**Economic Evaluation of Transport Projects** Ginés de Rus, M. Pilar Socorro, Jorge Valido, Javier Campos, 2023-08-01 This book is a guide to the economic evaluation of transport policies and investment projects through cost benefit analysis CBA It covers the CBA of transportation projects and policies and introduces the fundamental concepts of CBA before considering their application in real world settings A distinct focus of the book is on the practical applications of CBA It includes real world examples of CBA such as high speed rail investment and the subsidization of air transport which illustrate the importance of using a rigorous analytical framework to evaluate transport projects and policies The primary objective of this book is to present a basic model for the evaluation of transport projects and policies with explicit assumptions and practical evaluation rules derived from it The rules and measurement criteria derived from this model are applied to the examples mentioned above Overall this book is an excellent resource for students practitioners and policymakers involved in transport economics and evaluation as it provides a comprehensive understanding of the principles and applications of CBA in the transport sector

**Transport Project Evaluation** Elvira Haezendonck, 2008-01-01 This timely book puts transport cost benefit analysis in a wider institutional perspective relating it in particular to decision making The book will be of interest to practitioners consultants and academics who are active in the evaluation of transport projects Erik T Verhoef VU University Amsterdam The Netherlands This is an important piece of work on project evaluation An attractive feature is the balanced treatment of theory and application The book provides very useful information on efforts of national governments in various countries to increase the quality of project evaluation studies by formulating guidelines for project evaluation One of the strong points of the book is that it does not only address technical aspects of project evaluation tools but also the institutional structures within which decisions are taken Piet Rietveld Vrije Universiteit and Tinbergen Institute Amsterdam The Netherlands This book revisits traditional evaluation methods such as cost benefit analysis to try and find a balance between the ever increasing demand for transport the search for sustainable mobility and green transport solutions and the limited financial

resources that governments are able to invest in transport infrastructure projects In this respect the effects of transport policy need to be measured and evaluated based on multiple criteria and the need to take into consideration a larger group of stakeholders and investors in transport projects The book illustrates methodologically and empirically why and how the institutional and multi actor environment impacts upon the analysis evaluation and decision making of transport projects in Europe Including contributions from scholars with considerable expertise in the field this book will be of great interest to consultants policymakers and researchers

*The Routledge Handbook of Transport Economics* Jonathan Cowie, Stephen Ison, 2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The

discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues. It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation. Understand that and you alleviate the problem. Featuring contributions from world leading scholars and practitioners from across the globe, all of the chapters within this book are written from a practical perspective; theory is applied and developed using real world examples. The book examines concepts, issues, ideas and practicalities of transport provision in five key topic areas: public transport, public transport reform, economic development and transport, modelling transport and the environment, freight transport. A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living. Practical and insightful, this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning, appraisal, regulation and freight, and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation.
