**The Elgar Companion to the Chicago School of Economics** Ross B. Emmett, 2010-01-01 Many know the Chicago School of Economics and its association with Milton Friedman George Stigler Ronald Coase and Gary Becker But few know the School's history and the full scope of its scholarship In this Companion leading scholars examine its history and key figures as well as provide surveys of the School's contributions to central aspects of economics including price theory monetary theory labor and economic history The volume examines the School's traditions of applied welfare theory and law and economics while providing a glimpse into emerging research on Chicago's role in the development of neoliberalism A companion in the true sense of the word this volume surveys a wide body of Chicago economic studies and guides readers carefully through each The Companion offers biographies of leading Chicago economists and evaluations of the School's connection to approaches to economics that draw from and complement the School including the Virginia School and the work of Armen Alchian and Edward Lazear Moreover this book is a first in many respects as it analyzes the interconnections of the Chicago School's theory methodology and policy and considers by what means and ideas the School's policy framework is driven The breadth and depth of the insights presented here will appeal especially to students and scholars of economics and historians interested in economics social science and applied public policy

**Economic Thinkers** David A. Dieterle, 2013-08-08 Who are the individuals whose novel ideas writings and philosophies have influenced economics throughout history and in doing so have helped change the world This encyclopedia provides a readable study of economics by examining the great economists themselves This book presents biographies of 200 economic thinkers throughout history supplying a one stop reference about the men and women whose ideas writings and philosophies created the foundation of our current understanding of economics Depicting their subjects within the contexts of history development economics and econometrics these biographies provide an insightful overview of the world of economics through the economists of significance and the many subdisciplines topics eras and philosophies they represent **Economic Thinkers A Biographical Encyclopedia** begins by describing economic thinkers in ancient Greece and Rome moves through history to cover economists in the 15th through 19th centuries and addresses economic theory in the 20th century and the modern era Written to be easily accessible and highly readable the work will appeal to students scholars general readers and anyone interested in learning about the historical and philosophical foundation of economics

**Austrian Economics Re-examined** Gerald P O'Driscoll Jr, Mario Rizzo, 2014-12-05 **Austrian Economics Re-examined** The Economics of Time and Ignorance is an expanded version of the 1996 edition of The Economics of Time and Ignorance This work is a classic statement of the role of subjectivism radical uncertainty and change through real time in Austrian economics specifically and in modern economics more generally The

new book contains the full text and Introductions of the earlier edition as well as the comprehensive previously unpublished essay What is Austrian Economics and a new Introduction The essay is a comprehensive overview of the central themes of the book from a somewhat different perspective than in the book itself It supplements the analysis in the book The new Introduction explains that the 2007-8 financial crisis and recent developments in behavioural economics have made the book more relevant than ever before Austrian Economic Re-examines and systematizes the fundamental principles of the Austrian tradition to the analysis of rational expectations business cycles monetary theory competition and monopoly and capital theory The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9781315776736> has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license

The Moralization of the Markets Christoph Henning, 2017-07-12 Nothing affects the modern economy and society more than decisions made in the market place especially but not only decisions made by consumers Although it is not startling to suggest that decisions made in production are affected by choices consumers make consumers have long been viewed not only by academic economists as individual isolated rational actors that make or refrain from purchases purely on the basis of narrow financial considerations Markets are not and never were morally neutral Market relations have always had an often taken for granted moral underpinning The moralization of the markets refers to the dissolution and replacement of the conventional moral underpinnings of market conduct for example in the music market financial markets and corporate governance It further implies not only the heightened importance of new ethical precepts but the significant change in the role of moral ideals in market behavior These profound transformations of economic conduct are accompanied and co-determined by societal conflicts The moralization of markets represents thus a new stage in the social evolution of markets The book is divided into four parts in which the twelve chapters written by contributors from different social science disciplines deal with the context of the moralization of the markets the major social institutions and present case studies that examine European and American attitudes and behavior towards tobacco and GMO expansion of the private and ethics in business and how workers respond to the new corporate norms This volume will be of interest to sociologists economists social scientists and the general consumer alike

International Handbook of Organizational Teamwork and Cooperative Working Michael A. West, Dean Tjosvold, Ken G. Smith, 2008-05-27 In today's fast-changing hyper-competitive environment teamwork and co-operative working enhance the organisation's adaptive capability The team rather than the individual is increasingly seen as the building block of organisations and a key source of competitive advantage The International Handbook of Organisational Teamwork and Co-operative Working provides a clear focus on the psychological and social processes that can stimulate successful cooperation and teamwork Michael West, Dean Tjosvold and Ken Smith have brought together the world's leading authorities from a range of social science disciplines to provide a contemporary review of established and emerging perspectives Throughout

the book processes that both facilitate and obstruct successful cooperation and teamwork are detailed alongside guidance on best practice and methodology The challenging and alternative perspectives presented will inform future research and practice The result is a systematic and comprehensive synthesis of knowledge from a range of disciplines that will prove invaluable to professionals researchers and students alike A systematic and coherent framework which organizes and structures the knowledge in this field An outstanding collection of authoritative high profile authors Challenging alternative perspectives that will stimulate and enlighten future research and practice Selective updated bibliographies of key literatures support every chapter a valuable resource for students trainers and practitioners

