Geography, a Modern Synthesis Peter Haggett, 1972 **Geography** Haggett Peter, 1983 **Geography** Peter Haggett, 1995-12-01 *Land Use* David Rhind, Ray Hudson, 2023-04-01 Originally published in 1980 this book draws together a wide range of studies dealing with various aspects of land use in a text specifically designed to guide students through the complexities of the subject It examines the history of the subject its techniques applications the models that it applies and the frameworks within which it has been carried out Land use remains a central political and practical issue in contemporary society Time Resources, Society and Ecology Tommy Carlstein, 2019-09-18 Originally published in 1982 Time Resources Society and Ecology examines and seeks to examine the time dimension in terms of the ecology technology social organization and spatial structure of the human habitat Approaches to time resources sociological time budget studies anthropological activity analysis and economic analysis of money allocation have been limited by their sectoral scope or their failure to relate effectively to the processes of social interaction technological change and environmental structure In this book the book s articulation of time resources is developed in a general theoretical framework of action and interaction in time and space The book examines constraints and possibilities facing preindustrial societies and throws light on the impact of technology on modern societies Basic models of time allocation are presented and finally a cross cultural comparison is made of the mobilization of time resources in preindustrial societies Geographers social anthropologists and human ecologists should find this work directly relevant to their interest in understanding the interactions between man and environment **Nomadic and Indigenous Spaces** Judith Miggelbrink, Joachim Otto Habeck, Nuccio Mazzullo, Peter Koch, 2016-05-06 This volume is devoted to aspects of space that have thus far been largely unexplored How space is perceived and cognised has been discussed from different stances but there are few analyses of nomadic approaches to spatiality Nor is there a sufficient number of studies on indigenous interpretations of space despite the importance of territory and place in definitions of indigeneity At the intersection of geography and anthropology the authors of this volume combine general reflections on spatiality with case studies from the Circumpolar North and other nomadic settings Spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction How do these changes play out in the everyday lives identifications and political projects of nomadic and indigenous people This question has been broached from two seemingly divergent stances spatial cognition on the one hand and production of space on the other Bringing these two approaches together this volume re aligns the different strings of scholarship on spatiality making them applicable and relevant for indigenous and nomadic conceptualizations of space place and territory **Introductory Methods in Population Analysis** R. B. Mandal, Hanuman Prasad, 1989 With special reference to India *Introduction to Geopolitics* Colin Flint, 2006-09-27 This clear and concise introductory textbook guides students through their first engagement with geopolitics It offers a clear framework for understanding contemporary

conflicts by showing how geography provides opportunities and limits upon the actions of countries national groups and terrorist organizations and the overarching theme of geopolitical structures and agents requires no previous knowledge of theory or current affairs Throughout the book case studies including the rise of al Qaeda the Korean conflict Israel Palestine Chechnya and Kashmir emphasize the multi faceted nature of conflict These along with guided exercises help explain contemporary global power struggles the global military actions of the United States the persistence of nationalist conflicts the changing role of borders and the new geopolitics of terrorism Throughout the readers are introduced to different theoretical perspectives including feminist contributions as both the practice and representation of geopolitics are discussed Introduction to Geopolitics is extensively illustrated with diagrams maps and photographs Reading this book will provide a deeper and critical understanding of current affairs and facilitate access to higher level course work and essays on geopolitics Both students and general readers alike will find this book an essential stepping stone to understanding contemporary conflicts

Changing Face and Challenges of Urbanization Shahnaz Parveen, 2005

Ecology & Environ Mgmt Roger Park, 2019-04-09 The aim of the present volume is to review the effects of human activity on physical environment processes and this is justified not only as a complement to the approach taken by G P Marsh his volume *Man and Nature* 1864 but also as a sequel to the work produced since 1864 with contributions since the mid nineteenth century to the study of th

Understanding Geographies of Polarization and Peripheralization Thilo Lang, Sebastian Henn, Kornelia Ehrlich, Wladimir Sgibnev, 2015-08-31 This book presents a multifaceted perspective on regional development and corresponding processes of adaptation and response focusing on the concepts of polarization and peripheralization It discusses theoretical and empirical foundations and presents several compelling case studies from Central and Eastern Europe and beyond

Culture/Place/Health Wilbert M. Gesler, Robin A. Kearns, 2005-07-05 Culture Place Health is the first exploration of cultural geographical health research for a decade drawing on contemporary research undertaken by geographers and other social scientists to explore the links between culture place and health It uses a wealth of examples from societies around the world to assert the place of culture in shaping relations between health and place It contributes to an expanding of horizons at the intersection of the discipline of geography and the multidisciplinary domain of health concerns

Poststructuralist Geographies Marcus Doel, 1999-08-30 This work is the first attempt to integrate poststructuralist thought with the insights of critical human geography Doel does not seek to make conventional approximations of poststructuralist concepts but to rethink and rewrite the world through them

Transformations Colin

Renfrew, Kenneth L. Cooke, 2014-05-10 *Transformations Mathematical Approaches to Culture Change* focuses on the application of contemporary mathematical techniques to the study of culture change and formulates problems in archaeology anthropology and historiography in such a way that they are susceptible to treatment of a mathematical kind Mathematical models extending from the almost purely quantitative methods of physics to the purely verbal conceptual explanations are described Emphasis is placed on catastrophe theoretic models that exemplify the use of soft mathematics in situations in which the use of hard quantitative models is not possible Comprised of 21 chapters this book begins with an overview of the role of mathematics in theoretical archaeology followed by a discussion on two general categories of mathematical methods that seem to be suitable for modeling cultural transformations methods of dynamical systems theory and methods that give greater emphasis on discrete entities and the structural relations or patterns among them Subsequent chapters deal with the use of mathematics in history morphogenesis in biological and social systems simulation of the growth of hierarchies and logistic trends in Southwest population growth A reconstruction of political units in the Valley of Mexico during the Toltec period is also presented This monograph will be of interest to archaeologists anthropologists historians biologists sociologists and mathematicians

Groundwater Management in Asian Cities Satoshi Takizawa, 2008-08-27 In 2007 the world's urban population surpassed the number of people living in rural areas and is still growing The number of city dwellers who do not have access to piped water and rely on groundwater is also increasing In many Asian cities groundwater is not only the source of domestic water but also an important resource for industrial development making better management of groundwater resources essential for sustainable development Because groundwater is easier to access and costs less than water from piped systems groundwater abstraction cannot be easily regulated Policies for groundwater management adopted in Japan and other Asian countries are compared and technologies for efficient use of groundwater are elucidated Groundwater contamination is also a serious problem that exacerbates water scarcity in Asian cities Case studies illustrate the cause and consequences of naturally occurring contaminants such as arsenic and fluoride and groundwater contamination due to anthropogenic contaminants is described Also discussed are technologies for treating contaminated groundwater to reduce the health risks of drinking contaminated groundwater

Tourism and Development Richard Sharpley, David J. Telfer, 2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widely held assumptions about tourism's developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of

development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent significant counterpoints to overly simplistic models of tourism s potential contribution to development
