## **Economic Development And Problem Of Displacement:**

Economic Development and Problem of Displacement S. N. Tripathy, 2003-01-01 It Is A Matter Of Deep Concern That The Fruits Of Development Could Not Be Percolated To The Tribal And Poverty Stricken People Despite Our Planned Efforts In The Name Of Development In All Irrigation Projects Hydro Electricity Projects Industrial And Mineral Belts The Local Inhabitants Have Been Victimized The Interests Of The Uprooted Tribals And Weaker Sections Have Been Relegated To The Background Because Of Defective Rehabilitation And Compensation The Problem Of Development Of Tribals Is Mainly Linked With The Backwardness Of The Tribal Areas Poverty Of The People And The Nature Of Development Policy This Work Attempts To Examine The Entire Gamut Of Issues Covering Socio Economic And Psychological Problems The Impact Of Large Dams On Original Inhabitants Environmental Impact Etc And Policies With Special Focus On Poverty Stricken Dalits And Uprooted Tribals In The Development Induced Displacement Areas In Various Parts Of India It Is Expected That The Book Economic Development And Problems Of Displacement Will Be Immensely Useful In Guiding The Policy Makers Planners Researchers And Administrators In Reformulating Policy Paradigms      Development-Induced Displacement and Resettlement Irge Satiroglu, Narae Choi, 2015-04-10 Every year millions of people are displaced from their homes livelihoods and communities due to land based development projects There is no limit to what can be called a development project They can range from small scale infrastructure or mining projects to mega hydropower plants can be public or private well planned or rushed into Knowledge of development induced displacement and resettlement DIDR remains limited even after decades of experience and research Many questions are yet unanswered What is success in resettlement Is development without displacement possible or can resettlement be developmental Is there a global safeguard policy or do we need an international right not to be displaced This book revisits what we think we know about DIDR Starting with case studies that challenge some of the most widespread preconceptions it goes on to discuss the ethical aspects of DIDR The book assesses the current laws policies and rights governing the sector and provides a glimpse of how the displaced people defend themselves in the absence of effective governance and safeguard mechanisms This book is a valuable resource for students and researchers in development studies population and development and migration and development      **The Economics and Politics of Resettlement in India** Shobhita Jain, Madhu Bala, 2006 Edited by two well known scholars of development induced involuntary displacement in India this book brings together fourteen well researched and relevant essays by academics researchers and practitioners with extensive first hand knowledge and experience of the resettlement and rehabilitation R R process in India      Development-Induced Displacement and Resettlement Bogumil Terminski, 2014-05-01 This book explores the issue of development induced resettlement with a particular emphasis on the humanitarian legal and social aspects of this problem Today so called development induced displacement and resettlement DIDR is one of the dominant causes of internal spatial mobility worldwide Each year over 15 million people are forced to abandon their homes

to make space for economic development infrastructure The construction of dams and irrigation projects the expansion of communication networks urbanization and re urbanization the extraction and transportation of mineral resources forced evictions in urban areas and population redistribution schemes count among the many possible causes Terminski aims to present the issue of development caused displacement as a highly diverse global social problem occurring in all regions of the world As a human rights issue it poses a challenge to public international law and to institutions providing humanitarian assistance A significant part of this book is devoted to the current dynamics of development caused resettlement in Europe which has been neglected in the academic literature so far Development's Displacements Peter Vandergeest, Pablo Idahosa, Pablo S. Bose, 2010-10-01 As multilateral agencies social movements and state authorities worldwide struggle to cope with the effects of large scale development projects such as dam building mining oil extraction forest plantations and nature conservation the problem of displacement remains unresolved The crisis of development refugees those forced to relocate not by wars or political conflicts but rather because of development policies programs and projects is becoming increasingly prevalent across the globe While existing studies on development induced displacement have focused on issues such as resettlement and compensation for those displaced this volume seeks to address displacement as a broad and multilayered phenomenon A series of illustrative case studies drawn from around the globe provide causal accounts of why and how displacement occurs what its effects on communities ecosystems and economies look like and the normative or ethical positions held by key actors involved Contributors offer economic political and cultural analyses as well as extensive ethnographic field research to present a picture of displacement that illustrates the depth and the breadth of the issue

**Development, Environment and Migration** S. Irudaya Rajan, Debabrata Baral, 2020-05-17 This book brings the discourses around social justice and sustainable development back into focus by looking at India's mining sector and the state's frameworks for economic development The chapters in this volume analyse mining practices in the mineral rich areas of eastern India through various case studies and highlight their immense human and environmental costs This volume critically analyses selected mining projects in India that have resulted in large scale displacements impoverishment and environmental degradation It identifies the gaps in policy its implementation and the lack of safeguards which threaten the socio economic and ecological ways of life and the livelihoods of the local communities Based on documents reports interviews and field observations this book engages with the issues surrounding the mining sector e.g. land acquisition land use and degradation the politics of compensation policies agitation and social mobilisation health and agriculture livelihood and gender It further provides an assessment of local political economies and offers suggestive frameworks for inclusive growth in this sector This book will be of interest to students and researchers exploring the disciplines of development studies sociology law and governance human ecology and economics **Development-induced Displacement** Chris de Wet, 2005-11-01 Some ten million people worldwide are displaced or resettled every year due to development projects such

as the construction of dams irrigation schemes urban development transport conservation or mining projects The results have usually been very negative for most of those people who have to move as well as for other people in the area such as host populations People are often left socially and institutionally disrupted and economically worse off with the environment also suffering as a result of the introduction of infrastructure and increased crowding in the areas to which people had to move The contributors to this volume argue that there is a complexity and a tension inherent in trying to reconcile enforced displacement of people with the subsequent creation of a socio economically viable and sustainable environment Only when these are squarely confronted will it be possible to adequately deal with the problems and to improve resettlement policies

