Geographers Abroad Essays On The Problems And Prospects Of Research In Foreign Areas:

Geographers Abroad H. C. Brookfield, 1973 **Geographers** Patrick H. Armstrong, Geoffrey Martin, 2015-12-14

Geographers is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known including explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and a brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date. Published under the auspices of the International Geographical Union. **Geographers Abroad**

Terry Jean Rosenberg, 1973 Geographers Elizabeth Baigent, André Reyes Novaes, 2021-08-12. Geographers is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Volume 39 celebrates the contribution of Hugh Clout to the discipline. The thirty-ninth volume of Geographers Biobibliographical Studies adds significantly to the corpus of scholarship on geography's multiple histories and biographies; each chapter includes a select biography of its chosen figure and a brief chronology of their work. In this edition, Hugh Clout memorialises the forgotten those who had made an important local contribution which went unnoticed on the national stage or those who continued along the intellectual path blazed by one of the discipline's major figures and thus helped to secure the reputation of that major figure. In this collection of essays, Clout draws from used literary works, reviews in the scholarly and other press, obituaries in newspapers and geographical publications, funeral orations and papers in a large number of archives. Each study includes a select bibliography and a brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date. As with other volumes in the series, the purpose is not to evaluate but to present individuals and their contributions as they really were and in the context of their time. Published under the auspices of the International Geographical Union. *Geographers Abroad* James Osborn, 1973 German
Geographical Research Overseas Eugen Wirth, 1988 Interdisciplinarity Julie Thompson Klein, 1990. In this volume, Julie Klein provides the first comprehensive study of the modern concept of interdisciplinarity, supplementing her discussion with the most complete bibliography yet compiled on the subject. In this volume, Julie Klein provides the first comprehensive study of the modern concept of interdisciplinarity, supplementing her discussion with the most complete bibliography yet compiled on the subject. Spanning the social sciences, natural sciences, humanities and professions, her study is a synthesis of existing scholarship on interdisciplinary research, education and health care. Klein argues that any interdisciplinary activity embodies a complex network of historical, social, psychological, political, economic, philosophical and intellectual factors. Whether the context is a short-ranged instrumentality or a long-range reconceptualization of the way we know and learn, the concept of interdisciplinarity is an important means of solving problems and answering questions that cannot be satisfactorily addressed.

using singular methods or approaches **Indian Geography in the 21st Century** Ravi S. Singh, 2009-10-02 This book primarily a collection of statements on action agenda to be pursued in geography in India consists of nineteen chapters exclusively authored by the young geographers It is organised into five parts Part I provides The Contextual Orientation Part II contemplates on Reshaping Geography Education Part III explores Resurrecting Physical Geography Part IV looks at Retrieving Human Geography and Part V The Summum Bonum attempts to garland the emerging thoughts The book seeks to provide a peep into the future Indian Geography and serve professional geographers researchers teachers and students alike

Uprooting Geographic Thoughts in India Rana Singh, David Sopher, Oskar Spate, 2009-03-26 Under the cultural turn and transformation the new intellectual discourses started in the 21st century to search the roots have cross cultural comparison and to see how the old traditions be used in the contemporary worldviews This book is the first attempt dealing with roots of Indian geographical thoughts since its beginning in 1920 It emphasises identity of India and Indianness and consciousness among dweller geographers in India development and status of geography and its recent trends Gaia theory and Indian context in search of cosmic integrity ecospirituality and global message towards interrelatedness Hindu pilgrimages and its contemporary importance Mahatma Gandhi and his contribution to sustainable environmental development for global peace and humanism and new vision to see meeting grounds of the East and the West on the line of reconstruction and reconciliation in the globalising world These essays are selective and thematic therefore overall view of comprehensiveness is lacking But this book is not the end obviously it is a beginning as already other volumes in sequence and continuity are in progress At the end the lead essays representative of the three eras by Spate 1956 Sopher 1973 and Mukerji 1992 are reprinted with a view to assessing the relevance of their challenging message even today *Survey*

Routledge Library Editions: Social & Cultural Geography Various Authors, 2022-07-30 Re issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also examine the cross over of geography with other

disciplines such as literature and history *In the Shadow of Giants: The Major Powers and the Security of Southeast Asia* Anthony James Gregor, 1989 *The Myth of Continents* Martin W. Lewis, Kären Wigen, 1997-08-11 In a thoughtful and engaging critique geographer Martin W Lewis and historian Karen Wigen re examine the basic geographical divisions we take for granted Their up to the minute study reflects both on the global scale and its relation to the specific continents of Europe Asia and Africa actually part of one contiguous landmass Photos maps *Cultural Encounters with the Environment* Viola Haarmann, 2000 In *Cultural Encounters with the Environment* a distinguished group of contributors offers a fresh and original view of contemporary geography The authors explore the role of four traditional themes in the New cultural geography O the interplay between the evolution of particular biophysical niches and the activities of the culture groups that inhabit them the diffusion of cultural traits the establishment and definition of culture areas and the distinctive mix of geographical characteristics that gives places their special character in relation to one another By examining how cultural space is constructed how environment is remade understood and imaged as a consequence and how people lay claim to place this volume establishes a compelling case for the importance of these enduring concepts to present and future trajectories in cultural geography **Geography Since the Second World War (RLE Social & Cultural Geography)** Ron Johnston, Paul Claval, 2014-01-23 The discipline of geography has undergone much change and growth in recent years With growth has come diversity Before 1945 there were differences between countries in the emphases on subject matter and research approach although these were all related closely to three main models French German and American Since then the relative importance of French and German influences has declined substantially including within their own national territories and the Anglo American model has grown to world dominance With that model however there is no dominant point of view but rather a multiplicity of competing approaches These various approaches have had a different reception in other parts of the world reflecting the base of pre 1945 geographical scholarship the goals of geographical work set by societies and the nature of the international contacts The result is substantial international diversity in the practice of geography This authoritative volume provides much needed information to make them aware of current international trends **Deforestation in the Postwar Philippines** David M. Kummer, 1992-06 The only quantitative deforestation study to focus on one country this case analysis of the Philippines since 1946 yields more concrete data than previous cross national studies David Kummer's close examination of the interactions among political economic and cultural factors and their environmental consequences sheds light on similar situations in other countries **Urban Regimes and Strategies** A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters there in 1957 Drawing on game and

rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels's center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance
