Menges,1973 **Economic Decision Making** Günter Menges,1974 Jacaranda Key Concepts in VCE Economics 1 Units 1 and 2 12e learnON and Print Richard Morris,2023-01-10 This combined print and digital title provides 100% coverage of the VCE Study Design for Economics The textbook comes with a complimentary activation code for learnON the powerful digital learning platform making learning personalised and visible for both students and teachers Students can start preparing from lesson one with past VCAA exam questions embedded in every lesson Practice customisable SACs available for all Units to build student competence and confidence **Theoretical and Empirical Studies of Rights** Laura Beth Nielsen,2017-05-15 This important volume examines rights from an inter disciplinary law and society perspective beginning with the premise that the most basic functions of rights requires the empirical study of rights consciousness and claiming behavior As such the volume includes articles and essays by political scientists historians lawyers and sociologists which place the study of ordinary citizens understandings of rights and what actions they take based on that knowledge at the forefront of an empirical research agenda This has important implications for law s capacity to achieve social change and can lead to better understanding of how rights can and should operate in a social and legal system The volume is organized around the social movements and political processes which give rise to rights the processes by which people come to understand they enjoy a right the decision to invoke the right either formally or informally and the organizational and institutional constraints and opportunities for exercising rights Expected Utility Hypotheses and the Allais Paradox M. Allais,G.M. Hagen,2013-03-14 Utility theory or value theory in general is certainly the cornerstone of decision theory game theory microeconomics and all social and political theories which deal with public decisions Recently the American School of utility founded by von Neumann Morgenstern encountered a far going criticism by the French School of utility represented by its founder Allais The whole basis of the theory of decisions involving risk has been shaken and put into question Consequently basic research in the fundamentals of utility and value theory evolved into a crisis Like any crisis in basic research and this one was not an exception it was very fruitful One may simply say Allais versus von Neumann Morgenstern or the French School of utility versus the American School became one of the battlefields of scientific development which proved to be a most creative source of new advances and new developments in all those sciences which are based on evaluation of utilities Engineering Economics Analysis for Evaluation of Alternatives Ira H. Kleinfeld,1993-01-12 The engineer s guide to economical decision making Engineering economics is an important subject for both aspiring and practicing engineers As global competition increases engineers are increasingly asked to analyze and monitor their processes and products not only to ascertain their level of quality but their cost effectiveness as well It is imperative to know the scientific and engineering principles of design work and decision making in a world where technology is constantly evolving Kleinfeld s Engineering Economics Analysis for Evaluation of Alternatives offers students professors

and professionals guidance for making smart economical decisions when it comes to design and manufacturing

Economics and moral philosophy have in recent years been considered to be distinct and separate fields. However, behavioural economics has started to reconcile various aspects of morality and economics which has offered new conceptual opportunities to advance economics ethics and business ethics. This book aims to advance economic ethics and business ethics by combining normative principles and empirical evidence grounded on the key motivational forces in economic decision making. It has three core objectives: to assess order ethics as a theory of both economic ethics and business ethics; using behavioural economics methods and evidence to identify cardinal virtues for modern business ethics; to set up valuable guidelines for the implementation of economic ethics and business ethics.
