Architects Thomas Yarrow, 2019-07-15 What is creativity What is the relationship between work life and personal life How is it possible to live truthfully in a world of contradiction and compromise These deep and deeply personal questions spring to the fore in Thomas Yarrow s vivid exploration of the life of architects Yarrow takes us inside the world of architects showing us the anxiety exhilaration hope idealism friendship conflict and the personal commitments that feed these acts of creativity Architects rethinks creativity demonstrating how it happens in everyday practice It highlights how the pursuit of good architecture

relates to the pursuit of a good life in intimate and individually specific ways And it reveals the surprising and routine social negotiations through which designs and buildings are actually made *Elephant Complex* John Gimlette, 2016-02-16 No one sees the world quite like John Gimlette As The New York Times once noted he writes with enormous wit indignation and a heightened sense of the absurd Writing for both the adventurer and the armchair traveler he has an eye for unusually telling detail a sense of wonder and compelling curiosity for the inside story This time he travels to Sri Lanka a country only now emerging from twenty six years of civil war Delving deep into the nation s story Gimlette provides us with an astonishing multifaceted portrait of the island today His travels reveal the country as never before Beginning in the exuberant capital Colombo a hint of anarchy everywhere he ventures out in all directions to the dry zones where the island s 5 800 wild elephants congregate around ancient reservoirs through cinnamon country with its Portuguese forts to the Bible Belt of Buddhism the tsunami ravaged southeast coast then up into the great green highlands the garden in the sky and Kandy the country s eccentric aristocratic Shangri la Along the way a wild and often desperate history takes shape a tale of great colonies Arab Portuguese British and Dutch and of the cultural divisions that still divide this society Before long we re in Jaffna and the Vanni crucibles of the recent conflict These areas the hottest driest and least hospitable have been utterly devastated by war and are only now struggling to their feet But this is also a story of friendship and remarkable encounters In the course of his journey Gimlette meets farmers war heroes ancient tribesmen world class cricketers terrorists a former president old planters survivors of great massacres and perhaps some of their perpetrators That s to say nothing of the island s beguiling fauna elephants crocodiles snakes storks and the greatest concentration of leopards on Earth Here is a land of extravagant beauty and profound devastation of ingenuity and catastrophe possessed of both a volatile past and an uncertain future a place capable of being at once heavenly and hellish all brought to vibrant fascinating life here on the page

Postcolonialism Tariq Jazeel, 2019-02-22 Postcolonialism is a book that examines the influence of postcolonial theory in critical geographical thought and scholarship Aimed at advanced level students and researchers the book is a lively stimulating and relevant introduction to postcolonial geography that elaborates on the critical interventions in social cultural and political life this important subfield is poised to make The book is structured around three intersecting parts Spaces Identity hybridity Knowledge that broadly follow the trajectory of postcolonial studies since the late 1970s It comprises ten main chapters each of which is situated at the intersections of postcolonialism and critical human geography In doing so Postcolonialism develops three key arguments First that postcolonialism is best conceived as an intellectually creative and practical set of methodologies or approaches for critically engaging existing manifestations of power and exclusion in everyday life and in taken as given spaces Second that postcolonialism is at its core concerned with the politics of representation both in terms of how people and space are represented but also the politics surrounding who is able to represent themselves and on what whose terms Third the book argues that postcolonialism itself is an inherently

geographical intellectual enterprise despite its origins in literary theory In developing these arguments and addressing a series of relevant and international case studies and examples throughout Postcolonialism not only demonstrates the importance of postcolonial theory to the contemporary critical geographical imagination It also argues that geographers have much to offer to continued theorizations and workings of postcolonial theory politics and intellectual debates going forward This is a book that brings critical analyses of the continued and omnipresent legacies of colonialism and imperialism to the heart of human geography but also one that returns an avowedly critical geographical disposition to the core of interdisciplinary postcolonial studies

The Environmental Brief Richard Hyde, Steve Watson, York St John Business School Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty five per cent of all greenhouse gas emissions As the greatest opportunities for reducing these emissions occur during the briefing and design processes the pathway to better design lies in preparing environmental briefs and using these to drive building design and produce buildings of high environmental performance This process driven book looks at the theoretical issues involved in an environmental brief and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment and relates these concepts to a number of case studies from around the world

Eco-Cultural Networks and the British Empire James Beattie, Edward Melillo, Emily O'Gorman, 2014-12-18 19th century British imperial expansion dramatically shaped today's globalised world Imperialism encouraged mass migrations of people shifting flora fauna and commodities around the world and led to a series of radical environmental changes never before experienced in history Eco Cultural Networks and the British Empire explores how these networks shaped ecosystems cultures and societies throughout the British Empire and how they were themselves transformed by local and regional conditions This multi authored volume begins with a rigorous theoretical analysis of the categories of empire and imperialism Its chapters written by leading scholars in the field draw methodologically from recent studies in environmental history post colonial theory and the history of science Together these perspectives provide a comprehensive historical understanding of how the British Empire reshaped the globe during the 19th and 20th centuries This book will be an important addition to the literature on British imperialism and global ecological change

A Philosophy of Gardens David E. Cooper, 2006-02-02 Why do gardens matter so much and mean so much to people That is the intriguing question to which David Cooper seeks an answer in this book Given the enthusiasm for gardens in human civilization ancient and modern Eastern and Western it is surprising that the question has been so long neglected by modern philosophy Now at last there is a philosophy of gardens Not only is this a fascinating subject in its own right it also provides a reminder that the subject matter of aesthetics is broader than the fine arts that ethics is not just about moral issues but about the good life and that environmental philosophy should not focus only on wilderness to the exclusion of the humanly shaped environment David Cooper identifies garden appreciation as a special human phenomenon distinct from both from the appreciation of art

and the appreciation of nature He explores the importance of various garden practices and shows how not only gardening itself but activities to which the garden especially lends itself including social and meditative activities contribute to the good life And he distinguishes the many kinds of meanings that gardens may have from representation of nature to emotional expression from historical significance to symbolization of a spiritual relationship to the world Building on the familiar observation that among human beings creations the garden is peculiarly dependent on the co operation of nature Cooper argues that the garden matters as an epiphany of an intimate co dependence between human creative activity in the world and the mystery that allows there to be a world for them at all A Philosophy of Gardens will open up this subject to students and scholars of aesthetics ethics and cultural and environmental studies and to anyone with a reflective interest in things horticultural The Routledge Companion to Critical Approaches to Contemporary Architecture Swati