**Nuclear Power, Economic Development Discourse and the Environment** Manu V. Mathai, 2013 Nuclear power is often characterized as a green technology Technologies are rarely if ever socially isolated artefacts Instead they materially represent an embodiment of values and priorities Nuclear power is no different It is a product of a particular political economy and the question is whether that political economy can helpfully engage with the challenge of addressing the environmental crisis on a finite inequitable and shared planet For developing countries like India who are presently making infrastructure investments which will have long legacies it is imperative that these investments wrestle with such questions and prove themselves capable of sufficiency greater equality and inclusiveness This book offers a critique of civilian nuclear power as a green energy strategy for India and develops and proposes an alternative synergy for sustainability It situates nuclear power as a socio technical infrastructure embodying a particular development discourse and practice of energy and economic development The book reveals the political economy of this arrangement and examines the latter's ability to respond to the environmental crisis Manu V Mathai argues that the existing overwhelmingly growth focused highly technology centric approach for organizing economic activity is unsustainable and needs to be reformed Within this imperative for change nuclear power in India is found to be and is characterized as an authoritarian technology Based on this political economy critique the book proposes an alternative a synergy of ideas from the fields of development economics energy planning and science technology and society studies *Housing and Community Development Amendments of 1980*

United States. Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Housing and Community Development, 1980 **Historical and Socio-Cultural Aspects of North East India (Volume 2)** Sikhamoni Konwar, 2016-01-01 The magnitude of socio cultural diversity of North East India is of enormous significance for the National life of India even though the region enjoys little space and attention in the National arena This book of two volumes is an attempt to showcase the diversified topics of North East India written by academicians and scholars of high repute It contains as many as forty seven articles covering almost all the facets of the wide range of historical and socio cultural aspects of the North East India All the writings are potent enough to project the North East in proper light from the academic point of view The book will surely pave the way for further research and other related academic works on North

East's history, culture, and society strengthening its assimilation process with that of the rest of India

**Drug Abuse: Prevention and Treatment** Mangai Natarajan, 2017-05-15 Ever since the Shanghai convention in 1909 the threat posed to human well being by drug abuse has led countries around the world to take action to deal with their drug problems There are wide variations in the policies pursued but most countries try to reduce both the supply of and the demand for drugs Unfortunately there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them Consequently control and prevention policies are mostly driven by political considerations economic realities and cultural expectations though research has played an important part in formulating and evaluating treatments for drug addiction This volume reviews studies on drug abuse prevention and treatment strategies under five main areas 1 Reducing supply strategies to control the flow of drugs from production to retail distribution 2 Reducing demand prevention of drug use at all stages of involvement and consumption levels 3 Reducing harm promoting situational risk reduction practices for regular users addicts and recreational users 4 Reducing addiction drug treatment options for various groups in various settings and 5 Drug policies and prescriptions focused on debates about prohibition and legalization

**Resettling America** Gary J. Coates, 2023-06-10 Every movement has its bellweathers the ideas that lead the way and rally its adherents towards a set of shared values and visions Resettling America was one such beacon a publication for its time and ahead of its time Those of us doing the work of sustainability and the transformation of communities feel grateful for Gary's early and prescient contribution that has shaped the thinking of so many around the US and beyond Essential reading for all green warriors Jason F McLennan Chief Sustainability Officer Perkins Will Founder Living Building Challenge Originally published in 1981 and now reissued with a new Preface by Gary J Coates Resettling America was one of the first comprehensive transdisciplinary books on the crisis of sustainability and the implications of that crisis for the re design of buildings towns cities and regions Through essays by Coates which provide a theory of ecological design and case studies written by leading authors and activists of the time the book presents a strategic vision of how it would be possible to create a sustainable and livable society through a process of cooperative community development rooted in a radical re visioning of nature self and society By providing a strategic vision as well offering practical means for creating a sustainable society worth sustaining Resettling America remains more relevant and inspiring than ever to those who face the ecology of crises that now surround us in the 21st Century

Human Rights Year Parekh P.H., 2007      Green Gentrification and Environmental Injustice Heather E. Campbell, Adam Eckerd, Yushim Kim, 2024-09-13 This book argues that given the complex nature of the urban environment we cannot find one optimal solution to reducing environmental injustice in part because there is no singular cause Environmental injustice emerges in particular settings because of the combined and interdependent effects of a variety of different policy and community characteristics The authors argue that addressing these interlinked problems requires an understanding of the clusters of community and contextual factors that combine in a variety of ways to both create problems and imply policy approaches to managing them They argue for the use of complexity informed methods to assist in making public policy choices such as Qualitative Comparative Analysis QCA and Agent based Modeling ABM to enable us to better identify plausible solutions for specific contexts This volume offers a new perspective for strategically managing urban policy that considers the risk of gentrification and gentrification related displacement with the ultimate goal of improving social justice Environmental injustice pollution remediation gentrification and displacement are interlinked problems all of which impinge on social justice in US cities However public policy research and often practice as well has tended to separately consider urban policy issues such as environmental injustice brownfields and other pollution remediation how to redevelop neighborhoods and how to contend with gentrification and displacement In this book the authors take a new perspective to such intertwined urban policy issues using complexity thinking and more importantly complex adaptive systems approaches

in order to develop context sensitive policy approaches to managing these ongoing problems      *Environmental Studies/Science by Dr. V. C. Sinha, Anju Agarwal (eBook)* Dr. V. C.
