Geological Heritage and Biodiversity in Natural and Cultural Landscapes Antonio Miguel Martínez-Graña, José Ángel Sánchez Agudo, 2021-09-10 Geological Heritage has very diverse elements both for its intrinsic nature and for its social and scientific significance These elements have a scientific dimension stratigraphic geomorphological lithological paleontological etc and a landscape dimension both with implications for territorial management In territorial management and planning it is essential to carry out inventory and cataloging of places of natural and social interest to establish a comprehensive policy The identification and valuation of the geological and biological heritage and their interaction in the landscape should favor the conservation and preservation of this natural and historical heritage Sustainable development implies rational use that prevents the degradation or loss of these unique environments of the natural environment as well as a dissemination and awareness of landscape resources for a better understanding and enjoyment integrating activities of both environmental education and nature tourism

Tectonics, Climate, and Landscape Evolution Sean D.

Willett, 2006-01-01 The Liwu River runs a short course; its channel head at the water divide in Taiwan's Central Range is a mere 35 km from its outflow into the Pacific Ocean. But in those short 35 km the Liwu has carved one of the world's geographic wonders: the spectacular Taroko Gorge with marble and granite walls soaring nearly 1000 m above the river channel. Taroko Gorge was a fitting venue for a 2003 Penrose Conference that addressed the coupled processes of tectonics, climate and landscape evolution. The young mountains, extreme weather and dramatic landforms provided an appropriate backdrop to wide-ranging discussions of geomorphic processes, climate and meteorology, sediment generation and transport, the effects of erosion on tectonics and new analytical and modeling tools used to address these processes and problems. This volume's papers extend that discussion reaching across fields that have experienced rapid advances in the past decade. Publisher's website: *Engineering Geology and the Environment* Paul G. Marinos, 1997 You Say Geotourism, I Say Tourism Geology! Yudi Satria Purnama, 2022-08-12 When most people think of a geologist in a natural tourist destination, they are only able to tell you the rock's history. Geotourism or geological tourism, the author argues, geologists are able to do more than just explaining the rocks. The author offers new opportunities through his idea of tourism geology: increase visitor experience, increasing safety awareness, new tourist attraction, tourist destination, new tourism market or even new tourism type. Tourism geology idea is able to be applied anywhere: National Park, National Monument, UNESCO Geopark, even deep ocean floor or Mars. Tourism geology idea is provided as the other new perspective on geology and tourism relation. It is about the future of tourism and also business opportunity where geological knowledge is able to support various types of tourism markets, e.g. the markets of o Sun and Beach Tourism, o Adventure Tourism, o Health Tourism, o Medical Tourism, o Cave Tourism, o Volcano Tourism, o Deep Sea Tourism, o Moon Tourism, o Mars Tourism. Written by a geologist who dedicated his years to develop it, he shares his perspective in o 1 chapter of introduction, depicts the general description of the book, o 4 chapters of know why arguments which describe tourism geology philosophy, tourist attraction, tourist activity, safety and impact of the activity, what makes it differ with geotourism, and o 5 chapters of know how knowledge as research demonstration. Tourism geology idea provides what should be asked to geologists and what should be delivered by geologists to tourism-related professionals, e.g. park manager, tour guide operator and park rangers. Hence, those two professions are able to communicate in the same content and same context. The content is to deliver proper geological knowledge while the context is tourist attraction. The book is the
