*Biblical Economic Policy: Ten Scriptural Truths for Fiscal and Monetary*

*Decision-Making* David Arnott PhD,Sergiy Saydometov PhD ,2021-09-06 What does the Bible say about economics A lot What about socialism which is becoming an increasingly common concern in US economic policy discussions In Biblical Economic Policy Arnott and Saydometov build a biblical framework for analyzing national economic policy that takes on everything from taxes to spending to tariffs to minimum wage The Bible has something to say about all these critical present day issues and this book explains how to apply it to 21st century policies Authors Dave Arnott and Sergiy Saydometov hold up the mirror of the Bible and ask their fellow Christians Is this the way we re supposed to run a biblical economy What the book is not It is NOT a financial advice book It is NOT about how to apply business principles at work It is NOT about stewardship or giving It is NOT about how to run your business for the glory of God Biblical Economic Policy takes the macroeconomic view and analyzes how well America s economic policies align with biblical principles This book tackles difficult present day economic policies including taxes spending national debt interest rates and money supply Written with sound biblical grounding in accessible language Biblical Economic Policy will turn the common reader into a biblical economic analyst

**Decision making behaviour and its influence on social and economic performance of farm households in Hyderabad-Karnataka region** Nagesh N. S,Amrutha T. Joshi ,Prem Jose Vazhacharickal, Farmers in developing countries are frequently exposed to the uncertainties of weather prices and disease Thus decision making behaviour plays a crucial

role every day affecting farming operations The study was carried out in Raichur Kalaburagi and Koppal districts From each district two taluks were selected and from each taluk two gram panchayats were selected randomly and from each panchayat a village was selected randomly From each selected village 15 farmers were randomly selected and the total sample size constituted 180 respondents The attitude of farmers towards farming in irrigated situation was better than the attitude of farmers in rainfed situation The overall decision making behaviour was better in irrigated situation compared to rainfed situation Achievement motivation and decision making behaviour were found to be significantly influencing the annual agricultural income As the decision making behaviour score increased by one unit the annual agricultural income increased by 9231 28 Irrigated rainfed dummy number of years of schooling achievement motivation risk orientation and mass media participation were found to be significantly influencing the institutional participation In irrigated situation as evident from the experiment there were 38 per cent of the respondents in the risk averse category In the case of rainfed situation it is alarming to note that as high as 52 per cent of the respondents were in the risk averse group on loss of loss The irrigated farmers were more likely to take up loan in comparison to rainfed farmers Number of family members had a positive influence on migration while the decision making behaviour score had a negative influence on migration There is evidence of framing bias and anchoring bias among the sample respondents The farmers were willing to pay more for weather information compared to market and plant protection information

**Behavioral and neuroscientific analysis of economic decision making in animals** Tobias Kalenscher, Marijn Van Wingerden, The experimental analysis of animal behavior has a rich tradition in psychology behavioral ecology and many other scientific branches dedicated to the study of decision making However it has never enjoyed a similar popularity in economics This has recently changed with the dawn of neuroeconomics a discipline combining the analytic and experimental tools of psychology and economics with the technologies available in neuroscience to unravel the neurobiological mechanisms underlying economic behavior Since many of the sophisticated neuroscientific techniques can only be used on animals neuroeconomists have come up with a large and ever growing repertoire of animal models to probe economic decision making Besides the value of using animals as model systems to emulate human economic behavior the discipline of animal economic decision making exists in its very own right an abundance of animal species at various evolutionary stages show behavior that complies with many of the predictions of economic theory whilst at the same time demonstrating violations of optimal choice models that are reminiscent of similar anomalies found in human behavior Hence the analysis of animal choice does not only offer insights into the evolutionary origins of economic decision making it also testifies that the analysis of animal behavior is a convenient economical and sound way to test competing economic decision models in optimally controlled experimental environments to probe their neural implementation and to yield common denominators in choice behavior In short economic theory provides more than just an alternative language to describe animal psychology its combination with biology psychology and neuroscience gives

way to synergy effects that open up new venues for studying economic choice In this special issue we would like to gather the latest results from this cross disciplinary topic address the overlap and discrepancies in the neurobiology of economic decision making found between species and identify the challenges that lie ahead in translating results from species to species and ultimately to humans The exclusive focus on non human animals makes this Research Topic unique and distinct from previous special issues which covered a broader range of matters and subjects in the neurobiological analysis of decision making

John Malcolm Dowling, Chin-fang Yap, 2007-09-04 This book examines the field of behavioral economics and provides insights into the following questions The book looks at decision making and behavior from the point of view of i individual behavior and choice ii group and interactive choice and iii collective choices and decision making In particular it covers the following aspects instances when bounded rationality leads to decisions inconsistent with standard economic assumptions risk and the processes by which investors and consumers make decisions altruistic and cooperative behavior as alternatives to competition game theory as a way to explore motives of cooperation versus competition the determinants of happiness and the relationship between utility and well being the concept of social capital including motivations for charity and being a responsible citizen how trust and fairness relate to economic actions and the motivation to cooperate rather than compete behavior such as crime corruption and bribery from ethical social and economic viewpoints and finally the decision making process of collective choice and how societies develop rules for governing themselves This is the first book to bridge economics psychology sociology and political sciences and explain the nuanced subtleties of decision making

Neuroeconomic and Behavioral Aspects of Decision Making Kesra Nermend, Małgorzata Łatuszyńska, 2017-10-06 This proceedings volume presents the latest scientific research and trends in experimental economics with particular focus on neuroeconomics Derived from the 2016 Computational Methods in Experimental Economics CME conference held in Szczecin Poland this book features research and analysis of novel computational methods in neuroeconomics Neuroeconomics is an interdisciplinary field that combines neuroscience psychology and economics to build a comprehensive theory of decision making At its core neuroeconomics analyzes the decision making process not only in terms of external conditions or psychological aspects but also from the neuronal point of view by examining the cerebral conditions of decision making The application of IT enhances the possibilities of conducting such analyses Such studies are now performed by software that provides interaction among all the participants and possibilities to register their reactions more accurately This book examines some of these applications and methods Featuring contributions on both theory and application this book is of

interest to researchers students academics and professionals interested in experimental economics neuroeconomics and behavioral economics      **Handbook of Behavioural Economics and Smart Decision-Making** Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy      **Decision-making in Nursing** Marie Truglio-Londrigan, 2008 Decision Making In Nursing Enables Students To Be Reflective Critical Flexible And Comfortable With The Many Decisions They Will Make As A Nurse On A Daily Basis This Text Offers Models That Nurses May Integrate Into Practice And Explores How Decisions Are Affected By Health Policy Politics Ethics Legal Issues Religion Culture And Other Influences Each Chapter Includes A Case Study Using A Nursing Scenario To Illustrate The Use Of A Particular Framework In An Actual Practice Setting      **Principles of Microeconomics** N. Gregory Mankiw, 1998      **Evidence-based Decisions and Economics** Ian Shemilt, Miranda Mugford, Luke Vale, Kevin Marsh, Cam Donaldson, 2011-09-22 The need for evidence based decisions that take account of both effectiveness and economics is greater now than ever Using case studies and illustrative examples throughout the authors describe how the activities and outputs of evidence synthesis systematic review economic analysis and decision making interact within and across different spheres of health and social policy and practice Expanding on the first edition the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare education and criminal justice as well as health care Written by economists and health services researchers closely involved in developing evidence based policy and practice it showcases current state of the art methodology and will be an invaluable read for all policy makers and practitioners using evidence to inform decisions analysts conducting research to support decisions and students discovering the need for evidence based decisions to incorporate economic perspectives and evidence
