Quarterly Literature Review of the Remote Sensing of Natural Resources ,1977 Innovación educativa en las enseñanzas técnicas M^a Carmen Mata Montes,2015-05-27 En el a o 2014 tuvo lugar el vigesimosegundo Congreso Universitario de Innovación Educativa en las Enseñanzas Técnicas XXII CUIEET impulsado por la Conferencia de Directores En esta ocasión esta edición del CUIEET se celebró en Almadén durante los días 17 a 19 de septiembre de 2014 El CUIEET es un foro de intercambio de experiencias y difusión de las últimas innovaciones en el campo de la investigación educativa Este congreso se creó con el fin de mejorar la formación en las Ingenierías de la Rama Industrial y así facilitar la incorporación al mundo laboral de sus titulados La publicación de los resultados del congreso se han editado en tres volúmenes quedando sus áreas temáticas repartidas de la siguiente manera Volumen I Temática 1 Calidad y Acreditación Temática 2 Desarrollo y Evaluación de competencias transversales Temática 3 Diseño y Competitividad Temática 4 Globalización de las enseñanzas técnicas Temática 5 Implantación y desarrollo de las nuevas titulaciones de Ingeniería Volumen II Temática 6 Innovación Educativa Volumen III Temática 7 Intercambio científico tecnológico formación con Iberoamérica Temática 8 Universidad Empresa Temática 9 Nuevas Fronteras en la Enseñanza Aprendizaje de Ingeniería de Fabricación y Tecnologías de Procesado de Materiales Developments in Engineering Geology M.J. Eggers,J.S. Griffiths,S. Parry ,M.G. Culshaw ,2016-10-12 Developments in Engineering Geology is a showcase of the diversity in the science and practice of engineering geology All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology In practice diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications This is initiating an evolution in the way geology is modelled in engineering geohazard and environmental studies in modern and traditional areas of engineering geology Sección: Geología aplicada a la ingeniería y a la minería ,1959 Geología aplicada a la ingeniería y a la minería ,1959 Rock Mechanics: Achievements and Ambitions Meifeng Cai,2011-09-22 Rock Mechanics Achievements and Ambitions contains the papers accepted for the 2nd ISRM International Young Scholars Symposium on Rock Mechanics which was sponsored by the ISRM and held on 14-16 October 2011 in Beijing China immediately preceding the 12th ISRM Congress on Rock Mechanics Highlighting the work of young teachers researchers and practitioners the present work provides an important stimulus for the next generation of rock engineers because in the future there will be more emphasis on the use of the Earth's resources and their sustainability and more accountability of engineers' decisions In this context it is entirely appropriate that the Symposium venue for the young scholars was in China because of the rock

mechanics related work that is anticipated in the future For example in the Chinese Academy of Sciences report Energy Science and Technology in China A Roadmap to 2050 it is predicted that China s total energy demand will reach 31 45 61 and 66 x 10⁸ tce tonnes of coal equivalent in 2010 2020 2035 2050 The associated per capita energy consumption for the same years is estimated at 2 3 3 1 4 1 and 4 6 tce This increasing demand will be met inter alia by the continued operation and development of new coal mines hydroelectric plants and nuclear power stations with one or more underground nuclear waste repositories all of which will be improved by more modern methods of rock engineering design developed by young scholars In particular enhanced methods of site investigation rock characterisation rock failure understanding computer modelling and rock excavation and support are needed The topics in the book include contributions on Field investigation and observation Rock constitutive relations and property testing Numerical and physical modeling for rock engineering Information technology artificial intelligence and other advanced techniques Underground and surface excavation and reinforcement techniques Dynamic rock mechanics and blasting Predication and prevention of geo environmental hazard Case studies of typical rock engineering Many of the 200 papers address these topics and demonstrate the skills of the young scholars indicating that we can be confident in the continuing development of rock mechanics and rock engineering leading to more efficient safer and economical structures built on and in rock masses Rock Mechanics Achievements and Ambitions will appeal to professionals engineers and academics in rock mechanics rock engineering tunnelling mining earthquake engineering rock dynamics and geotechnical engineering