**Textiles and Capitalism in Mexico** Richard J. Salvucci, 2014-07-14 The obrajes or native textile manufactories were primary agents of developing capitalism in colonial Mexico Drawing on previously unknown or unexplored archival sources Richard Salvucci uses standard economic theory and simple measurement to analyze the obraje and its inability to survive Mexico's integration into the world market after 1790 Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**The Challenge of Liberty** Robert Higgs, 2006-02-01 Is Classical Liberalism Still Vital The quest for freedom has always been as much a battle of ideas as it is a popular struggle Classical liberal pioneers such as John Locke and Adam Smith stressed the inherent worth of the individual inalienable rights and the benevolent consequences of the cooperative peaceful pursuit of one's own happiness These ideas became the intellectual scaffolding for much of the West's most fundamental institutions and achievements Yet after its 19th century high water mark classical liberalism lost much of its passion focus and popular support Intellectual trends increasingly began to support coercive egalitarianism empire and central planning at the expense of individual liberty personal responsibility private property natural law and free institutions But the eclipse of classical liberalism by contemporary liberalism and conservatism is passing The Challenge of Liberty restores the ideas and ideals of classical liberalism and shows how its contemporary exponents defend such pillars of free societies as individual rights human dignity market processes and the rule of law

*The Economics of Time and Ignorance* Gerald P O'Driscoll Jr, Mario J Rizzo, 2002-09-11 The Economics of Time and Ignorance is one of the seminal works in modern Austrian economics Its treatment of historical time and of uncertainty helped set the agenda for the remarkable revival of work in the Austrian tradition which has led to an ever wider interest in the once heretical ideas of Austrian economics It is here reprinted with a substantial new introductory essay outlining the major developments in the area since its original publication a decade ago

**The American Economic Review**, 1997 *The Corporate Paradox* Wouter H.F.M. Cortenraad, 2012-12-06 The

corporation is by far the most successful legal concept of organization among large business firms Yet there are numerous examples of firms operated in corporate form that were troubled either by internal problems arising from divergences of interests between the firm's various constituents notably managers and investors or by conflicts with other members of society including both victims of accidents or environmental pollution caused by the firm and unpaid creditors in the event of business failure It is this paradox between the corporation's prima facie success and its apparent ambiguity in other respects that is examined in this book Using modern economic theory concerning the functioning of markets and organizations The Corporate Paradox examines how the concept of the corporation relates to the economic entity it organizes and in effect how it may affect the use that firms make of society's valuable but scarce resources To this end both the economic rationales underlying the corporate form of organization and its effects on organizational and individual behavior are reviewed with special emphasis on the separation between ownership and control and the principle of limited liability of shareholders two features which are typical of the corporate concept Finally this book surveys from a predominantly economic perspective legal remedies that United States and Dutch law have developed in response to certain inefficiencies to which these features may give rise

**The Market for Academics** Christine Musselin, 2009-12-04 The management of faculty careers is a critical issue in university autonomy and in many countries recent reforms have increasingly addressed this area Musselin examines this crucial issue through the use of exhaustive empirical research including over 200 interviews on academic job hiring practices and faculty career patterns

**The Journal of Economic Perspectives**, 1997 **European Competition Law Annual 1998** Claus-Dieter Ehlermann, 2000-09-14 Presenting academic papers and edited transcripts of panel discussions first presented at the Third Workshop on European Competition Law held in Florence in 1998 this volume provides insight into the debate of whether governments or the European Union should intervene to prevent powerful firms from abusing their control of critical gateways between consumers and communication information services The volume's three sections consisting of a panel discussion accompanied by from nine to 12 academic papers are organized into three themes regulating access to bottlenecks agreements integration and structural remedies and institutions and competence Panel participants include professors of economics law and telecommunications lawyers specializing in European trade and telecommunications law policy trade and technology advisors and consultants and others Distributed by ISBS c Book News Inc

From Marx to Mises David Ramsay Steele, 2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises's argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored From Marx to Mises is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises

Universities Are Changing Around The World In China and Africa there is massive expansion while many of America s greatest public universities are experiencing major budget cuts In Latin America universities have been affected by dictatorships and privatization but are now growing in ways central to economic development In Europe universities built as state institutions are being told to raise more money from private sources and are being reorganized so they will compete better in global rankings In this context clarity about the public mission of universities is vital yet it is lacking both outside and inside academia When universities educate students is this simply a private benefit because it advances their careers Or is it a public good because informed citizens are integral to democracy and essential for national economic development How important is equal opportunity What are the effects of hierarchy Who pays now and who will pay tomorrow Should the results of academic research be private property for sale or openly available for public use Who sets the university research agendas What kinds of scholarship flourish and what kinds suffer Should producing competitive research take priority over educating competent students Do international rankings distort these and other university priorities or provide needed objective assessments What are the university s roles and responsibilities in terms of knowledge creation and dissemination today And tomorrow In this collection scholars report from Asia Africa Europe Latin America and North America They confront the realities and challenges of higher education as it is torn between multiple public and private agendas This comparative perspective illuminates both the continuing importance of the university s public mission and the pressing need to clarify it Diana Rhoten is the founder and director of the Knowledge Institutions Program and the Digital Media and Learning Project at the Social Science Research Council She has published in a range of academic journals and advises cultural scientific and educational institutions on issues of organizational design creative collaboration and adaptive change Craig Calhoun is president of the Social Science Research Council and University Professor of the Social Sciences at New York University He has served in a variety of academic leadership positions including as a dean and has conducted research in many international settings His most recent book is an edited collection Robert K Merton Sociology of Science and Sociology as Science Columbia      *Economic Forces At Work* Armen Albert Alchian, 1977      *Modern Age* Russell Kirk, 1980
