Landscapes and Landforms of England and Wales Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection *The Principles of Physical Geography* Francis John Monkhouse, 1957 **Geoheritage and Geotourism** Thomas A. Hose, 2016 Essays on aspects of the natural world its heritage and how best to preserve it Europe s engagement from the late sixteenth century onwards in scientific Earth science inquiry has generated numerous and varied collections of minerals rocks and fossils together with their associated archives artworks and publications forming a rich cultural geoheritage held in major private and especially royal and aristocratic collections museums universities archives and libraries The mines quarries geological structures landforms minerals rocks and fossils or geodiversity that underpin these collections populate past and present day Earth science literature However for too long their scientific historic and cultural significance was not universally recognised and generally they were not accorded adequate resources and protection or geoconservation Hence geotourism was developed in the 1990s to raise public awareness of Europe s geoheritage and geodiversity and to promote its geoconservation the volume s theoretical essays and case studies examine these four core geoelements and provide a timely introduction for anyone interested in natural history museums countryside management and landscape based tourism Dr Thomas A Hose is an Honorary Research Associate in the School of Earth Sciences University of Bristol He has pioneered the recognition of and research into geotourism and is the author of the world s first doctoral thesis on the subject Contributors Kevin Crawford Peter Davis John E Gordon Thomas A Hose Jonathan G Larwood Slobodan B Markovic Martin Munt Emmanuel Reynard Nemanja Tomic Djordjije A Vasiljevic Margaret Wood Volker Wrede Design and Analysis Bernard Leupen, 1997 Humanistic Geography (RLE Social & Cultural Geography) David Ley, Marwyn Samuels, 2014-01-23 Humanistic geography now has an established position in the intellectual development of contemporary geography However

there has so far been little attempt to draw together the humanistic approach in one broad statement This book by the leading figures in the field provides a platform for the exposition of humanistic geography in all its aspects *Science for All* Peter J. Bowler,2009-10-15 Recent scholarship has revealed that pioneering Victorian scientists endeavored through voluminous writing to raise public interest in science and its implications But it has generally been assumed that once science became a profession around the turn of the century this new generation of scientists turned its collective back on public outreach *Science for All* debunks this apocryphal notion Peter J Bowler surveys the books serial works magazines and newspapers published between 1900 and the outbreak of World War II to show that practicing scientists were very active in writing about their work for a general readership *Science for All* argues that the social environment of early twentieth century Britain created a substantial market for science books and magazines aimed at those who had benefited from better secondary education but could not access higher learning Scientists found it easy and profitable to write for this audience Bowler reveals and because their work was seen as educational they faced no hostility from their peers But when admission to colleges and universities became more accessible in the 1960s this market diminished and professional scientists began to lose interest in writing at the nonspecialist level Eagerly anticipated by scholars of scientific engagement throughout the ages *Science for All* sheds light on our own era and the continuing tension between science and public understanding

Traditional Witchcraft for the Seashore Melusine Draco,2012-01-27 Although we are an island race few are fortunate to live near enough to the sea to use the shoreline as a regular magical working area And yet for the natural witch born and bred by the sea the beach and rocky shore are equally as magical as the inland woods and hills of more traditional approaches to witchcraft The author takes us on a magical journey along the seashore and reveals how to work with the natural oceanic tides and energies Learn how to harness the powers of the deep and collect flotsam and jetsam for use as ritual tools A book like no other *Whatever is Under the Earth the Geological Society of London 1807-2007* G. L. Herries Davies,2007 The Geological Society has much to be proud of in its two hundred years of history Not only is it the oldest society of its kind in the world but it has also seen many of the important developments in the science played out within its premises Gordon Herries Davies has expertly and entertainingly laid out this narrative for us steering a skilful course between the necessary facts and the anecdotes that bring these facts alive Institutional histories can be dull affairs a litany of minutes and memoranda but this history suffers from no such problem This book will appeal to the historian of science geoscientists in all branches of the subject and anyone with an interest in the development of scientific ideas in the nineteenth and twentieth centuries Measures for Measure Mike Leeder,2020-11-05 An illustrated explanation of the geological background to the first Industrial Revolution that originated in eighteenth century Britain **England and Wales** Arnold Fellows,1964 British Books in Print ,1970 British Scientific and Technical Books ,1956 The British Isles John Frederick Unstead,1960 **The Natural History of the Burnley Area** Richard Caul,1968 **The British**
