Economic Policy in the Age of Globalisation Nicola Acocella,2005-02-17 In the age of globalisation both domestic and foreign economic policies play an important role in determining firms strategies Understanding such policies is an essential part of the cultural background of managers at all levels of a firm At the same time firms choices have a greater impact on economic policymaking in a global economy as the range of alternatives open to them expands In this textbook Professor Acocella analyses both sides of this relationship Special emphasis is placed on current issues in policymaking on the basis of social choice principles and the normative and positive theory of economic policy and issues concerning the establishment of international public institutions that can match the global reach of the private institutions markets and firms that generate many of today s economic challenges Broad in scope this book is aimed at students who have completed an introductory course in both micro and macroeconomics **Water as a Social Opportunity** Seanna L. Davidson,Jamie Linton,Warren E.

Mabee,2015-11-26 Often when water is thought about the focus is on problems challenges and crises In November 2012 a group of researchers came together at Queen s University with the idea that it is more illuminating and constructive to think about water as an opportunity Water as a Social Opportunity conveys the idea that the ways in which society responds to water related challenges has the potential to yield a variety of positive outcomes not just for water or the economy but for society more broadly Contributors consider water issues across Canada from this original perspective and suggest this concept as a basis for developing a long overdue national water strategy in Canada Journal of Economic Literature ,1972

National Competitiveness and Economic Growth Timo J. Hämmäläinen,2003 The current paradigm shift in the world economy is challenging the traditional competitiveness and growth theories with their few explanatory variables This book offers a more holistic framework to synthesise the key findings of the various branches of competitiveness and growth research The author illustrates this framework with a new long wave theory of socio economic development This theory emphasises the competitiveness and growth benefits of rapid structural adjustment in the rapidly changing techno economic environment Based on thorough analysis the author argues that both markets and governments have become less efficient due to the current transformation of the world economy His empirical data from 22 OECD countries in the 1980s and 1990s illustrates that efficiency and growth oriented governments have significantly contributed to their countries economic success National Competitiveness and Economic Growthwill furnish its readers with a better understanding of the interdependencies of many important but seemingly unrelated aspects of modern economies and societies for example the dynamics of business and technology and cultural and institutional change It will appeal to economists business professionals
