Geochemistry in Petroleum Exploration Douglas W. Waples, 1985 **Geochemistry in Petroleum Exploration** Douglas Waples, 1985-01-01 **Hydrocarbon Migration Systems Analysis** J.M. Verweij, 1993-01-27 The main intention of this book is to provide geoscientists interested or working in hydrocarbon exploration with a comprehensive understanding of the evolution of hydrocarbon migration systems in sedimentary basins and to give guidelines for its application in basin evaluation For this purpose the book fully integrates hydrogeologic and hydrodynamic aspects of the evolution of sedimentary basins with petroleum geologic aspects It will be of interest to petroleum geologists hydrogeologists geochemists and reservoir geologists **U.S. Geological Survey Bulletin**, 1983 **Biogeochemistry and the Environment** Michael O'Neal Campbell, 2023-12-14 Biogeochemistry may be defined as the science that combines biological and chemical perspectives for the examination of the Earth's surface including the relations between the biosphere lithosphere atmosphere and hydrosphere Biogeochemistry is a comparatively recently developed science that incorporates scientific knowledge and findings research methodologies and models linking the biological chemical and earth sciences Therefore while it is a definitive science with a strong theoretical core it is also dynamically and broadly interlinked with other sciences This book examines the complex science of biogeochemistry from a novel perspective examining its comparatively recent development while also emphasizing its interlinked relationship with the earth sciences including the complementary science of geochemistry the geographical sciences biogeography oceanography geomatics earth systems science the biological sciences ecology wildlife studies biological aspects of environmental sciences and the chemical sciences including environmental chemistry and pollution The book covers cutting edge topics on the science of biogeochemistry examining its development structure interdisciplinary multidisciplinary and transdisciplinary relations and the future of the current complex knowledge systems especially in the context of technological developments and the computer and data fields **Metallogenic models and exploration criteria for buried carbonate-hosted ore deposits—a multidisciplinary study in eastern England** J. A. Plant and D. G. Jones, 2013-12-17 **U.S. Geological Survey Bulletin** Henry W. Roehler, K. Y. Lee, 1989 *Petroleum Geology of Libya* Don Hallett, 2002-02-26 Libya has the largest petroleum reserves of any country in Africa and since production began in 1961 over 20 billion barrels of oil have been produced Libya is scheduled to reach the mid point of depletion of reserves in 2001 and this provides a timely point at which to review the state of petroleum exploration in Libya A large amount of data has been published on the geology of Libya but it is scattered through the literature much of the older data has been superseded and several of the key publications especially those published in Libya are difficult to find This book represents the first attempt to produce a comprehensive synthesis of the petroleum geology of Libya It is based exclusively on published data supplemented by the author's experience gained during ten years work in Libya The aim of the book is to systematically review the plate tectonics

structural evolution stratigraphy geochemistry and petroleum systems of Libya and provides valuable new data on fields production and reserves This volume will provide a ready source of reference to individuals and companies who wish to obtain an overview of the petroleum geology of Libya and will save them the laborious task of sifting through hundreds of publications to find the data they require The book includes 148 newly drawn figures
