Knowles, J. Wareing, 2014-05-15 Economic and Social relations departments Geography reviews developments in the study of economic and social geography and brings together in a single volume work which is dispersed in many specialist textbooks An attempt has been made to achieve a balance between oversimplification and over elaboration and to present essential concepts in a clear concise manner The book contains 25 chapters organized into five parts Part One deals with the study of economic and social geography including approaches to the study of human

geography and environmental perception and behavior Part Two on population geography covers topics such as population geography population change and population growth Part Three on economic geography includes discussions of transportation agriculture and mineral resources Part Four on settlement geography examines urbanization the internal structure of towns and cities and rural settlement Part Five is devoted to urban and rural planning problems of economic development and resources This book together with its companion volume Physical Geography Made Simple should be of value to a variety of people First to those who are coming to academic geography for the first time especially to those studying for GCE Advanced Level or ONC OND examinations It should also provide a concise introduction to first year courses in further and higher education including degree courses with a geography component HNC HND and Certificate in Education courses Moving Europeans, Second Edition Leslie Page Moch, 2009-09-18 Praise for the first edition By far the best general book on its subject Moving Europeans will remain a standard reference for some time to come Charles Tilly Moch has reconceived the social history of Europe David Levine Moving Europeans tells the story of the vast movements of people throughout Europe and examines the links between human mobility and the fundamental changes that transformed European life This update of a classic text describes the Western European migration from the pre industrial era to the year 2000 For this new edition Leslie Page Moch reconsiders the 20th century in light of fundamental changes in labor years of conflict and the new migrations following the end of colonial empires the fall of communism and globalization This new edition also features a greatly expanded and up to date bibliography Making Population Geography Adrian Bailey, 2014-05-01 Making Population Geography is a lively account of the intellectual history of population geography arguing that while population geography may drift in and out of fashion it must continue to supplement its demographic approach with a renewed emphasis on cultural and political accounts of compelling population topics such as HIV AIDS sex trafficking teen pregnancy citizenship and global ageing in order for it to shed light on contemporary society Making Population Geography draws both on the writings of those like Wilbur Zelinsky and Pat Gober who were at the very epicentre of spatial science in the 1960s and those like Michael Brown and Yvonne Underhill Sem whose post punk introspections of method content and purpose now push the field in new directions Using a wide range of case studies contemporary examples and current research the book links the rise and fall of the key concepts in population geography to the changing social and economic context and to geographys turn towards social theory Referencing the authors classroom experiences both in the US and the UK Making Population Geography will appeal to students studying geography population issues and the Geography for the IB Diploma Patterns and Change Paul Guinness, 2010-10-21 Covers development of critical scholarship the four compulsory topics of the Core theme Patterns and Change in the Geography syllabus for the International Baccalaureate IB Diploma Programme back cover Migration and Environmental Change in the West African Sahel Victoria van der Land, 2017-10-12 The West African Sahel is predicted to be heavily affected by climate change in the future

Slow onset environmental changes such as increasing rainfall variability and rising temperature are presumed to worsen the livelihood conditions and to increase the out migration from the affected regions Based on qualitative and quantitative data from study areas in Mali and Senegal this book examines the relationship between population dynamics livelihoods and environment in the Sahel region focussing specifically on motives for migration Critiquing the assumption that environmental stress is the dominating migration driver the author demonstrates the important role of individual aspirations and social processes such as educational opportunities and the pull of urban lifestyles In doing so the book provides a more nuanced picture of the environment migration nexus arguing that slow onset environmental changes may actually be less important as drivers of migration in the Sahel than they are often depicted in the media and climate change literature This is a valuable resource for academics and students of environmental sociology migration and development studies encyclopaedia of geography Shatrughna Prasad Sinha,1993 <u>Human Geography</u> Erin Hogan Fouberg, Alexander B.
