very carefully to find any hidden meanings that may
